

Summary

1. The latest human case of avian influenza A(H5N1) reported by the World Health Organization (WHO) occurred in Cambodia (August 22, 2013).[#]
2. From 2008 to 2012, 32 to 73 confirmed human cases of avian influenza A(H5N1) were reported to WHO annually. In 2013 (as of August 24), 27 cases were reported by WHO.
3. No new confirmed human cases of avian influenza A(H7N9) were reported by WHO and the National Health and Family Planning Commission (NHFPC) during the reporting period. As of August 24, a total of 135 cases were reported.

This week's highlights

(as of August 24, 2013) (Sources: WHO, World Health Organization for Animal Health (OIE), NHFPC and the Health Department of Guangdong Province)

Table 1. Hong Kong: Confirmed human cases of avian influenza A(H5N1) / avian influenza A(H7N9)

	No. of H5N1 cases (No. of deaths)	No. of H7N9 cases (No. of deaths)	Details
In this reporting period	0(0)	0(0)	-

[#] Since November 21, 2012, WHO only publishes information on human cases with avian influenza A(H5N1) infection on a monthly basis in "[Influenza at human - animal interface: Monthly Risk Assessment Summary](#)". Cases of human infection with H5N1 will only be reported in Disease Outbreak News for events that are unusual or associated with potential increased risks.

Table 2. Outside Hong Kong: Confirmed human cases of avian influenza A(H5N1)

	Place of occurrence	No. of cases (No. of deaths)	Details
In this reporting period	Cambodia	1(0)	A 6-year-old boy from Kandal province was confirmed positive for avian influenza A(H5N1). He had contact with sick poultry. (<i>WPRO</i> , August 22, 2013)

For the cumulative no. of human cases by place, please refer to WHO website.

Table 3. Outside Hong Kong: Confirmed cases of human infection with avian influenza A(H7N9)

	Place of occurrence	No. of cases (No. of deaths)	Details
In this reporting period	-	0(0)	-

Table 4. Hong Kong: Confirmed reports of avian influenza A(H5N1) in poultry / wild birds

	No. of reports of H5N1 in poultry / wild birds	Details
In this reporting period	0	-
Cumulative since 2013	1 ⁰	-

⁰ For further information, please visit the website of the Agriculture, Fisheries and Conservation Department (AFCD)

Table 5. Outside Hong Kong: Confirmed avian influenza A(H5N1) in poultry / wild birds

Place of occurrence	No. of reports of H5N1 in poultry / wild birds	Details
Cambodia	1	Cambodia: Poultry in Battambang province died from H5N1 avian influenza infection. (<i>OIE</i> , August 19, 2013)

For cumulative reports of avian influenza A(H5N1) in poultry / wild birds, please select “Highly path. avian influenza” on the [OIE](#) website

Table 6. Outside Hong Kong: Confirmed avian influenza A(H7N9) in poultry / wild birds

Place of occurrence	No. of reports of H7N9 in poultry / wild birds	Details
-	0	-

For cumulative reports of avian influenza A(H7N9) in poultry / wild birds, please select “Low path. avian influenza” on the [OIE](#) website

Table 7. Confirmed human cases of avian influenza A(H5N1) reported to WHO since 2003 (by onset date) §

	2003	2004	2005	2006	2007	2008	2009	2010	2011	2012	2013	Overall
Cases	4	46	98	115	88	44	73	48	62	32	27	637
Deaths	4	32	43	79	59	33	32	24	34	20	18	378
Case Fatality Rate	100%	69.6%	43.9%	68.7%	67.0%	75.0%	43.8%	50.0%	54.8%	62.5%	66.7%	59.3%

§ Further breakdown by countries is available at [WHO](#) website

Table 8. In the past 6 months, highly pathogenic avian influenza infections were confirmed in the following countries/areas (Sources: WHO, OIE, NHFPC and official websites; **Blue:** H7N9 related cases)

Country/ Area	Date of last report	Human cases	Poultry cases	Wild bird cases
Bangladesh	29/04/2013	N	Y*	N
Bhutan	08/02/2013	N	Y*	N
Cambodia	22/08/2013	Y*	Y	N
China				
Anhui	23/04/2013	Y* ⁱ	Y ⁱⁱ	-
Beijing	29/05/2013	Y* ⁱⁱⁱ	-	-
Fujian	09/05/2013	Y ^{iv}	-* ^v	-

Democratic People's Republic of Korea	13/05/2013	N	Y*	N
Egypt	04/06/2013	Y*	Endemic	N

ⁱ One case of human infection with avian influenza A(H7N9) in Anhui Province was reported by the National Health and Family Planning Commission on April 23, 2013.

ⁱⁱ On 10 April 2013, chicken and duck samples from live bird markets in Anhui Province were tested positive for low pathogenic avian influenza A(H7N9).

ⁱⁱⁱ One case of human infection with avian influenza A(H7N9) in Beijing Municipality, China, was reported by WHO on May 29, 2013.

