

Avian Influenza Report

VOLUME 10, NUMBER 49

Reporting period: November 30 – December 6, 2014 (Week 49)
(Published on December 9, 2014)

Summary

1. There were eight new human cases of avian influenza A(H5N1) from Egypt reported by the World Health Organization (WHO) on December 4, 2014. [#]
2. From 2008 to 2013, 32 to 73 confirmed human cases of avian influenza A(H5N1) were reported to WHO annually. In 2014 (as of December 6), 27 cases were reported by WHO[^].
3. During this reporting period, there were one new human case of avian influenza A(H7N9) from Guangdong Province notified to the Centre for Health Protection by the Health and Family Planning Commission of Guangdong Province, and two new human cases of avian influenza A(H7N9) from Fujian (1) and Shanghai (1) as reported by the Mainland health authorities. Since March 2013 (as of December 8, 2014), there were a total of 462 cases reported.

[#] Since November 21, 2012, WHO only publishes information on human cases with avian influenza A(H5N1) infection on a monthly basis in “[Influenza at human - animal interface: Monthly Risk Assessment Summary](#)”. Cases of human infection with H5N1 will only be reported in Disease Outbreak News for events that are unusual or associated with potential increased risks

[^] According to date of disease onset

This week's highlights

(as of December 6, 2014) (Sources: WHO, National Health and Family Planning Commission (NHFPC), Mainland health authorities, CHP and the World Organisation for Animal Health (OIE))

Table 1. Hong Kong: Confirmed human cases of avian influenza A(H5N1) / avian influenza A(H7N9)

	No. of H5N1 cases (No. of deaths)	No. of H7N9 cases (No. of deaths)	Details
In this reporting period	0(0)	0(0)	-

Table 2. Outside Hong Kong: Confirmed human cases of avian influenza A(H5N1)

	Place of occurrence	No. of cases (No. of deaths)	Details
In this reporting period	Egypt	8(5)	Egypt: there were eight new laboratory-confirmed human cases of avian influenza A(H5N1) virus infection. Six cases were reported from Menia governorate, and one each from the neighbouring governorates of Beni Suef and Assiut. The cases were reported in two children who survived, five adults who died and one woman still in critical condition. With the exception of one case, all other cases had exposure to sick and dead poultry in the days before onset of symptoms. (WHO, as of 4 December 2014)

For the cumulative no. of human cases by place, please refer to [WHO/WPRO](http://www.who.int/wpro) website.

Table 3. Outside Hong Kong: Confirmed cases of human infection with avian influenza A(H7N9)

	Place of occurrence	No. of cases (No. of deaths)	Province / Region / Municipality	City / District / Area	Age (years)	Sex	Condition at time of reporting	Date of report
New case	China	3(1)	Fujian Province	-	27	M	Serious	3/12/2014
			Guangdong Province	Meizhou	66	M	Dead	7/12/2014
			Shanghai Municipality	-	38	M		6/12/2014

Table 4. Cumulative number of confirmed cases of human infection with avian influenza A(H7N9) since 2013

Confirmed H7N9 human cases have been reported in the following countries / areas		Cumulative no. of cases (462 cases in total) (as of December 8, 2014)
Mainland China and Hong Kong	Zhejiang Province	139
	Guangdong Province	111
	Jiangsu Province	58
	Shanghai Municipality	42
	Hunan Province	24
	Fujian Province	23
	Anhui Province	17
	Hong Kong [%]	10 ([%] all cases imported from Guangdong Province)
	Jiangxi Province	8
	Shandong Province [†]	5 ([†] 1 case imported from Jiangsu Province)
	Henan Province	4
	Beijing Municipality	5
	Guangxi Province [@]	3 ([@] 1 case imported from Guangdong Province)
	Jilin Province	2
	Hebei Province	1
	Guizhou Province [#]	1 ([#] imported from Zhejiang Province)
	Xinjiang Uygur Autonomous Region	4
Malaysia ^{&}		1 (^{&} imported from Guangdong Province)
Taiwan [*]		4 ([*] 3 cases imported from Jiangsu Province and 1 case had travel history to Beijing and Jiangsu Province)

Table 5. Outside Hong Kong: Confirmed human cases of avian influenza A infections other than avian influenza A(H5N1 / H7N9) reported in the past 6 months

	Place of occurrence	No. of cases (No. of deaths)	Details
In this reporting period	-	-	-
Previously reported cases (in the past 6 months)	China	1(1)	Avian influenza A(H5N6): □ Sichuan Province: A 49-year-old man, reported on 6 May 2014.

