

Avian Influenza Report

VOLUME 11, NUMBER 9

Reporting period: February 22, 2015 – February 28, 2015 (Week 9)
(Published on March 3, 2015)

Summary

1. There were no new human cases of avian influenza A(H5N1) reported by the World Health Organization (WHO)[#].
2. From 2010 to 2014, 32 to 62 confirmed human cases of avian influenza A(H5N1) were reported to WHO annually (according to onset date). In 2015 (as of March 2, 2015), 17 cases were reported by WHO and one case was reported by the National Health and Family Planning Commission (NHFPC)[^].
3. Since the previous issue of Avian Influenza Report, seven human cases of avian influenza A(H7N9) were reported by the Health and Family Planning Commission of Guangdong Province (GDHFPC), and four human cases of avian influenza A(H7N9) were reported by the Health and Family Planning Commission of Anhui Province (Anhui HFPC). Since March 2013 (as of March 2, 2015), there were a total of 613 cases reported. The thirteenth imported human case of avian influenza A(H7N9) in Hong Kong reported last week had passed away on March 1, 2015.

[#] Since November 21, 2012, WHO only publishes information on human cases with avian influenza A(H5N1) infection in “Influenza at human - animal interface: Monthly Risk Assessment Summary”. Only cases of human infection with H5N1 involved in events that are unusual or associated with potential increased risks will be reported in Disease Outbreak News.

[^] According to date of disease onset

This week's highlights

(as of March 2, 2015) (Sources: WHO, NHFPC, Mainland health authorities, CHP and World Organisation for Animal Health (OIE))

Table 1. Hong Kong: Confirmed human cases of avian influenza A(H5N1) / avian influenza A(H7N9)

	No. of H5N1 cases (No. of deaths)	No. of H7N9 cases (No. of deaths)	Details
In this reporting period	0(0)	0(0)	-

Table 2. Outside Hong Kong: Confirmed human cases of avian influenza A(H5N1)

	Place of occurrence	No. of cases (No. of deaths)	Details
In this reporting period	-	0(0)	-

For the cumulative no. of human cases by place, please refer to [WHO/WPRO](http://www.who.int/wpro) website.

Table 3. Outside Hong Kong: Confirmed cases of human infection with avian influenza A(H7N9)

	Place of occurrence	No. of cases (No. of deaths)	Province / Region / Municipality	City / District / Area	Age (years)	Sex	Condition at time of reporting	Date of report
New cases	Mainland China	11(0)	Anhui	-	48	M	critical	25/2/2015
			Anhui	-	75	M	critical	25/2/2015

			Anhui	-	58	M	critical	28/2/2015
			Anhui	-	58	F	critical	28/2/2015
			Guangdong	Foshan	36	M	stable	1/3/2015
			Guangdong	Dongguan	45	M	stable	1/3/2015

Table 4. Cumulative number of confirmed cases of human infection with avian influenza A(H7N9) since 2013

Confirmed H7N9 human cases have been reported in the following countries / areas		Cumulative no. of cases (613 cases in total) (as of March 2, 2015)
Mainland China	Guangdong Province	178
	Zhejiang Province	156
	Jiangsu Province	70
	Fujian Province	58
	Shanghai Municipality	45
	Hunan Province	24
	Anhui Province	21
	Xinjiang Uygur Autonomous Region	10
	Jiangxi Province	9
	Shandong Province [†]	6 ([†] 2 cases imported from Jiangsu Province)
	Beijing Municipality	5
	Henan Province	4
	Guangxi Province [@]	3 ([@] 1 case imported from Guangdong Province)
	Jilin Province	2
	Hebei Province	1
	Guizhou Province [‡]	1 ([‡] imported from Zhejiang Province)
Canada ^{\$}		2 (^{\$} recently returned to Canada from Mainland China)
Hong Kong [%]		13 ([%] all cases imported from Guangdong Province)
Malaysia ^{&}		1 (^{&} imported from Guangdong Province)
Taiwan [*]		4 (*3 cases imported from Jiangsu Province and 1 case had travel history to Beijing and Jiangsu Province)

Table 5. Outside Hong Kong: Confirmed human cases of avian influenza A infections other than avian influenza A(H5N1 / H7N9) reported in the past 6 months

