

Avian Influenza Report

VOLUME 11, NUMBER 14

Reporting period: March 29, 2015 – April 4, 2015 (Week 14)
(Published on April 8, 2015)

Summary

1. There were no new human cases of avian influenza A(H5N1) reported by the World Health Organization (WHO)[#]. One new human case of avian influenza A(H5N1) involving a 6-year-old boy from Yunnan Province was reported by the National Health and Family Planning Commission (NHFPC) on April 3, 2015.
2. From 2010 to 2014, 32 to 62 confirmed human cases of avian influenza A(H5N1) were reported to WHO annually (according to onset date). In 2015 (as of April 4), 89 cases were reported by WHO* and four additional cases were reported by NHFPC.
3. Since the previous issue of Avian Influenza Report, there were two new human cases of avian influenza A(H7N9) reported by the Shanghai Municipal Commission of Health and Family Planning. Since March 2013 (as of April 7, 2015), there were a total of 640 cases reported globally.

[#] Since November 21, 2012, WHO only publishes information on human cases with avian influenza A(H5N1) infection in “Influenza at human - animal interface: Monthly Risk Assessment Summary”. Only cases of human infection with H5N1 involved in events that are unusual or associated with potential increased risks will be reported in Disease Outbreak News.

* According to the latest report published on March 3, 2015.

This week's highlights

(as of April 4, 2015) (Sources: WHO, NHFPC, Mainland health authorities, Centre for Health Protection (CHP) and World Organisation for Animal Health (OIE))

Table 1. Hong Kong: Confirmed human cases of avian influenza A(H5N1) / avian influenza A(H7N9)

	No. of H5N1 cases (No. of deaths)	No. of H7N9 cases (No. of deaths)	Details
In this reporting period	0(0)	0(0)	-

Table 2. Outside Hong Kong: Confirmed human cases of avian influenza A(H5N1)

	Place of occurrence	No. of cases (No. of deaths)	Details
In this reporting period	Mainland China	1(0)	Mainland China: A new human case of avian influenza A(H5N1) affecting a boy aged 6 in Yunnan was reported by NHFPC. He developed fever on March 23 and attended a local hospital on March 25. He has currently recovered after treatment. (NHFPC, April 3, 2015)

For the cumulative no. of human cases by place, please refer to [WHO/WPRO](http://www.who.int/wpro) website.

Table 3. Outside Hong Kong: Confirmed cases of human infection with avian influenza A(H7N9)

	Place of occurrence	No. of cases (No. of deaths)	Province / Region / Municipality	City / District / Area	Age (years)	Sex	Condition at time of reporting	Date of report
New cases	Mainland China	2(0)	Shanghai	-	52	M	stable	5/4/2015
			Shanghai	-	37	F	critical	7/4/2015

Geographical distribution of human cases of avian influenza A(H7N9) reported in Guangdong since November 2014

Table 4. Cumulative number of confirmed cases of human infection with avian influenza A(H7N9) since 2013

Confirmed H7N9 human cases have been reported in the following countries / areas		Cumulative no. of cases (640 cases in total) (as of April 7, 2015)
Mainland China	Guangdong Province	181
	Zhejiang Province	167
	Jiangsu Province	73
	Fujian Province	59
	Shanghai Municipality	47
	Hunan Province	26
	Anhui Province	24
	Xinjiang Uygur Autonomous Region	10
	Jiangxi Province	10
	Shandong Province [†]	6 ([†] 2 cases imported from Jiangsu Province)
	Beijing Municipality	5
	Henan Province	4
	Guangxi Province [@]	3 ([@] 1 case imported from Guangdong Province)
	Jilin Province	2
	Guizhou Province [#]	2 ([#] imported from Zhejiang Province)
	Hebei Province	1
Canada ^{\$}		2 (^{\$} recently returned to Canada from Mainland China)
Hong Kong [%]		13 ([%] all cases imported from Guangdong Province)
Malaysia ^{&}		1 (^{&} imported from Guangdong Province)
Taiwan [*]		4 (*3 cases imported from Jiangsu Province and 1 case had travel history to Beijing and Jiangsu Province)

Table 5. Outside Hong Kong: Confirmed human cases of avian influenza A infections other than avian influenza A(H5N1 / H7N9) reported in the past 6 months