Table 6. Hong Kong: Confirmed reports of avian influenza A(H5N1) or avian influenza A(H7N9) in poultry / wild birds since 2013

	No. of reports of H5N1 in poultry / wild birds	No. of reports of H7N9 in poultry / wild birds	Details
In this reporting period	0	0	-
Cumulative since 2013	1 ⁰	1 [#]	-

⁰ For further information, please visit the website of the Agriculture, Fisheries and Conservation Department

[#] Live poultry imported from Mainland tested positive for H7 avian influenza virus

Table 7. Outside Hong Kong: Confirmed avian influenza A(H5) or A(H7N9) in poultry / wild birds reported in this week

Places of occurrence	No. of reports of H5N1	No. of reports of H5	No. of reports of H5N8	Details
Netherlands, Canada, India, Japan	2	1	2	Netherlands: Samples from birds in Overijssel and Zuid-Holland Provinces in Netherlands were tested positive for highly pathogenic avian influenza A (H5N8). (OIE, December 3, 2014) Canada: Samples from birds in British Columbia Province in Canada were tested positive for highly pathogenic avian influenza A(H5). (OIE, December 3, 2014) India: Samples from birds in Kerala State in India were tested positive for highly pathogenic avian influenza A(H5N1). (OIE, December 3 and December 4, 2014) Japan: Samples from poultry in Tottori Prefecture in Japan were tested positive for highly pathogenic avian influenza A(H5N8). (OIE, December 4, 2014)

For cumulative reports of avian influenza A(H5N1) or A(H7N9) in poultry / wild birds, please refer to the [OIE](#) website.

Table 8. Confirmed human cases of avian influenza A(H5N1) reported to WHO since 2003 (by onset date)[§]

	2003	2004	2005	2006	2007	2008	2009	2010	2011	2012	2013	2014	Overall
Cases	4	46	98	115	88	44	73	48	62	32	39	27	676
Deaths	4	32	43	79	59	33	32	24	34	20	25	13	398
Case Fatality Rate	100%	69.6%	43.9%	68.7%	67.0%	75.0%	43.8%	50.0%	54.8%	62.5%	64.1%	48.1%	58.9%

[§] Further breakdown by countries is available at [WHO](#) website

Table 9. Countries / areas with documented avian influenza A H5N1, H7N9 or other highly pathogenic avian influenza cases in the recent 6 months (including infections in birds/humans and relevant environmental samples) (Sources: WHO, OIE, NHFPC and official websites; **Blue color: Avian influenza A(H7N9) affected area (may also include other non-H5N1 highly pathogenic avian influenza A); Red color: Avian influenza A(H7N9) and avian influenza A(H5N1) affected area (may also include other non-H5N1 highly pathogenic avian influenza A)**) * Most recent occurrence in that country / area. (as of December 8, 2014)
Italics: Not listed as an affected area because the case was imported.

Country/ Area	Date of last report	Human cases	Poultry cases/ environmental samples	Wild bird cases
Canada	03/12/2014	N	Y* ⁱ	N

