1 December 2011

Dear Doctors,

**Invitation to Participate in a Web-Based Survey
on Use of Antibiotics among Medical Doctors in Hong Kong**

Antimicrobial resistance is an emerging problem which is recognized worldwide as a major threat to public health. This year, the Centre for Health Protection (CHP) has been promoting safe use of antibiotics through a territory-wide publicity campaign.

CHP has commissioned Cimigo Limited to conduct a web-based survey on use of antibiotics among medical doctors in Hong Kong, with an aim to understand the antibiotics prescribing behaviour of our medical profession and their opinions on our publicity campaign. Your response will help formulate our future intervention strategies and evaluate our promotion programmes.

The survey is going to be conducted from 5 December 2011 to 4 March 2012. We would like to appeal for your support by completing the questionnaire at www.cimigo.com/chp_commissioned_survey. A 4-digit password **4633** is required to access the survey. The questionnaire will take no more than 10 minutes to complete. Should you have any enquiries, please contact Ms Cindy Hong, at 3199 2599.

Your participation is crucial to our success in promoting safe use of antibiotics. Enclosed please find magnets featuring the five moments of hand hygiene as a token of our appreciation.

Yours sincerely,
