

Avian Influenza Report

VOLUME 11, NUMBER 48

Reporting period: November 22, 2015 – November 28, 2015 (Week 48)

(Published on December 1, 2015)

Summary

1. There were no new human cases of avian influenza A(H5N1) reported by the World Health Organization (WHO).[#]
2. From 2010 to 2014, 32 to 62 confirmed human cases of avian influenza A(H5N1) were reported to WHO annually (according to onset date). In 2015 (as of November 28), 143 cases were reported by WHO* (according to onset date).
3. Since the previous issue of Avian Influenza Report, one human case of avian influenza A(H7N9) in Guangdong was reported by the Emergency Management Office of the People's Government of Guangdong Province. Since March 2013 (as of November 28, 2015), there were a total of 682 cases reported globally. Since October 2015 (as of November 28), five human cases of avian influenza A(H7N9) have been recorded in the Mainland China.

[#] Since November 21, 2012, WHO only publishes information on human cases with avian influenza A(H5N1) infection in "[Influenza at human - animal interface: Monthly Risk Assessment Summary](#)". Only cases of human infection with H5N1 involved in events that are unusual or associated with potential increased risks will be reported in Disease Outbreak News.

* According to the latest [report](#) published in November, 2015

This week's highlights

(as of November 28, 2015) (Sources: WHO, NHFPC, Mainland health authorities, Centre for Health Protection (CHP) and World Organisation for Animal Health (OIE))

Table 1. Hong Kong: Confirmed human cases of avian influenza A(H5N1) / avian influenza A(H7N9)

	No. of H5N1 cases (No. of deaths)	No. of H7N9 cases (No. of deaths)	Details
In this reporting period	0(0)	0(0)	-

Table 2. Outside Hong Kong: Confirmed human cases of avian influenza A(H5N1)

	Place of occurrence	No. of cases (No. of deaths)	Details
In this reporting period	-	0(0)	-

For the cumulative no. of human cases by place, please refer to [WHO/WPRO](http://www.who.int/wpro) website.

Table 3. Outside Hong Kong: Confirmed cases of human infection with avian influenza A(H7N9)

	Place of occurrence	No. of cases (No. of deaths)	Province / Region / Municipality	City / District / Area	Age (years)	Sex	Condition at time of reporting	Date of report
New case	Mainland China	1(0)	Guangdong	Meizhou	74	M	Critical	24/11/2015

Table 4. Cumulative numbers of confirmed cases of human infection with avian influenza A(H7N9) since 2013 and since October 2015 respectively

Confirmed H7N9 human cases have been reported in the following countries / areas		Cumulative no. of cases since 2013 (682 cases in total) (as of November 28, 2015)	Cumulative no. of cases since October 2015 (5 cases in total) (as of November 28, 2015)
Mainland China	Zhejiang Province	188	4
	Guangdong Province	182	1
	Jiangsu Province	78	-
	Fujian Province	63	-
	Shanghai Municipality	48	-
	Anhui Province	30	-
	Hunan Province	26	-
	Jiangxi Province	11	-
	Xinjiang Uygur Autonomous Region	10	-
	Shandong Province	7	-
	Beijing Municipality	6	-
	Henan Province	4	-
	Guangxi Province	3	-
	Jilin Province	2	-
	Guizhou Province	2	-
	Hebei Province	1	-
	Hubei Province	1	-
Canada		2*	-
Hong Kong		13*	-
Malaysia		1*	-
Taiwan		4*	-

* All cases imported from Mainland China

Table 5. Outside Hong Kong: Confirmed human cases of avian influenza A infections other than avian influenza A(H5N1 / H7N9) reported in the past 6 months

	Place of occurrence	No. of cases (No. of deaths)	Details
In this reporting period	-	0(0)	
Previously reported cases (in the past 6 months)	Mainland China	1(1)	Avian influenza A(H5N6): ▫ Yunnan Province: A 37-year-old woman reported on July 11, 2015 ⁱ
	Egypt	2(0)	Avian influenza A(H9N2): ▫ Cairo governorate: A seven-year-old girl and a nine-month-old baby girl reported on June 23, 2015 ⁱⁱ
	Bangladesh	1(0)	Avian influenza A(H9N2): ▫ Bangladesh: A 3.5-year-old girl reported on September 4, 2015 ⁱⁱⁱ

ⁱ Press release of Department of Health (Date: 11 July 2015)

ⁱⁱ The WHO reported two confirmed human cases of avian influenza A(H9N2) in Egypt in the Monthly Risk Assessment Summary in June.

