

Avian Influenza Report

VOLUME 11, NUMBER 24

Reporting period: June 7, 2015 – June 13, 2015 (Week 24)
(Published on June 16, 2015)

Summary

1. There were no new human cases of avian influenza A(H5N1) reported by the World Health Organization (WHO).[#]
2. From 2010 to 2014, 32 to 62 confirmed human cases of avian influenza A(H5N1) were reported to WHO annually (according to onset date). In 2015 (as of June 13), 139 cases were reported by WHO* (according to onset date).
3. Since the previous issue of Avian Influenza Report, one new human case of avian influenza A(H7N9) was reported by the Shanghai Municipal Commission of Health and Family Planning while 12 new human cases of avian influenza A(H7N9) with onset of symptoms between April 24 and May 22 from Zhejiang (4), Jiangsu (3), Anhui (3), Beijing (1) and Fujian (1) were reported by the National Health and Family Planning Commission (NHFPC). Since March 2013 (as of June 15, 2015), there were a total of 673 cases reported globally. In the third wave since November 2014 (as of June 15, 2015), 213 cases have been reported in the Mainland.

[#] Since November 21, 2012, WHO only publishes information on human cases with avian influenza A(H5N1) infection in “Influenza at human - animal interface: Monthly Risk Assessment Summary”. Only cases of human infection with H5N1 involved in events that are unusual or associated with potential increased risks will be reported in Disease Outbreak News.

* According to the latest report published in May, 2015.

This week's highlights

(as of June 15, 2015) (Sources: WHO, NHFPC, Mainland health authorities, Centre for Health Protection (CHP) and World Organisation for Animal Health (OIE))

Table 1. Hong Kong: Confirmed human cases of avian influenza A(H5N1) / avian influenza A(H7N9)

	Hubei Province	1	1
Canada		2*	2*
Hong Kong		13*	3*
Malaysia		1*	-
Taiwan		4*	-

* All cases imported from Mainland China

Table 5. Outside Hong Kong: Confirmed human cases of avian influenza A infections other than avian influenza A(H5N1 / H7N9) reported in the past 6 months

	Place of occurrence	No. of cases (No. of deaths)	Details
In this reporting period	-	0(0)	-
Previously reported cases (in the past 6 months)	Mainland China	2(1)	Avian influenza A(H5N6): □ Guangdong Province: A 58-year-old man, reported on December 23, 2014 ⁱ □ Yunnan Province: A 44-year-old man, reported on February 9, 2015 ⁱⁱ

Table 6. Hong Kong: Confirmed reports of avian influenza A(H5) or avian influenza A(H7N9) in poultry / wild birds since 2014

	No. of reports of H5 in poultry / wild birds	No. of reports of H7N9 in poultry / wild birds	Details
In this reporting period	0	0	-
Cumulative since 2014	2 [*]	2 [#]	-

* The Government confirmed on April 9, 2015 that the carcass of a peregrine falcon found at a construction site in Hung Shui Kiu, Yuen Long was tested positive for H5N6 virus.

The Government confirmed that the carcass of an oriental magpie robin found in Sai Kung on April 29, 2015 was tested positive for H5N6 virus.

The Government confirmed on January 27, 2014 that a number of samples from a batch of live chickens imported from a registered poultry farm in Shunde District of Foshan City in Guangdong were tested positive for H7N9 virus.

The Government found on December 30, 2014 a number of samples from a consignment of live chickens from a registered farm in Huicheng District of Huizhou in Guangdong tested positive for H7N9 virus.

ⁱ CHP notified by GHFPC of a confirmed human case of avian influenza A(H5N6) in Guangdong.

ⁱⁱ CHP notified by NHFPC of a confirmed fatal human case of avian influenza A(H5N6) in Yunnan.