	Place of occurrence	No. of cases (No. of deaths)	Details
In this reporting period	-	0(0)	-
Previously reported cases (in the past 6 months)	Mainland China	2(1)	Avian influenza A(H5N6): ▫ Guangdong Province: A 58-year-old man, reported on December 23, 2014ⁱ ▫ Yunnan Province: A 44-year-old man, reported on February 9, 2015ⁱⁱ

Table 6. Hong Kong: Confirmed reports of avian influenza A(H5N1) or avian influenza A(H7N9) in poultry / wild birds since 2014

	No. of reports of H5N1 in poultry / wild birds	No. of reports of H7N9 in poultry / wild birds	Details
In this reporting period	0	0	-
Cumulative since 2014	0	2 [#]	-

[#] The Government confirmed on January 27, 2014 that a number of samples from a batch of live chickens imported from a registered poultry farm in Shunde District of Foshan City in Guangdong were tested positive for H7N9 virus.

The Government found on December 30, 2014 a number of samples from a consignment of live chickens from a registered farm in Huicheng District of Huizhou in Guangdong tested positive for H7N9 virus.

ⁱ CHP notified by GHFPC of a confirmed human case of avian influenza A(H5N6) in Guangdong.

ⁱⁱ CHP notified by NHFPC of a confirmed fatal human case of avian influenza A(H5N6) in Yunnan.

Table 7. Outside Hong Kong: Confirmed avian influenza A(H5) or A(H7N9) in poultry / wild birds reported in this week

Places of occurrence	No. of reports of H5N1	No. of reports of H5N2	No. of reports of H5N3	No. of reports of H5N8	Details
United States, China, Hungary, Vietnam, Taiwan, South Africa, Myanmar, Nigeria	4	3	1	3	United States: Samples from birds in Idaho State, Oregon State and Washington State were tested positive for highly pathogenic avian influenza A(H5N2). (<i>OIE</i>, February 24, 2015) United States: Samples from birds in Washington State and Oregon State were tested positive for highly pathogenic avian influenza A(H5N8). (<i>OIE</i>, February 25, 2015) China: Samples from animals in Guangxi Province were tested positive for highly pathogenic avian influenza A(H5N1). (<i>OIE</i>, February 25, 2015) Hungary: Samples from poultry in Bekes State were tested positive for highly pathogenic avian influenza A(H5N8). (<i>OIE</i>, February 25, 2015) Vietnam: Samples from poultry in Soc Trang Province were tested positive for highly pathogenic avian influenza A(H5N1). (<i>OIE</i>, February 25, 2015) Taiwan: Samples from birds in Pingtung County were tested positive for highly pathogenic avian influenza A(H5N3). (<i>OIE</i>, February 26, 2015) Taiwan: Samples from poultry in Changhua county, Pingtung county, Yunlin county, Chiayi county, Tainan city, Hsinchu county and Kaohsiung city were tested positive for highly pathogenic avian influenza A(H5N2). (<i>OIE</i>, February 26, 2015) Taiwan: Samples from poultry in Nantou county, Yunlin county and Tainan city were tested positive for highly pathogenic avian influenza A(H5N8). (<i>OIE</i>, February 26, 2015) South Africa: Samples from poultry in Western Cape Province were tested positive for low pathogenic avian influenza A(H5N2). (<i>OIE</i>, February 27, 2015) Myanmar: Samples from poultry in Sagaing City were tested positive for highly pathogenic avian influenza A(H5N1). (<i>OIE</i>, February 28, 2015) Nigeria: Samples from poultry in Ogun State were tested positive for highly pathogenic avian influenza A(H5N1). (<i>OIE</i>, March 2, 2015)

For cumulative reports of avian influenza A(H5N1) or A(H7N9) in poultry / wild birds, please refer to the [OIE](#) website.

Table 8. Confirmed human cases of avian influenza A(H5N1) reported to WHO since 2003 (by onset date) [§]

	2003	2004	2005	2006	2007	2008	2009	2010	2011	2012	2013	2014	2015	Overall
Cases	4	46	98	115	88	44	73	48	62	32	39	52	18	719
Deaths	4	32	43	79	59	33	32	24	34	20	25	19	9	413
Case Fatality Rate	100%	69.6%	43.9%	68.7%	67.0%	75.0%	43.8%	50.0%	54.8%	62.5%	64.1%	36.5%	50.0%	57.4%

[§] Further breakdown by countries is available at [WHO](#) website

Table 9. Countries / areas with documented avian influenza A H5N1, H7N9 or other highly pathogenic avian influenza cases in the recent 6 months (including infections in birds/humans and relevant environmental samples) (Sources: WHO, OIE, NHFPC and official websites; **Blue color:** Avian influenza A(H7N9) affected area (may also include other non-H5N1 highly pathogenic avian influenza A); **Red color:** Avian influenza A(H7N9) and avian influenza A(H5N1) affected area (may also include other non-H5N1 highly pathogenic avian influenza A)) * Most recent occurrence in that country / area. (as of March 2, 2015)
Italics: Not listed as an affected area because the case was imported.

