

慎防野生菇類中毒

Beware of Wild Mushroom Poisoning

本港的絕大部分野菇
都是**不可食用**或**有毒**的
Vast majority of wild mushrooms
in Hong Kong are **inedible**
or **poisonous**

大部分菇類毒素
不能以烹煮的方法消除
Most mushroom toxins
cannot be removed
by cooking

單憑顏色或外形
不能分辨野菇是否有毒
Cannot tell if wild mushrooms
are poisonous by colour
or shape alone

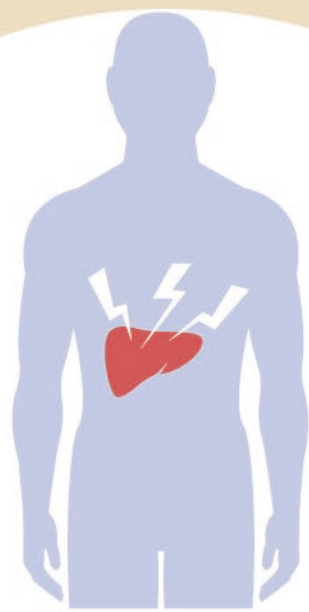

如懷疑菇類中毒，
應立即求診
Seek medical advice immediately
if mushroom poisoning is
suspected

任何情況下，
切勿採摘野菇進食
Do NOT pick wild mushrooms
for consumption in any
circumstance

菇類中毒可引致
腹痛、嘔吐和腹瀉
Mushroom poisoning may lead
to abdominal pain, vomiting
and diarrhoea

嚴重的個案可能導致
肝衰竭甚至死亡
Severe cases may result in
liver failure and even
death