ⁱⁱⁱ The WHO reported one confirmed human case of avian influenza A(H9N2) in Bangladesh in the Monthly Risk Assessment Summary in September.

Table 6. Hong Kong: Confirmed reports of avian influenza A(H5) or avian influenza A(H7N9) in poultry / wild birds since 2014

	No. of reports of H5 in poultry / wild birds	No. of reports of H7N9 in poultry / wild birds	Details
In this reporting period	0	0	-
Previously reported cases since 2014	3 [*]	2 [#]	-

* The Government confirmed on April 9, 2015 that the carcass of a peregrine falcon found at a construction site in Hung Shui Kiu, Yuen Long was tested positive for H5N6 virus.

The Government confirmed that the carcass of an oriental magpie robin found in Sai Kung on April 29, 2015 was tested positive for H5N6 virus.

The Government confirmed that the carcass of an oriental magpie robin found in Kwai Chung on November 17, 2015 was tested positive for H5N6 virus.

The Government confirmed on January 27, 2014 that a number of samples from a batch of live chickens imported from a registered poultry farm in Shunde District of Foshan City in Guangdong were tested positive for H7N9 virus.

The Government found on December 30, 2014 a number of samples from a consignment of live chickens from a registered farm in Huicheng District of Huizhou in Guangdong tested positive for H7N9 virus.

Table 7. Outside Hong Kong: Confirmed avian influenza A(H5), A(H7N9) or other highly pathogenic avian influenza in poultry / wild birds reported in this week

Places of occurrence	No. of reports of H5N1	No. of reports of H5N6	Details
Ghana, Nigeria, France, Vietnam	5	2	Ghana: Samples from poultry in Greater Accra Region were tested positive for highly pathogenic avian influenza A(H5N1). (<i>OIE</i>, November 23, 2015) Nigeria: Samples from poultry in Lagos State were tested positive for highly pathogenic avian influenza A(H5N1). (<i>OIE</i>, November 24, 2015) France: Samples from poultry in Dordogne Province were tested positive for highly pathogenic avian influenza A(H5N1). (<i>OIE</i>, November 24, 2015) Vietnam: Samples from poultry in Ha Tinh Province and Nghe An Province were tested positive for highly pathogenic avian influenza A(H5N1). (<i>OIE</i>, November 25 and 27, 2015) Vietnam: Samples from poultry in Lai Chau Province and Nghe An Province were tested positive for highly pathogenic avian influenza A(H5N6). (<i>OIE</i>, November 28 and 30, 2015)

For cumulative reports of avian influenza A(H5N1) or A(H7N9) in poultry / wild birds, please refer to the [OIE](#) website.

Table 8. Confirmed human cases of avian influenza A(H5N1) reported to WHO / NHFPC since 2003 (by onset date) [§]

	2003	2004	2005	2006	2007	2008	2009	2010	2011	2012	2013	2014	2015	Overall
Cases	4	46	98	115	88	44	73	48	62	32	39	52	143	844
Deaths	4	32	43	79	59	33	32	24	34	20	25	22	42	449
Case Fatality Rate	100%	69.6%	43.9%	68.7%	67.0%	75.0%	43.8%	50.0%	54.8%	62.5%	64.1%	42.3%	29.4%	53.2%

[§] Further breakdown by countries is available at [WHO](#) website

Table 9. Countries / areas with documented avian influenza A H5, H7N9 or other highly pathogenic avian influenza cases in the recent 6 months (including infections in humans/birds and relevant environmental samples) (as of November 30, 2015)

Country/ Area	Human cases		Poultry cases / environmental samples		Wild bird cases / others