	Place of occurrence	No. of cases (No. of deaths)	Details
In this reporting period	-	0(0)	-
Previously reported cases (in the past 6 months)	Mainland China	2(1)	Avian influenza A(H5N6): ▫ Guangdong Province: A 58-year-old man, reported on December 23, 2014ⁱ ▫ Yunnan Province: A 44-year-old man, reported on February 9, 2015ⁱⁱ

Table 6. Hong Kong: Confirmed reports of avian influenza A(H5N1) or avian influenza A(H7N9) in poultry / wild birds since 2014

	No. of reports of H5N1 in poultry / wild birds	No. of reports of H7N9 in poultry / wild birds	Details
In this reporting period	0	0	-
Cumulative since 2014	0	2 [#]	-

[#] The Government confirmed on January 27, 2014 that a number of samples from a batch of live chickens imported from a registered poultry farm in Shunde District of Foshan City in Guangdong were tested positive for H7N9 virus.

The Government found on December 30, 2014 a number of samples from a consignment of live chickens from a registered farm in Huicheng District of Huizhou in Guangdong tested positive for H7N9 virus.

ⁱ CHP notified by GHFPC of a confirmed human case of avian influenza A(H5N6) in Guangdong.

ⁱⁱ CHP notified by NHFPC of a confirmed fatal human case of avian influenza A(H5N6) in Yunnan.

Table 7. Outside Hong Kong: Confirmed avian influenza A(H5) or A(H7N9) in poultry / wild birds reported in this week

Places of occurrence	No. of reports of H5	No. of reports of H5N1	No. of reports of H5N2	No. of reports of H5N6	No. of reports of H5N8	Details
Romania, United States, Burkina Faso, Palestinian Autonomous Territories, Taiwan, Mainland China	1	2	2	1	1	Romania: Samples from birds in Constanta City were tested positive for highly pathogenic avian influenza A(H5N1). (OIE, March 30, 2015) United States of America: Samples from poultry in Minnesota State and Wyoming State were tested positive for highly pathogenic avian influenza A(H5N2). (OIE, March 31, 2015) United States of America: Samples from poultry in California State were tested positive for highly pathogenic avian influenza A(H5N8). (OIE, March 31, 2015) Burkina Faso: Samples from poultry in Sanguie Province and Kadiogo Province were tested positive for highly pathogenic avian influenza A(H5N1). (OIE, April 1, 2015) Palestinian Autonomous Territories: Samples from poultry in Gaza Strip were tested positive for highly pathogenic avian influenza A(H5). (OIE, April 2, 2015) Taiwan: Samples from poultry in Changhua County and Yunlin County were tested positive for highly pathogenic avian influenza A(H5N2). (OIE, April 2, 2015) Mainland China: Samples from poultry in Jiangsu Province were tested positive for highly pathogenic avian influenza A(H5N6). (OIE, April 3, 2015)

For cumulative reports of avian influenza A(H5N1) or A(H7N9) in poultry / wild birds, please refer to the [OIE](#) website.

Table 8. Confirmed human cases of avian influenza A(H5N1) reported to WHO / NHFPC since 2003 (by onset date) [§]

	2003	2004	2005	2006	2007	2008	2009	2010	2011	2012	2013	2014	2015	Overall
Cases	4	46	98	115	88	44	73	48	62	32	39	46	93	788
Deaths	4	32	43	79	59	33	32	24	34	20	25	18	27	430
Case Fatality Rate	100%	69.6%	43.9%	68.7%	67.0%	75.0%	43.8%	50.0%	54.8%	62.5%	64.1%	39.1%	29.0%	54.6%

[§] Further breakdown by countries is available at [WHO](#) website

Table 9. Countries / areas with documented avian influenza A H5N1, H7N9 or other highly pathogenic avian influenza cases in the recent 6 months (including infections in birds/humans and relevant environmental samples) (Sources: WHO, OIE, NHFPC and official websites; **Blue color: Avian influenza A(H7N9) affected area** (may also include other non-H5N1 highly pathogenic avian influenza A); **Red color: Avian influenza A(H7N9) and avian influenza A(H5N1) affected area** (may also include other non-H5N1 highly pathogenic avian influenza A)) * Most recent occurrence in that country / area. (as of April 7, 2015)
Italics: Not listed as an affected area because the case was imported.