Country/ Area	Date of last report	Human cases	Poultry cases/ environmental samples	Wild bird cases/ others
Bulgaria	11/02/2015	N	Y ⁱⁱⁱ	Y* ^{iv}
Canada	06/02/2015	Y ^v	Y* ^{vi}	N
Egypt	26/01/2015	Y* ^{vii}	Endemic	N
Germany	26/01/2015	N	Y* ^{viii}	Y ^{ix}
<i>Hong Kong (not an affected area)</i>	<i>22/02/2015</i>	<i>Y*^x</i>	<i>Y^{xi}</i>	<i>N</i>

- ⁱⁱⁱ On 4 February 2015, OIE reported that poultry specimens in Bulgaria tested positive for highly pathogenic avian influenza A(H5N1).
- ^{iv} On 11 February 2015, OIE reported that a bird specimens in Bulgaria tested positive for highly pathogenic avian influenza A(H5N1).
- ^v On 2 February 2015, the Canadian health authorities reported a second human case of avian influenza A(H7N9). The patient had returned to Canada from Mainland China.
- ^{vi} On 6 February 2015, OIE reported that poultry samples in Canada were tested positive for highly pathogenic avian influenza A(H5N1).
- ^{vii} On 26 January 2015, WHO reported 24 confirmed human cases of avian influenza A(H5N1) in Egypt.
- ^{viii} On 26 January 2015, highly pathogenic avian influenza A(H5N8) was reported in birds in Germany.
- ^{ix} On 9 January 2015, OIE reported that bird specimens in Germany tested positive for highly pathogenic avian influenza A(H5N8).
- ^x On 22 February 2015, CHP confirmed an imported human case of avian influenza A(H7N9) in Hong Kong.
- ^{xi} On 2 January 2015, OIE reported that samples from live chickens imported from Guangdong were tested positive for avian influenza A(H7N9) in Hong Kong.
- ^{xii} On 25 February 2015, OIE reported that poultry specimens in Hungary tested positive for highly pathogenic avian influenza A(H5N1).
- ^{xiii} On 28 January 2015, OIE reported that poultry specimens in India tested positive for highly pathogenic avian influenza A(H5N1).
- ^{xiv} On 27 June 2014, WHO reported a confirmed human case of avian influenza A(H5N1) in Indonesia.
- ^{xv} On 12 February 2015, OIE reported that poultry samples in Israel were tested positive for highly pathogenic avian influenza A(H5N1).
- ^{xvi} On 16 December 2014, specimens from poultry in Italy tested positive for highly pathogenic avian influenza A(H5N8).
- ^{xvii} On 20 January 2015, specimens from poultry in Japan tested positive for highly pathogenic avian influenza A(H5N8).
- ^{xviii} On 20 February 2015, specimen from a wild bird in Japan tested positive for highly pathogenic avian influenza A(H5N8).
- ^{xix} On 3 December 2014, OIE reported that poultry specimens in the Netherlands tested positive for avian influenza A(H5N8).
- ^{xx} On 2 March 2015, OIE reported that poultry specimens in Nigeria tested positive for highly pathogenic avian influenza A(H5N1).
- ^{xxi} On 25 February 2015, CHP is closely monitoring additional human cases of avian influenza A(H7N9) in Anhui Province.
- ^{xxii} On 24 October 2014, OIE reported that poultry samples in Anhui Province were tested positive for highly pathogenic avian influenza A(H5N6).
- ^{xxiii} On 18 October 2014, CHP received notification from NHFPC regarding a human case of avian influenza A(H7N9) in Beijing.
- ^{xxiv} On 24 October 2014, OIE reported that poultry samples in Chongqing municipality were tested positive for highly pathogenic avian influenza A(H5N6).
- ^{xxv} On 4 February 2015, CHP received notification from NHFPC regarding additional human cases of avian influenza A(H7N9) in Fujian Province.
- ^{xxvi} On 24 October 2014, OIE reported that poultry samples in Fujian Province were tested positive for highly pathogenic avian influenza A(H5N6).
- ^{xxvii} On 25 February 2015, CHP received notification from the Health and Family Planning Commission of Guangdong Province regarding an additional confirmed human case of avian influenza A(H7N9) in Guangdong Province.
- ^{xxviii} On 24 October 2014, OIE reported that poultry samples in Guangdong province were tested positive for highly pathogenic avian influenza A(H5N1).
- ^{xxix} On 24 October 2014, OIE reported that poultry samples in Guangdong province were tested positive for highly pathogenic avian influenza A(H5N6).
- ^{xxx} On 24 October 2014, OIE reported that poultry samples in Guangxi Zhuang Autonomous Region were tested positive for highly pathogenic avian influenza A(H5N1).
- ^{xxxi} On 24 October 2014, OIE reported that poultry samples in Guangxi Zhuang Autonomous Region were tested positive for highly pathogenic avian influenza A(H5N2).
- ^{xxxii} On 24 October 2014, OIE reported that poultry samples in Guangxi Zhuang Autonomous Region were tested positive for highly pathogenic avian influenza A(H5N6).
- ^{xxxiii} On 25 February 2015, OIE reported that tigers in a zoo in Guangxi Zhuang Autonomous Region were tested positive for highly pathogenic avian influenza A(H5N1).
- ^{xxxiv} On 24 October 2014, OIE reported that poultry samples in Guizhou province were tested positive for highly pathogenic avian influenza A(H5N1).
- ^{xxxv} On 24 October 2014, OIE reported that poultry samples in Guizhou province were tested positive for highly pathogenic avian influenza A(H5N6).
- ^{xxxvi} On 1 September 2014, highly pathogenic avian influenza A(H5N6) was reported in poultry in Heilongjiang Province, China, by the Ministry of Agriculture in China.
- ^{xxxvii} On 24 October 2014, OIE reported that poultry samples in Heilongjiang province were tested positive for highly pathogenic avian influenza A(H5N2).
- ^{xxxviii} On 24 October 2014, OIE reported that poultry samples in Heilongjiang province were tested positive for highly pathogenic avian influenza A(H5N6).

