Dear Doctor,

Revised version of HIV/AIDS Report Form

I would like to draw your attention to the use of a revised version of HIV/AIDS report form to report patients with HIV/AIDS and to update status of the previously reported cases.

An anonymous and confidential HIV/AIDS reporting system in Hong Kong has been established since 1984. The data collected is used for understanding the latest HIV epidemiology in Hong Kong, where analyzed data are released on a quarterly basis and a yearly HIV surveillance report is also produced. The relevant reports are accessible via our Virtual AIDS Office website (http://www.info.gov.hk/aids/english/surveillance/off_surreport.htm).

The revised version of the HIV/AIDS Report Form (*DH 2293*) captures one additional data field, which is “the date of last negative HIV test”, so as to know better the epidemiological trend of recent infections for guiding preventive action.

All doctors are encouraged to report patients with HIV/AIDS using the revised HIV/AIDS Report Form downloadable at our Virtual AIDS Office website (<http://www.info.gov.hk/aids/english/surveillance/form.htm>). Should you have any query, please feel free to contact Dr. Kenneth CHAN at 3143 7225. We look forward to your support.

Yours sincerely,

Dr WONG Ka-hing
