

Avian Influenza Report

Avian Influenza Report is a weekly report produced by the Surveillance Division of the Communicable Disease Branch of the Centre for Health Protection. This report highlights global avian influenza activity in humans and birds.

VOLUME 17, NUMBER 06

Reporting period: Jan 31, 2021 – Feb 6, 2021 (Week 06)

(Published on Feb 9, 2021)

Summary

1. Since the previous issue of Avian Influenza Report (AIR), there were no new human cases of avian influenza A(H7N9). Since March 2013 (as of Feb 6, 2021), there were a total of 1568 human cases of avian influenza A(H7N9) reported globally (all were reported in the past seven waves between 2013 and September 2019). The latest case was reported on April 5, 2019.
2. Since the previous issue of AIR, two confirmed human cases of avian influenza A(H5N6) from Anhui Province and Guizhou Province were reported by the National Health Commission (NHC). Since 2014 (as of Feb 6, 2021), there were 29 human cases of avian influenza A(H5N6) reported globally and all occurred in Mainland China. The latest case was reported on February 4, 2021.
3. Since the previous issue of AIR, there were no new human cases of avian influenza A(H5N1). From 2011 to 2020, 0 to 145 confirmed human cases of avian influenza A(H5N1) were reported to WHO annually (according to onset date).* The latest case was reported on November 6, 2020.

* Since November 21, 2012, WHO only publishes information on human cases with avian influenza A(H5N1) infection in "[Influenza at human - animal interface: Monthly Risk Assessment Summary](#)". Only cases of human infection with H5N1 involved in events that are unusual or associated with potential increased risks will be reported in Disease Outbreak News. The latest [report](#) was published in December, 2020.

[An oropharyngeal swab from a batch of chilled chicken taken at a fresh provision shop in Mong Kok, reported on 23 January, 2018 \(H5N6\)](#)
[A black-headed gull carcass found in Ngau Hom Tsuen, Lau Fau Shan on February 8, 2018 \(H5N6\)](#)
[A dead crested myna found at Kun Lung Wai, Fanling reported on April 9, 2018 \(H5N6\)](#)
[A swab sample taken from a bird cage housing a hill myna at a pet bird shop in Yuen Po Street Bird Garden in Mong Kok on 7 April, 2018 \(H5N6\)](#)
[Samples of faecal droppings collected at Mai Po Nature Reserve reported on January 14, 2021 \(H5N8\)](#)
[Carcass of a peregrine falcon found in Wu Kai Sha reported on February 1, 2021 \(H5N8\)](#)
[A sample of faecal droppings of live poultry taken from a poultry stall in Yan Oi Market in Tuen Mun was tested positive for H7N9 virus on June 5, 2016.](#)

Table 9. Outside Hong Kong: Confirmed avian influenza A(H5) or other highly pathogenic avian influenza in poultry / wild birds / environmental samples reported in this week – number of reports for various subtypes of virus

Subtype of virus	No. of reports
H5N1	3
H5N3	2
H5N4	1
H5N5	1
H5N8	25

Table 10. Outside Hong Kong: Confirmed avian influenza A(H5) or other highly pathogenic avian influenza in poultry / wild birds / environmental samples reported in this week – details of reports

Places of occurrence	Details	OIE Report Date
Iran	Samples from poultry in Kermanshah, South Khorasan Tehran, West Azarbayejan and Khuzestan were tested positive for highly pathogenic avian influenza A(H5N8).	January 31, 2021 February 3, 2021
Nigeria	Samples from poultry in Kano were tested positive for highly pathogenic avian influenza A(H5N1).	January 31, 2021
Senegal	Samples from birds in Saint Louis were tested positive for highly pathogenic avian influenza A(H5N1).	February 1, 2021
South Africa	Samples from poultry in Western Cape Province were tested positive for highly pathogenic avian influenza A(H5N8).	February 1, 2021
China	Samples from birds in Beijing Municipality and Jiangsu Province were tested positive for highly pathogenic avian influenza A(H5N8).	February 2, 2021 February 8, 2021

France	Samples from poultry in Landes, Hautes-Pyrénées, Pyrénées-Atlantiques and Gers were tested positive for highly pathogenic avian influenza A(H5N8).	February 2, 2021 February 3, 2021
	Samples from poultry and birds in Ardennes were tested positive for highly pathogenic avian influenza A(H5N8).	February 2, 2021 February 8, 2021
	Samples from poultry in Pyrénées-Atlantiques were tested positive for low pathogenic avian influenza A(H5N3).	February 3, 2021
Mauritania	Samples from birds in Keur Massene were tested positive for highly pathogenic avian influenza A(H5N1).	February 2, 2021
Romania	Samples from birds in Constanta were tested positive for highly pathogenic avian influenza A(H5N5).	February 2, 2021
Germany	Samples from poultry in Brandenburg were tested positive for highly pathogenic avian influenza A(H5N8).	February 3, 2021
	Samples from birds in Schleswig-Holstein were tested positive for highly pathogenic avian influenza A(H5N3) and A(H5N8).	February 4, 2021 February 5, 2021
	Samples from birds in Berlin and Mecklenburg-Vorpommern were tested positive for highly pathogenic avian influenza A(H5N8).	February 5, 2021
Japan	Samples from birds in Hokkaido, Kagoshima and Miyazaki were tested positive for highly pathogenic avian influenza A(H5N8).	February 3, 2021
Poland	Samples from poultry and birds in Warminsko-Mazurskie and Wielkopolskie were tested positive for highly pathogenic avian influenza A(H5N8).	February 3, 2021
	Samples from poultry in Kujawsko-Pomorskie and Lodzkie were tested positive for highly pathogenic avian influenza A(H5N8).	February 3, 2021
Ukraine	Samples from poultry in Donetsk were tested positive for highly pathogenic avian influenza A(H5N8).	February 4, 2021
Austria	Samples from birds in Niederosterreich were tested positive for highly pathogenic avian influenza A(H5N8).	February 5, 2021
Finland	Samples from birds in Etelä-Suomi were tested positive for highly pathogenic avian influenza A(H5N8).	February 5, 2021

Norway	Samples from birds in Hordaland were tested positive for highly pathogenic avian influenza A(H5N8).	February 5, 2021
Russia	Samples from poultry in Rostovskaya Oblast were tested positive for highly pathogenic avian influenza A(H5N8).	February 5, 2021
Spain	Samples from birds in Castilla Y Leon were tested positive for highly pathogenic avian influenza A(H5N8).	February 5, 2021
Switzerland	Samples from birds in Schaffhausen were tested positive for highly pathogenic avian influenza A(H5N4).	February 5, 2021
Czech Republic	Samples from birds in Jihoceský were tested positive for highly pathogenic avian influenza A(H5N8).	February 6, 2021
Algeria	Samples from poultry in Oum El Bouaghi were tested positive for highly pathogenic avian influenza A(H5N8).	February 8, 2021
Hungary	Samples from poultry in Bacs-Kiskun were tested positive for highly pathogenic avian influenza A(H5N8).	February 8, 2021

For cumulative reports of avian influenza A(H5) or other highly pathogenic avian influenza in poultry / wild birds, please refer to the [OIE](#) website.