Country/ Area	Date of last report	Human cases	Poultry cases/ environmental samples	Wild bird cases/ others
Henan	16/01/2015	N	N	Y* ^{xi}
Hubei	24/10/2014	N	Y* ^{xli,xlii}	N
Hunan	06/02/2015	N	Y* ^{xliii}	N

Vietnam	25/02/2014	N	Y* ^{lxxiii}	N

- xxxix On 24 October 2014, OIE reported that poultry samples in Hebei province were tested positive for highly pathogenic avian influenza A(H5N6).
- xi On 16 January 2015, OIE reported that bird specimens in Henan province were tested positive for highly pathogenic avian influenza A(H5N1).
- xli On 24 October 2014, OIE reported that poultry samples in Hubei province were tested positive for highly pathogenic avian influenza A(H5N2).
- xlii On 24 October 2014, OIE reported that poultry samples in Hubei province were tested positive for highly pathogenic avian influenza A(H5N6).
- xliii On 6 February 2015, OIE reported that poultry samples in Hunan province were tested positive for highly pathogenic avian influenza A(H5N6).
- xliv On 4 February 2015, CHP received notification from NHFPC regarding additional human cases of avian influenza A(H7N9) in Jiangsu Province.
- xlv On 28 January 2015, CHP received notification from NHFPC regarding a human case of avian influenza A(H5N1) in Jiangsu Province.
- lxvi On 28 January 2015, OIE reported that poultry samples in Jiangsu province were tested positive for highly pathogenic avian influenza A(H5N2) and A(H5N6).
- lxvii On 17 January 2015, CHP is closely monitoring an additional human case of avian influenza A(H7N9) in Jiangxi.
- lxviii On 9 January 2015, OIE reported that poultry samples in Jiangxi province were tested positive for highly pathogenic avian influenza A(H5N1).
- lxix On 24 October 2014, OIE reported that poultry samples in Liaoning province were tested positive for highly pathogenic avian influenza A(H5N8).
- i On 24 October 2014, OIE reported that poultry samples in Ningxia Hui Autonomous Region were tested positive for highly pathogenic avian influenza A(H5N2).
- ii On 24 October 2014, OIE reported that poultry samples in Qinghai province were tested positive for highly pathogenic avian influenza A(H5N1).
- lii On 17 January 2015, CHP is closely monitoring an additional human case of avian influenza A(H7N9) in Shandong. The case was classified as an imported case from Jiangsu.
- liii On 12 February 2015, CHP is closely monitoring an additional human case of avian influenza A(H7N9) in Shanghai.
- liv On 24 October 2014, OIE reported that poultry samples in Tibet Autonomous Region were tested positive for highly pathogenic avian influenza A(H5N1).
- lv On 24 October 2014, OIE reported that poultry samples in Tibet Autonomous Region were tested positive for highly pathogenic avian influenza A(H5N2).
- lvi On 24 October 2014, OIE reported that poultry samples in Tibet Autonomous Region were tested positive for highly pathogenic avian influenza A(H5N6).
- lvii On 4 February 2015, CHP received notification from NHFPC regarding additional human cases of avian influenza A(H7N9) in Xinjiang Uyghur Autonomous Region.