Country/ Area	Date of last report	Human cases	Poultry cases/ environmental samples	Wild bird cases/ others
Bulgaria	26/03/2015	N	Y ⁱⁱⁱ	Y ^{*iv}
Burkina Faso	01/04/2015	N	Y ^{*v}	N

- ⁱⁱⁱ On 4 February 2015, OIE reported that poultry specimens in Bulgaria tested positive for highly pathogenic avian influenza A(H5N1).
- ^{iv} On 26 March 2015, OIE reported that a bird specimen in Bulgaria tested positive for highly pathogenic avian influenza A(H5N1).
- ^v On 1 April 2015, OIE reported that a poultry specimen in Burkina Faso tested positive for highly pathogenic avian influenza A(H5N1).
- ^{vi} On 2 February 2015, the Canadian health authorities reported a second human case of avian influenza A(H7N9). The patient had returned to Canada from Mainland China.
- ^{vii} On 6 February 2015, OIE reported that poultry samples in Canada were tested positive for highly pathogenic avian influenza A(H5N1).
- ^{viii} On 3 March 2015, WHO reported additional confirmed human cases of avian influenza A(H5N1) in Egypt.
- ^{ix} On 26 January 2015, highly pathogenic avian influenza A(H5N8) was reported in birds in Germany.
- ^x On 9 January 2015, OIE reported that bird specimens in Germany tested positive for highly pathogenic avian influenza A(H5N8).
- ^{xi} On 22 February 2015, CHP confirmed an imported human case of avian influenza A(H7N9) in Hong Kong.
- ^{xii} On 2 January 2015, OIE reported that samples from live chickens imported from Guangdong were tested positive for avian influenza A(H7N9) in Hong Kong.
- ^{xiii} On 25 February 2015, OIE reported that poultry specimens in Hungary tested positive for highly pathogenic avian influenza A(H5N1).
- ^{xiv} On 18 March 2015, OIE reported that poultry specimens in India tested positive for highly pathogenic avian influenza A(H5N1).
- ^{xv} On 25 March 2015, OIE reported that bird specimens in India tested positive for highly pathogenic avian influenza A(H5N1).
- ^{xvi} On 27 June 2014, WHO reported a confirmed human case of avian influenza A(H5N1) in Indonesia.
- ^{xvii} On 12 February 2015, OIE reported that poultry samples in Israel were tested positive for highly pathogenic avian influenza A(H5N1).
- ^{xviii} On 16 December 2014, specimens from poultry in Italy tested positive for highly pathogenic avian influenza A(H5N8).
- ^{xix} On 20 January 2015, specimens from poultry in Japan tested positive for highly pathogenic avian influenza A(H5N8).
- ^{xx} On 20 February 2015, specimen from a wild bird in Japan tested positive for highly pathogenic avian influenza A(H5N8).
- ^{xxi} On 3 December 2014, OIE reported that poultry specimens in the Netherlands tested positive for avian influenza A(H5N8).
- ^{xxii} On 2 March 2015, OIE reported that poultry specimens in Nigeria tested positive for highly pathogenic avian influenza A(H5N1).
- ^{xxiii} On 6 March 2015, CHP is closely monitoring additional human cases of avian influenza A(H7N9) in Anhui Province.
- ^{xxiv} On 24 October 2014, OIE reported that poultry samples in Anhui Province were tested positive for highly pathogenic avian influenza A(H5N6).
- ^{xxv} On 18 October 2014, CHP received notification from NHFPC regarding a human case of avian influenza A(H7N9) in Beijing.
- ^{xxvi} On 24 October 2014, OIE reported that poultry samples in Chongqing municipality were tested positive for highly pathogenic avian influenza A(H5N6).
- ^{xxvii} On 9 March 2015, CHP received notification from NHFPC regarding additional human cases of avian influenza A(H7N9) in Fujian Province.
- ^{xxviii} On 24 October 2014, OIE reported that poultry samples in Fujian Province were tested positive for highly pathogenic avian influenza A(H5N6).