Table 7. Outside Hong Kong: Confirmed avian influenza A(H5), A(H7N9) or other highly pathogenic avian influenza in poultry / wild birds reported in this week

Places of occurrence	No. of reports of H5N1	No. of reports of H5N2	Details
United States, Russia, Ghana, Taiwan, Iran	3	2	United States: Samples from poultry in Iowa State, Nebraska State, Minnesota State and South Dakota State were tested positive for highly pathogenic avian influenza A(H5N2). (OIE, June 9, 2015) Russia: Samples from birds in Tyva Republic were tested positive for highly pathogenic avian influenza A(H5N1). (OIE, June 10, 2015) Ghana: Samples from poultry in Greater Accra Region were tested positive for highly pathogenic avian influenza A(H5N1). (OIE, June 10, 2015) Taiwan: Samples from poultry in Yunlin County were tested positive for highly pathogenic avian influenza A(H5N2). (OIE, June 12, 2015) Iran: Samples from poultry in Mazandaran Province were tested positive for highly pathogenic avian influenza A(H5N1). (OIE, June 15, 2015)

For cumulative reports of avian influenza A(H5N1) or A(H7N9) in poultry / wild birds, please refer to the [OIE](#) website.

Table 8. Confirmed human cases of avian influenza A(H5N1) reported to WHO / NHFPC since 2003 (by onset date) [§]

	2003	2004	2005	2006	2007	2008	2009	2010	2011	2012	2013	2014	2015	Overall
Cases	4	46	98	115	88	44	73	48	62	32	39	52	139	840
Deaths	4	32	43	79	59	33	32	24	34	20	25	22	40	447
Case Fatality Rate	100%	69.6%	43.9%	68.7%	67.0%	75.0%	43.8%	50.0%	54.8%	62.5%	64.1%	42.3%	28.8%	53.2%

[§] Further breakdown by countries is available at [WHO](#) website

Table 9. Countries / areas with documented avian influenza A H5N1, H7N9 or other highly pathogenic avian influenza cases in the recent 6 months (including infections in birds/humans and relevant environmental samples) (Sources: WHO, OIE, NHFPC and official websites; **Blue color: Avian influenza A(H7N9) affected area (may also include other non-H5N1 highly pathogenic avian influenza A); Red color: Avian influenza A(H7N9) and avian influenza A(H5N1) affected area (may also include other non-H5N1 highly pathogenic avian influenza A)**) * Most recent occurrence in that country / area. (as of June 15, 2015)
Italics: Not listed as an affected area because the case was imported.

Country/ Area	Date of last report	Human cases	Poultry cases/ environmental samples	Wild bird cases/ others

