

Summary

1. There were no new human cases of avian influenza A(H5N1) reported by the World Health Organization (WHO).[#]
2. From 2008 to 2013, 32 to 73 confirmed human cases of avian influenza A(H5N1) were reported to WHO annually. In 2014 (as of April 12), 15 cases were reported by WHO[^].
3. During this reporting period, 6 confirmed human cases of avian influenza A(H7N9) were reported by the National Health and Family Planning Commission (NHFPC) and the Centre for Health Protection (CHP) of the Department of Health in Hong Kong. The cases were from Guangdong (4), Hong Kong (1) and Anhui (1). Since March 2013 (as of April 12, 2014), there were a total of 418 cases reported.

[#] Since November 21, 2012, WHO only publishes information on human cases with avian influenza A(H5N1) infection on a monthly basis in “[Influenza at human - animal interface: Monthly Risk Assessment Summary](#)”. Cases of human infection with H5N1 will only be reported in Disease Outbreak News for events that are unusual or associated with potential increased risks

[^] According to date of disease onset

This week's highlights

(as of April 12, 2014) (Sources: WHO, NHFPC, CHP and the World Health Organization for Animal Health (OIE))

Table 1. Hong Kong: Confirmed human cases of avian influenza A(H5N1) / avian influenza A(H7N9)

	No. of H5N1 cases (No. of deaths)	No. of H7N9 cases (No. of deaths)	Details
In this reporting period	0(0)	1(0)	Hong Kong: An imported human case of avian influenza A(H7N9) involving an 82-year-old woman was confirmed. She presented with cough with blood-stained sputum since April 7. She came to Hong Kong by car via Lok Ma Chau on April 8. She was admitted for further management under isolation on the same day. She was in stable condition. (CHP, April 9, 2014)

Table 2. Outside Hong Kong: Confirmed human cases of avian influenza A(H5N1)

	Place of occurrence	No. of cases (No. of deaths)	Details
In this reporting period	-	0(0)	-

For the cumulative no. of human cases by place, please refer to [WHO/WPRO](http://www.who.int/wpro) website.

Table 3. Outside Hong Kong: Confirmed cases of human infection with avian influenza A(H7N9)

	Place of occurrence	No. of cases (No. of deaths)	Province / Municipality	City / District / Area	Age (years)	Sex	Condition at time of reporting	Date of report
In this reporting period	China	5(0)	Anhui	-	69	M	critical	8/4/2014
			Guangdong	Shantou	37	M	critical	10/4/2014
			Guangdong	Heyuan	71	F	critical	10/4/2014
			Guangdong	Guangzhou	81	F	critical	10/4/2014
			Guangdong	Guangzhou	79	M	critical	11/4/2014

Table 4. Outside Hong Kong: Cumulative number of confirmed cases of human infection with avian influenza A(H7N9) since 2013

Confirmed H7N9 human cases have been reported in the following countries / areas		Cumulative no. of cases (420 cases in total) (as of April 14, 2014)
China	Zhejiang Province	138
	Guangdong Province	102
	Jiangsu Province	49
	Shanghai Municipality	41
	Fujian Province	22
	Hunan Province	20
	Anhui Province	12
	Hong Kong [%]	10 ([%] all cases imported from Guangdong Province)
	Jiangxi Province	6
	Henan Province	4
	Beijing Municipality	4
	Guangxi Province [@]	3 ([@] 1 case imported from Guangdong Province)
	Shandong Province ⁺	3 (⁺ 1 case imported from Jiangsu Province)
	Taiwan [*]	2 ([*] all cases imported from Jiangsu Province)
	Guizhou Province [#]	1 ([#] imported from Zhejiang Province)
Malaysia ^{&}		1 (^{&} imported from Guangdong Province)

[%] The 10th case reported on April 13, 2014, is not included in Table 1 as it falls outside the reporting period of this issue.

Table 5. Outside Hong Kong: Confirmed human cases of avian influenza A(H10N8)

	Place of occurrence	No. of cases (No. of deaths)	Details
In this reporting period	-	-	-
Previously reported cases	China	3(2)	<p>Jiangxi Province: A 75-year-old man, reported on 13 February 2014.</p> <p>Jiangxi Province: A 55-year-old woman, reported on 25 January 2014.</p> <p>Jiangxi Province: A 73-year-old woman, reported on 17 December 2013.</p>

ⁱ On 25 October 2013, highly pathogenic avian influenza A(H7N2) was reported on a poultry farm in Australia.

ⁱⁱ WHO reported on 9 January 2014, a new confirmed human case of avian influenza A(H5N1) in Canada. The patient had visited Beijing from 6 to 27 December 2013, before his symptom onset on 27 December 2013.

ⁱⁱⁱ On 8 April 2014, CHP was notified by NHFPC regarding a human case of avian influenza A(H7N9) in Anhui Province.

^{iv} On 6 February 2014, CHP was notified by NHFPC regarding a human case of avian influenza A(H7N9) in Beijing Municipality.

^v WHO reported on 9 January 2014, a new confirmed human case of avian influenza A(H5N1) in Canada. The patient had visited Beijing from 6 to 27 December 2013, before his symptom onset on 27 December 2013.

^{vi} On 29 March 2014, CHP was notified by NHFPC regarding a human case of avian influenza A(H7N9) in Fujian Province.