ⁱ On 3 December 2014, OIE reported that poultry samples in Canada were tested positive for highly pathogenic avian influenza A(H5).
ⁱⁱ On 4 December 2014, WHO reported confirmed 8 human cases of avian influenza A(H5N1) in Egypt.
ⁱⁱⁱ On 6 November 2014, highly pathogenic avian influenza A(H5N8) was reported on a poultry farm in Germany.
^{iv} On 25 November 2014, OIE reported that a bird specimen in Germany tested positive for highly pathogenic avian influenza A(H5N8).
^v On 4 December 2014, OIE reported that poultry specimens in India tested positive for highly pathogenic avian influenza A(H5N1).
^{vi} On 27 June 2014, WHO reported a confirmed human case of avian influenza A(H5N1) in Indonesia.
^{vii} On 4 December 2014, specimens from a wild bird in Japan tested positive for highly pathogenic avian influenza A(H5N8).
^{viii} On 3 December 2014, OIE reported that poultry specimens in the Netherlands tested positive for avian influenza A(H5N8).
^{ix} On 24 October 2014, OIE reported that poultry samples in Anhui Province were tested positive for highly pathogenic avian influenza A(H5N6).
^x On 18 October 2014, CHP received notification from NHFPC regarding a human case of avian influenza A(H7N9) in Beijing.
^{xi} On 24 October 2014, OIE reported that poultry samples in Chongqing municipality were tested positive for highly pathogenic avian influenza A(H5N6).
^{xii} On 3 December 2014, CHP is closely monitoring an additional human case of avian influenza A(H7N9) in Fujian Province.
^{xiii} On 24 October 2014, OIE reported that poultry samples in Fujian Province were tested positive for highly pathogenic avian influenza A(H5N6).
^{xiv} On 7 December 2014, CHP was notified by the Health and Family Planning Commission of Guangdong Province of a confirmed human case of avian influenza A(H7N9) in Guangdong Province.
^{xv} On 24 October 2014, OIE reported that poultry samples in Guangdong province were tested positive for highly pathogenic avian influenza A(H5N1).
^{xvi} On 24 October 2014, OIE reported that poultry samples in Guangdong province were tested positive for highly pathogenic avian influenza A(H5N6).
^{xvii} On 24 October 2014, OIE reported that poultry samples in Guangxi Zhuang Autonomous Region were tested positive for highly pathogenic avian influenza A(H5N1).
^{xviii} On 24 October 2014, OIE reported that poultry samples in Guangxi Zhuang Autonomous Region were tested positive for highly pathogenic avian influenza A(H5N2).
^{xix} On 24 October 2014, OIE reported that poultry samples in Guangxi Zhuang Autonomous Region were tested positive for highly pathogenic avian influenza A(H5N6).
^{xx} On 24 October 2014, OIE reported that poultry samples in Guizhou province were tested positive for highly pathogenic avian influenza A(H5N1).
^{xxi} On 24 October 2014, OIE reported that poultry samples in Guizhou province were tested positive for highly pathogenic avian influenza A(H5N6).
^{xxii} On 1 September 2014, highly pathogenic avian influenza A(H5N6) was reported in poultry in Heilongjiang Province, China, by the Ministry of Agriculture in China.
^{xxiii} On 24 October 2014, OIE reported that poultry samples in Heilongjiang province were tested positive for highly pathogenic avian influenza A(H5N2).
^{xxiv} On 24 October 2014, OIE reported that poultry samples in Heilongjiang province were tested positive for highly pathogenic avian influenza A(H5N6).
^{xxv} On 24 October 2014, OIE reported that poultry samples in Hebei province were tested positive for highly pathogenic avian influenza A(H5N6).
^{xxvi} On 9 July 2014, avian influenza A(H7N9) was detected in a market in Henan Province.
^{xxvii} On 24 October 2014, OIE reported that poultry samples in Hubei province were tested positive for highly pathogenic avian influenza A(H5N2).
^{xxviii} On 24 October 2014, OIE reported that poultry samples in Hubei province were tested positive for highly pathogenic avian influenza A(H5N6).