- ^{xxix} On 7 March 2015, CHP received notification from the Health and Family Planning Commission of Guangdong Province regarding additional confirmed human cases of avian influenza A(H7N9) in Guangdong Province.
- ^{xxx} On 24 October 2014, OIE reported that poultry samples in Guangdong province were tested positive for highly pathogenic avian influenza A(H5N1).
- ^{xxxi} On 24 October 2014, OIE reported that poultry samples in Guangdong province were tested positive for highly pathogenic avian influenza A(H5N6).
- ^{xxxii} On 24 October 2014, OIE reported that poultry samples in Guangxi Zhuang Autonomous Region were tested positive for highly pathogenic avian influenza A(H5N1).
- ^{xxxiii} On 24 October 2014, OIE reported that poultry samples in Guangxi Zhuang Autonomous Region were tested positive for highly pathogenic avian influenza A(H5N2).
- ^{xxxiv} On 24 October 2014, OIE reported that poultry samples in Guangxi Zhuang Autonomous Region were tested positive for highly pathogenic avian influenza A(H5N6).
- ^{xxxv} On 25 February 2015, OIE reported that tigers in a zoo in Guangxi Zhuang Autonomous Region were tested positive for highly pathogenic avian influenza A(H5N1).
- ^{xxxvi} On 9 March 2015, CHP received notification from NHFPC regarding an additional human case of avian influenza A(H7N9) in Guizhou Province.
- ^{xxxvii} On 24 October 2014, OIE reported that poultry samples in Guizhou province were tested positive for highly pathogenic avian influenza A(H5N1).
- ^{xxxviii} On 24 October 2014, OIE reported that poultry samples in Guizhou province were tested positive for highly pathogenic avian influenza A(H5N6).
- ^{xxxix} On 24 October 2014, OIE reported that poultry samples in Heilongjiang province were tested positive for highly pathogenic avian influenza A(H5N2).
- ^{xl} On 24 October 2014, OIE reported that poultry samples in Heilongjiang province were tested positive for highly pathogenic avian influenza A(H5N6).
- ^{xli} On 24 October 2014, OIE reported that poultry samples in Hebei province were tested positive for highly pathogenic avian influenza A(H5N6).
- ^{xlii} On 16 January 2015, OIE reported that bird specimens in Henan province were tested positive for highly pathogenic avian influenza A(H5N1).
- ^{xliii} On 24 October 2014, OIE reported that poultry samples in Hubei province were tested positive for highly pathogenic avian influenza A(H5N2).
- ^{xliv} On 24 October 2014, OIE reported that poultry samples in Hubei province were tested positive for highly pathogenic avian influenza A(H5N6).
- ^{xlv} On 9 March 2015, CHP received notification from NHFPC regarding additional human cases of avian influenza A(H7N9) in Hunan Province.
- ^{xlvi} On 6 February 2015, OIE reported that poultry samples in Hunan province were tested positive for highly pathogenic avian influenza A(H5N6).
- ^{xlvii} On 9 March 2015, CHP received notification from NHFPC regarding additional human cases of avian influenza A(H7N9) in Jiangsu Province.
- ^{xlviii} On 28 January 2015, CHP received notification from NHFPC regarding a human case of avian influenza A(H5N1) in Jiangsu Province.
- ^{xlix} On 3 April 2015, OIE reported that poultry samples in Jiangsu province were tested positive for highly pathogenic avian influenza A(H5N6).
- ^l On 9 March 2015, CHP is closely monitoring an additional human case of avian influenza A(H7N9) in Jiangxi.
- ^{li} On 9 January 2015, OIE reported that poultry samples in Jiangxi province were tested positive for highly pathogenic avian influenza A(H5N1).