^{iv} One case of human infection with avian influenza A(H7N9) in Fujian Province was reported by the National Health and Family Planning Commission on May 6, 2013.

^v On 9 May 2013, a sample from the environment at a market in Fujian Province was tested positive for low pathogenic avian influenza A(H7N9).

^{vi} One case of human infection with avian influenza A(H7N9) in Guangdong Province was reported by the Health Department of Guangdong Province on August 10, 2013.

^{vii} On 21 May 2013, a sample from chicken in Guangdong Province was tested positive for low pathogenic avian influenza A(H7N9).

^{viii} One case of human infection with avian influenza A(H7N9) in Hebei Province was reported by the National Health and Family Planning Commission on July 20, 2013.

^{ix} One case of human infection with avian influenza A(H7N9) in Henan Province was reported by the Henan Provincial Health Bureau on April 25, 2013.

^x On April 24, 2013, environment samples from live bird markets in Henan Province were tested positive for low pathogenic avian influenza A(H7N9).

^{xi} One case of human infection with avian influenza A(H7N9) in Hunan Province was reported by the National Health and Family Planning Commission on May 1, 2013.

^{xii} One lookback confirmed case of human infection with avian influenza A(H7N9) in Jiangsu Province was reported by the National Health and Family Planning Commission on July 5, 2013.

^{xiii} On 22 April 2013, a pigeon sample from a farm in Jiangsu Province was tested positive for low pathogenic avian influenza A(H7N9).

^{xiv} One case of human infection with avian influenza A(H7N9) in Jiangxi Province were reported by the National Health and Family Planning Commission on May 7, 2013.

^{xv} On 5 May 2013, a sample from chicken at a market in Jiangxi Province was tested positive for low pathogenic avian influenza A(H7N9).

^{xvi} One case of human infection with avian influenza A(H7N9) in Shandong Province was reported by the National Health and Family Planning Commission on April 28, 2013.

^{xvii} On 5 May 2013, three samples from the environment at a live bird market in Shandong Province was tested positive for low pathogenic avian influenza A(H7N9).

^{xviii} One case of human infection with avian influenza A(H7N9) in Shanghai Municipality was reported by the National Health and Family Planning Commission on April 20, 2013.

^{xix} Low pathogenic avian influenza A(H7N9) was reported in markets in Shanghai Municipality on April 5, 2013.

^{xx} One imported case of human infection with avian influenza A(H7N9) from Jiangsu Province was reported by the Taiwan Centers for Disease Control on April 24, 2013.

^{xxi} One case of human infection with avian influenza A(H7N9) in Zhejiang Province were reported by the National Health and Family Planning Commission on April 28, 2013.

^{xxii} On April 26, 2013, chicken samples from a live bird market in Zhejiang Province were tested positive for low pathogenic avian influenza A(H7N9).

Country/ Area	Date of last report	Human cases	Poultry cases	Wild bird cases
India	05/08/2013	N	Y*	N
Indonesia	04/07/2013	Y*	Endemic	N
Italy	23/08/2013	N	Y* ^{xxiii}	N
Mexico	12/08/2013	N	Y* ^{xxiv}	Y
Nepal	30/06/2013	N	Y*	N
South Africa	15/04/2013	N	Y* ^{xxv}	N
Vietnam	26/04/2013	Y*	N	N

Table 9. Confirmed human cases of avian influenza A(H5N1) reported to WHO since 2003

Country	Cumulative no. of cases (December 2003 to August 2013)	No. of recent cases (May 2013 to August 2013)
Azerbaijan	8	0
Bangladesh	7	0
Cambodia	38	7
China	45	0
Djibouti	1	0
Egypt	173	1
Indonesia	193	1
Iraq	3	0
Laos	2	0
Myanmar	1	0
Nigeria	1	0
Pakistan	3	0
Thailand	25	0
Turkey	12	0
Vietnam	125	0
Overall	637	9

^{xxiii} On August 23, 2013, avian influenza A(H7N7) was reported in a commercial farm in Italy.

^{xxiv} On August 12, 2013, avian influenza A(H7N3) was reported in a farm in Mexico.

^{xxv} Avian influenza A(H5N2) was reported on commercial ostrich farms in South Africa.

Table 10. Details of the recent confirmed human cases of avian influenza A(H5N1) reported to WHO (May 2013 to August 2013) (Sources: WHO)

Date of report by WHO	Country	Province / Region	District	Sex	Age	Outcome at the time of reporting
17/05/2013	Cambodia	Kampong Speu	Thpong	F	5	-
04/06/2013	Egypt	Sohag	-	F	25	Fatal
02/07/2013	Cambodia	Phnom Penh	Russey Keo	M	58	Recovered
02/07/2013	Cambodia	Kampot	Bantheay Meas	F	6	Fatal
04/07/2013	Indonesia	West Java	-	M	2	-
