

Reporting period: 25 to 31 May 2008 (Week 22)

Weekly highlights

Human cases of avian influenza infection

- The Ministry of Health of Bangladesh has confirmed its first case of human infection with H5N1 avian influenza. The case was identified retrospectively as part of seasonal surveillance activities run by the International Centre for Diarrhoeal Disease Research, Bangladesh (ICDDR, B). The case is a 16-month-old male from Komalapur, Dhaka. He developed symptoms on 27th January 2008 and subsequently recovered. The case was exposed to live and slaughtered chickens at his home. Specimens have been collected from his family members and neighbours. All remain healthy to date.

Animal cases of avian influenza infection

- No new cases. (OIE)