^{xxix} On 7 June 2014, CHP is closely monitoring an additional human case of avian influenza A(H7N9) in Hunan Province according to the latest report of the Mainland health authority.
^{xxx} On 24 October 2014, OIE reported that poultry samples in Hunan province were tested positive for highly pathogenic avian influenza A(H5N1).
^{xxxi} On 24 October 2014, OIE reported that poultry samples in Hunan province were tested positive for highly pathogenic avian influenza A(H5N3).
^{xxxii} On 24 October 2014, CHP is closely monitoring an additional human case of highly pathogenic avian influenza A(H5N6).
^{xxxiii} On 15 November 2014, CHP received notification from NHFPC regarding an additional human case of avian influenza A(H7N9) in Jiangsu Province.
^{xxxiv} On 24 October 2014, OIE reported that poultry samples in Jiangsu province were tested positive for highly pathogenic avian influenza A(H5N1).
^{xxxv} On 24 October 2014, OIE reported that poultry samples in Liaoning province were tested positive for highly pathogenic avian influenza A(H5N8).
^{xxxvi} On 24 October 2014, OIE reported that poultry samples in Ningxia Hui Autonomous Region were tested positive for highly pathogenic avian influenza A(H5N2).
^{xxxvii} On 24 October 2014, OIE reported that poultry samples in Qinghai province were tested positive for highly pathogenic avian influenza A(H5N1).
^{xxxviii} On 4 June 2014, CHP was notified by NHFPC regarding two human cases of avian influenza A(H7N9) in Shandong Province.
^{xxxix} On 6 December 2014, CHP is closely monitoring an additional human case of avian influenza A(H7N9) in Shanghai.
^{xl} On 24 October 2014, OIE reported that poultry samples in Tibet Autonomous Region were tested positive for highly pathogenic avian influenza A(H5N1).
^{xli} On 24 October 2014, OIE reported that poultry samples in Tibet Autonomous Region were tested positive for highly pathogenic avian influenza A(H5N2).
^{xlii} On 24 October 2014, OIE reported that poultry samples in Tibet Autonomous Region were tested positive for highly pathogenic avian influenza A(H5N6).
^{xliii} On 15 November 2014, CHP received notification from NHFPC regarding an additional human case of avian influenza A(H7N9) in Xinjiang Uyghur Autonomous Region.
^{xliv} On 24 October 2014, OIE reported that poultry samples in Yunnan province were tested positive for highly pathogenic avian influenza A(H5N1).
^{xlv} On 24 October 2014, OIE reported that poultry samples in Yunnan province were tested positive for highly pathogenic avian influenza A(H5N6).
^{xlvi} On 23 December 2014, CHP was notified by NHFPC regarding a human case of avian influenza A(H7N9) in Zhejiang Province.
^{xlvii} On 24 October 2014, OIE reported that poultry samples in Zhejiang Province were tested positive for highly pathogenic avian influenza A(H5N6).
^{xlviii} On 25 September 2014, highly pathogenic avian influenza A(H5N8) was reported a poultry farm in the Republic of Korea.
^{xlix} On 30 September 2014, village birds in Russia tested positive for highly pathogenic avian influenza A(H5N1).
^l On 17 November 2014, OIE reported that poultry samples in the United Kingdom tested positive for highly pathogenic avian influenza A(H5N8).
^{li} On 20 September 2014, avian influenza A(H5N6) was reported in poultry in Vietnam.

Table 10. Confirmed human cases of avian influenza A(H5N1) reported to WHO since 2003

Country	Cumulative no. of cases (December 2003 to December 2014)	No. of recent cases (September to December 2014)
Azerbaijan	8	0
Bangladesh	7	0
Cambodia	56	0
Canada	1	0
China	47	0
Djibouti	1	0
Egypt	185	9
Indonesia	197	0
Iraq	3	0
Laos	2	0
Myanmar	1	0
Nigeria	1	0
Pakistan	3	0
Thailand	25	0
Turkey	12	0
Vietnam	127	0
Overall	676	9

Table 11. Details of the recent confirmed human cases of avian influenza A(H5N1) reported to WHO (September to December 2014) (Sources: WHO)

Date of report by WHO	Country	Province / Region	District / City	Sex	Age	Outcome at the time of reporting
2/10/2014	Egypt	Giza	-	F	2.5	-
4/12/2014	Egypt	Menia	-	M	3	-