Country/ Area	Date of last report	Human cases	Poultry cases/ environmental samples	Wild bird cases/ others
Ningxia Hui Autonomous Region	24/10/2014	N	Y* ^{liii}	N

Vietnam	06/04/2015	N	Y* ^{lxxviii}	N

- ^{lii} On 24 October 2014, OIE reported that poultry samples in Liaoning province were tested positive for highly pathogenic avian influenza A(H5N8).
- ^{liii} On 24 October 2014, OIE reported that poultry samples in Ningxia Hui Autonomous Region were tested positive for highly pathogenic avian influenza A(H5N2).
- ^{liv} On 24 October 2014, OIE reported that poultry samples in Qinghai province were tested positive for highly pathogenic avian influenza A(H5N1).
- ^{lv} On 17 January 2015, CHP is closely monitoring an additional human case of avian influenza A(H7N9) in Shandong. The case was classified as an imported case from Jiangsu.
- ^{lvi} On 12 February 2015, CHP is closely monitoring an additional human case of avian influenza A(H7N9) in Shanghai.
- ^{lvii} On 13 March 2015, CHP is closely monitoring an additional human case of avian influenza A(H5N1) in Sichuan.
- ^{lviii} On 24 October 2014, OIE reported that poultry samples in Tibet Autonomous Region were tested positive for highly pathogenic avian influenza A(H5N1).
- ^{lix} On 24 October 2014, OIE reported that poultry samples in Tibet Autonomous Region were tested positive for highly pathogenic avian influenza A(H5N2).
- ^{lx} On 24 October 2014, OIE reported that poultry samples in Tibet Autonomous Region were tested positive for highly pathogenic avian influenza A(H5N6).
- ^{lxi} On 4 February 2015, CHP received notification from NHFPC regarding additional human cases of avian influenza A(H7N9) in Xinjiang Uygur Autonomous Region.
- ^{lxii} On 3 April 2015, WHO reported a confirmed human case of avian influenza A(H5N1) in Yunnan, China.
- ^{lxiii} On 24 October 2014, OIE reported that poultry samples in Yunnan Province were tested positive for highly pathogenic avian influenza A(H5N1).
- ^{lxiv} On 24 October 2014, OIE reported that poultry samples in Yunnan Province were tested positive for highly pathogenic avian influenza A(H5N6).
- ^{lxv} On 9 March 2015, CHP was closely monitoring additional human cases of avian influenza A(H7N9) in Zhejiang Province.
- ^{lxvi} On 24 October 2014, OIE reported that poultry samples in Zhejiang Province were tested positive for highly pathogenic avian influenza A(H5N6).
- ^{lxvii} On 28 February 2015, OIE reported that samples from poultry in Myanmar were tested positive for highly pathogenic avian influenza A(H5N1).
- ^{lxviii} On 2 April 2015, OIE reported that samples from poultry in the Palestinian Autonomous Territories were tested positive for highly pathogenic avian influenza A(H5).
- ^{lix} On 13 March 2015, highly pathogenic avian influenza A(H5N8) was reported in poultry farms in the Republic of Korea.
- ^{lxx} On 30 March 2015, OIE reported that birds in Romania tested positive for highly pathogenic avian influenza A(H5N1).
- ^{lxxi} On 25 December 2014, OIE reported that a bird in Russia tested positive for highly pathogenic avian influenza A(H5N8).
- ^{lxxii} On 2 April 2015, OIE reported that highly pathogenic avian influenza A(H5N2) was detected in poultry in Taiwan.
- ^{lxxiii} On 17 February 2015, OIE reported that highly pathogenic avian influenza A(H5N2) and A(H5N3) were detected in birds in Taiwan.
- ^{lxxiv} On 20 March 2015, OIE reported that samples from wild birds in Sweden tested positive for highly pathogenic avian influenza A(H5N8).
- ^{lxxv} On 17 November 2014, OIE reported that poultry samples in the United Kingdom tested positive for highly pathogenic avian influenza A(H5N8).
- ^{lxxvi} On 31 March 2015, OIE reported that poultry samples in the United States tested positive for highly pathogenic avian influenza A(H5N2).
- ^{lxxvii} On 31 March 2015, OIE reported that wild bird samples in the United States tested positive for highly pathogenic avian influenza A(H5N8).
- ^{lxxviii} On 6 April 2015, highly pathogenic avian influenza A(H5N6) was reported in poultry in Vietnam.

Table 10. Confirmed human cases of avian influenza A(H5N1) reported to WHO / NHFPC since 2003

Country	Cumulative no. of cases (December 2003 to April 2015)	No. of recent cases (January to April 2015)
Azerbaijan	8	0
Bangladesh	7	0
Cambodia	56	0
Canada	1	0
China	52	5
Djibouti	1	0
Egypt	292	107
Indonesia	197	0
Iraq	3	0
Laos	2	0
Myanmar	1	0
Nigeria	1	0
Pakistan	3	0
Thailand	25	0
Turkey	12	0
Vietnam	127	0
Overall	788	112