^{vii} On 11 April 2014, CHP was notified by the Health and Family Planning Commission of Guangdong Province regarding a human case of avian influenza A(H7N9) in Guangdong Province.

^{viii} On 21 March 2014, OIE reported that specimens from live bird markets in Guangzhou and specimens from poultry on a farm in Zhuhai, Guangdong Province, were tested positive for avian influenza A(H7N9).

^{ix} On 1 February 2014, a human case of avian influenza A(H5N1) was confirmed in Guangxi Province.

^x On 6 February 2014, a human case of avian influenza A(H7N9) was confirmed in Guangxi Province.

^{xi} On 11 February 2014, specimens from a market in Guangxi Province were tested positive for avian influenza A(H7N9).

^{xii} On 16 January 2014, CHP was notified by NHFPC regarding an additional human case of avian influenza A(H7N9) in Guizhou Province, which is imported from Zhejiang Province.

The patient became ill when he was working in Zhejiang Province.

^{xiii} On 18 February 2014, highly pathogenic avian influenza A(H5N1) was reported on a poultry farm in Guizhou Province.

^{xiv} On 21 December 2013, highly pathogenic avian influenza A(H5N2) was reported on a poultry farm in Hebei Province.

^{xv} On 13 April 2014, CHP confirmed an imported human case of avian influenza A(H7N9) in Hong Kong.

^{xvi} In Hong Kong, a number of samples from a batch of live chicken imported from a registered poultry farm in Shunde District of Foshan City of Guangdong Province were confirmed H7 positive on 27 January 2014. (<http://www.info.gov.hk/gia/general/201401/27/P201401270847.htm>)

^{xxiii} On 13 January 2014, highly pathogenic avian influenza A(H5N1) was reported on a poultry farm in Hubei Province.

[®] This case was not included in Table 1 as it falls outside the reporting period of this issue.

[^] This case was not included in Table 3 as it falls outside the reporting period of this issue.

[#] This case was not included in Table 7 as it falls outside the reporting period of this issue.

Other confirmed human cases of avian influenza infections not included in the above table:

(1) On 30 December 2013, the Centre for Health Protection of the Department of Health in Hong Kong recorded a confirmed human case of influenza A(H9N2) affecting a man aged 86 years. (<http://www.info.gov.hk/gia/general/201312/30/P201312300427.htm>)

^{xxiii} On 1 April 2014, CHP was notified by NHFPC regarding a human case of avian influenza A(H7N9) in Hunan Province.

^{xxix} On 7 March 2014, WHO reported a confirmed human case of avian influenza A (H5N1) in Hunan Province.

^{xx} On 7 March 2014, specimens from markets in Hunan Province were tested positive for avian influenza A(H7N9).

^{xxi} On 14 April 2014, CHP was notified by NHFPC regarding a human case of avian influenza A(H7N9) in Jiangsu Province.

^{xxii} On 21 February 2014, CHP was notified by NHFPC regarding a human case of avian influenza A(H7N9) in Jilin Province.

^{xxiii} On 14 March 2014, Macao SAR reported that environmental samples taken from two markets were tested positive for avian influenza A(H7).

(http://portal.gov.mo/web/guest/info_detail?infoid=339342) (in Chinese)

^{xxiv} On 5 March 2014, CHP was notified by NHFPC regarding an imported human case of avian influenza A(H7N9) in Shandong Province. The patient became ill when he was in Jiangsu Province.

^{xxv} On 20 January 2014, specimens from a poultry farm in Shandong Province tested positive for avian influenza A(H5N2).

^{xxvi} On 23 January 2014, CHP was notified by NHFPC regarding an additional human case of avian influenza A(H7N9) in Shanghai municipality.

^{xxvii} One case of human infection with avian influenza A(H7N9) imported from Jiangsu Province was reported in Taiwan on December 31, 2013.

^{xxviii} On 7 March 2014, highly pathogenic avian influenza A(H5N1) in poultry was reported in Yunnan Province.

^{xxix} On 28 February 2014, CHP was notified by NHFPC regarding 2 human cases of avian influenza A(H7N9) in Zhejiang Province.

^{xxx} On 16 January 2014, specimens from markets in Zhejiang Province were tested positive for avian influenza A(H7N9).

^{xxxi} On 21 February 2014, two house crows were tested positive for avian influenza A(H5N1) in India.

^{xxxii} On 28 February 2014, avian influenza A(H5N8) was reported on poultry farms in the Republic of Korea.

^{xxxiii} On 12 February 2014, the Ministry of Health of Malaysia reported a confirmed human case of avian influenza A(H7N9). The patient was a tourist from Guangdong Province of China.

Table 10. Confirmed human cases of avian influenza A(H5N1) reported to WHO since 2003

Country	Cumulative no. of cases (December 2003 to April 2014)	No. of recent cases (January to April 2014)
Azerbaijan	8	0
Bangladesh	7	0
Cambodia	56	9
Canada	1	1
China	47	2
Djibouti	1	0
Egypt	175	2
Indonesia	195	0
Iraq	3	0
Laos	2	0
Myanmar	1	0
Nigeria	1	0
Pakistan	3	0
Thailand	25	0
Turkey	12	0
Vietnam	127	2
Overall	664	16