- ⁱⁱⁱ On 16 April 2015, OIE reported that poultry specimens in Bhutan tested positive for highly pathogenic avian influenza A(H5N1).
- ^{iv} On 4 February 2015, OIE reported that poultry specimens in Bulgaria tested positive for highly pathogenic avian influenza A(H5N1).
- ^v On 26 March 2015, OIE reported that a bird specimen in Bulgaria tested positive for highly pathogenic avian influenza A(H5N1).
- ^{vi} On 9 May 2015, OIE reported that a poultry specimens in Burkina Faso tested positive for highly pathogenic avian influenza A(H5N1).
- ^{vii} On 2 February 2015, the Canadian health authorities reported a second human case of avian influenza A(H7N9). The patient had returned to Canada from Mainland China.
- ^{viii} On 28 April 2015, OIE reported that poultry samples in Canada were tested positive for highly pathogenic avian influenza A(H5N2).
- ^{ix} On 1 May 2015, OIE reported that a bird sample in Canada was tested positive for highly pathogenic avian influenza A(H5N8).
- ^x On 28 May 2015, OIE reported that poultry samples in Cote D'Ivoire were tested positive for highly pathogenic avian influenza A(H5N1).
- ^{xi} On 1 May 2015, WHO reported additional confirmed human cases of avian influenza A(H5N1) in Egypt.
- ^{xii} On 26 January 2015, highly pathogenic avian influenza A(H5N8) was reported in birds in Germany.
- ^{xiii} On 9 January 2015, OIE reported that bird specimens in Germany tested positive for highly pathogenic avian influenza A(H5N8).
- ^{xiv} On 10 June 2015, OIE reported that samples from poultry in Ghana were tested positive for highly pathogenic avian influenza A(H5N1).
- ^{xv} On 22 February 2015, CHP confirmed an imported human case of avian influenza A(H7N9) in Hong Kong.
- ^{xvi} On 2 January 2015, OIE reported that samples from live chickens imported from Guangdong were tested positive for avian influenza A(H7N9) in Hong Kong.
- ^{xvii} On 5 May 2015, the Agriculture, Fisheries and Conservation Department (AFCD) reported that an Oriental magpie robin found in Hong Kong was tested positive for avian influenza A(H5N6).
- ^{xviii} On 25 February 2015, OIE reported that poultry specimens in Hungary tested positive for highly pathogenic avian influenza A(H5N1).
- ^{xix} On 19 May 2015, OIE reported that poultry specimens in India tested positive for highly pathogenic avian influenza A(H5N1).
- ^{xx} On 25 March 2015, OIE reported that bird specimens in India tested positive for highly pathogenic avian influenza A(H5N1).
- ^{xxi} On 31 March 2015, WHO reported new confirmed human cases of avian influenza A(H5N1) in Indonesia.
- ^{xxii} On 15 June 2015, OIE reported poultry samples in Iran were tested positive for highly pathogenic avian influenza A(H5N1).
- ^{xxiii} On 12 May 2015, OIE reported that poultry samples in Israel were tested positive for highly pathogenic avian influenza A(H5N1).
- ^{xxiv} On 16 December 2014, specimens from poultry in Italy tested positive for highly pathogenic avian influenza A(H5N8).
- ^{xxv} On 20 January 2015, specimens from poultry in Japan tested positive for highly pathogenic avian influenza A(H5N8).
- ^{xxvi} On 20 February 2015, specimen from a wild bird in Japan tested positive for highly pathogenic avian influenza A(H5N8).
- ^{xxvii} On 22 May 2015, OIE reported that bird specimens in Kazakhstan tested positive for highly pathogenic avian influenza A(H5).
- ^{xxviii} On 12 June 2015, CHP received notification from NHFPC regarding additional human cases of avian influenza A(H7N9) in Anhui Province.
- ^{xxix} On 12 June 2015, CHP received notification from NHFPC regarding additional human cases of avian influenza A(H7N9) in Beijing.
- ^{xxx} On 12 June 2015, CHP received notification from NHFPC regarding additional human cases of avian influenza A(H7N9) in Fujian Province.
- ^{xxxi} On 7 March 2015, CHP received notification from the Health and Family Planning Commission of Guangdong Province regarding additional confirmed human cases of avian influenza A(H7N9) in Guangdong Province.
- ^{xxxii} On 25 February 2015, OIE reported that tigers in a zoo in Guangxi Zhuang Autonomous Region were tested positive for highly pathogenic avian influenza A(H5N1).
- ^{xxxiii} On 9 March 2015, CHP received notification from NHFPC regarding an additional human case of avian influenza A(H7N9) in Guizhou Province.
- ^{xxxiv} On 16 January 2015, OIE reported that bird specimens in Henan province were tested positive for highly pathogenic avian influenza A(H5N1).
- ^{xxxv} On 26 April 2015, one new human case of avian influenza A(H7N9) was reported by the Health and Family Planning Commission of Hubei Province.
- ^{xxxvi} On 9 March 2015, CHP received notification from NHFPC regarding additional human cases of avian influenza A(H7N9) in Hunan Province.
- ^{xxxvii} On 6 February 2015, OIE reported that poultry samples in Hunan province were tested positive for highly pathogenic avian influenza A(H5N6).
- ^{xxxviii} On 12 June 2015, CHP received notification from NHFPC regarding additional human cases of avian influenza A(H7N9) in Jiangsu Province.
- ^{xxxix} On 28 January 2015, CHP received notification from NHFPC regarding a human case of avian influenza A(H5N1) in Jiangsu Province.
- ^{xl} On 3 April 2015, OIE reported that poultry samples in Jiangsu province were tested positive for highly pathogenic avian influenza A(H5N6).
- ^{xli} On 2 May 2015, CHP is closely monitoring an additional human case of avian influenza A(H7N9) in Jiangxi.
- ^{xlii} On 9 January 2015, OIE reported that poultry samples in Jiangxi province were tested positive for highly pathogenic avian influenza A(H5N1).
- ^{xliii} On 10 April 2015, CHP is closely monitoring an additional human case of avian influenza A(H7N9) in Shandong.
- ^{xliv} On 11 June 2015, CHP is closely monitoring an additional human case of avian influenza A(H7N9) in Shanghai.
- ^{xlv} On 13 March 2015, CHP is closely monitoring an additional human case of avian influenza A(H5N1) in Sichuan.
- ^{xlvi} On 4 February 2015, CHP received notification from NHFPC regarding additional human cases of avian influenza A(H7N9) in Xinjiang Uyghur Autonomous Region.