- lviii On 12 February 2015, WHO reported a confirmed human case of avian influenza A(H5N6) in Yunnan, China.
- lix On 24 October 2014, OIE reported that poultry samples in Yunnan Province were tested positive for highly pathogenic avian influenza A(H5N1).
- lx On 24 October 2014, OIE reported that poultry samples in Yunnan Province were tested positive for highly pathogenic avian influenza A(H5N6).
- lxi On 4 February 2015, CHP was closely monitoring additional human cases of avian influenza A(H7N9) in Zhejiang Province.
- lxii On 24 October 2014, OIE reported that poultry samples in Zhejiang Province were tested positive for highly pathogenic avian influenza A(H5N6).
- lxiii On 28 February 2015, OIE reported that samples from poultry in Myanmar were tested positive for highly pathogenic avian influenza A(H5N1).
- lxiv On 20 February 2015, OIE reported that samples from poultry in the Palestinian Autonomous Territories were tested positive for highly pathogenic avian influenza A(H5N1).
- lxv On 25 September 2014, highly pathogenic avian influenza A(H5N8) was reported a poultry farm in the Republic of Korea.
- lxvi On 30 September 2014, village birds in Russia tested positive for highly pathogenic avian influenza A(H5N1).
- lxvii On 25 December 2014, OIE reported that a bird in Russia tested positive for highly pathogenic avian influenza A(H5N8).
- lxviii On 26 February 2015, OIE reported that highly pathogenic avian influenza A(H5N2), A(H5N3) and A(H5N8) were detected in poultry in Taiwan.
- lixix On 17 February 2015, OIE reported that highly pathogenic avian influenza A(H5N2) and A(H5N3) were detected in birds in Taiwan.
- lxx On 17 November 2014, OIE reported that poultry samples in the United Kingdom tested positive for highly pathogenic avian influenza A(H5N8).
- lxxi On 25 February 2015, OIE reported that poultry samples in the United States tested positive for highly pathogenic avian influenza A(H5N8).
- lxxii On 24 February 2015, OIE reported that wild bird samples in the United States tested positive for highly pathogenic avian influenza A(H5N8).
- lxxiii On 25 February 2015, highly pathogenic avian influenza A(H5N1) was reported in poultry in Vietnam.

Table 10. Confirmed human cases of avian influenza A(H5N1) reported to WHO since 2003

Country	Cumulative no. of cases (December 2003 to March 2015)	No. of recent cases (December 2014 to March 2015)
Azerbaijan	8	0
Bangladesh	7	0
Cambodia	56	0
Canada	1	0
China	48	1
Djibouti	1	0
Egypt	227	42
Indonesia	197	0
Iraq	3	0
Laos	2	0
Myanmar	1	0
Nigeria	1	0
Pakistan	3	0
Thailand	25	0
Turkey	12	0
Vietnam	127	0
Overall	719	43

Table 11. Details of the recent confirmed human cases of avian influenza A(H5N1) reported to WHO (December 2014 to March 2015) (Sources: WHO, NHFPC)

Date of report by WHO	Country	Province / Region	District / City	Sex	Age	Outcome at the time of reporting
6/1/2015	Egypt	Menia	-	M	26	Fatal