Country/ Area	Date of last report	Human cases	Poultry cases/ environmental samples	Wild bird cases/ others

Russia	10/06/2015	N	N	Y* ^{lvii}
Sweden	20/03/2015	N	N	Y* ^{lviii}
Taiwan	12/06/2015	N	Y* ^{lix}	Y ^{lx}
Turkey	18/05/2015	N	Y* ^{lxi}	N
United States	09/06/2015	N	Y* ^{lxii}	Y* ^{lxiii}
Vietnam	03/06/2015	N	Y ^{lxiv}	Y* ^{lxv}

^{xlvii} On 3 April 2015, WHO reported a confirmed human case of avian influenza A(H5N1) in Yunnan, China.

^{xlviii} On 12 June 2015, CHP received notification from NHFPC regarding additional human cases of avian influenza A(H7N9) in Zhejiang Province.

^{xlx} On 8 April 2015, OIE reported that poultry samples in Mexico were tested positive for highly pathogenic avian influenza A(H7N3).

ⁱ On 15 May 2015, OIE reported that samples from poultry in Myanmar were tested positive for highly pathogenic avian influenza A(H5N1).

ⁱⁱ On 3 December 2014, OIE reported that poultry specimens in the Netherlands were tested positive for avian influenza A(H5N8).

ⁱⁱⁱ On 21 April 2015, OIE reported that poultry specimens in Niger were tested positive for highly pathogenic avian influenza A(H5N1).

^{liii} On 13 May 2015, OIE reported that poultry specimens in Nigeria tested positive for highly pathogenic avian influenza A(H5N1).

^{liv} On 13 April 2015, OIE reported that samples from poultry in the Palestinian Autonomous Territories were tested positive for highly pathogenic avian influenza A(H5).

^{lv} On 13 March 2015, highly pathogenic avian influenza A(H5N8) was reported in poultry farms in the Republic of Korea.

^{lvi} On 30 March 2015, OIE reported that birds in Romania tested positive for highly pathogenic avian influenza A(H5N1).

^{lvii} On 10 June 2015, OIE reported that wild birds in Russia tested positive for highly pathogenic avian influenza A(H5N1).

^{lviii} On 20 March 2015, OIE reported that samples from wild birds in Sweden tested positive for highly pathogenic avian influenza A(H5N8).

^{lix} On 12 June 2015, OIE reported that highly pathogenic avian influenza A(H5N2) was detected in poultry in Taiwan.

^{lx} On 17 February 2015, OIE reported that highly pathogenic avian influenza A(H5N2) and A(H5N3) were detected in birds in Taiwan.

^{lxi} On 18 May 2015, OIE reported that poultry samples in Turkey tested positive for highly pathogenic avian influenza A(H5N1).

^{lxii} On 9 June 2015, OIE reported that poultry samples in the United States tested positive for highly pathogenic avian influenza A(H5N2).

^{lxiii} On 21 May 2015, OIE reported that wild bird samples in the United States were tested positive for highly pathogenic avian influenza A(H5N8).

^{lxiv} On 22 May 2015, OIE reported that poultry samples in Vietnam were tested positive for highly pathogenic avian influenza A(H5N1).

^{lxv} On 3 June 2015, OIE reported that samples in birds in Vietnam were tested positive for highly pathogenic avian influenza A(H5N6).

Table 10. Confirmed human cases of avian influenza A(H5N1) reported to WHO / NHFPC since 2003 (by date of reporting)

Country	Cumulative no. of cases (December 2003 to June 2015)	No. of recent cases[^] (March to June 2015)
Azerbaijan	8	0
Bangladesh	7	0
Cambodia	56	0
Canada	1	0
China	52	4
Djibouti	1	0
Egypt	342	115
Indonesia	199	2
Iraq	3	0
Laos	2	0
Myanmar	1	0
Nigeria	1	0
Pakistan	3	0
Thailand	25	0
Turkey	12	0
Vietnam	127	0
Overall	840	121

[^] Details of recent cases (March to June 2015) are listed in *Table 11*.
