

# *Avian Influenza Report*

*Avian Influenza Report* is a weekly report produced by the Surveillance Division of the Communicable Disease Branch of the Centre for Health Protection. This report highlights global avian influenza activity in humans and birds.

**VOLUME 17, NUMBER 25**

Reporting period: June 13, 2021 – June 19, 2021 (Week 25)

(Published on June 22, 2021)

## **Summary**

1. Since the previous issue of Avian Influenza Report (AIR), there were no new human cases of avian influenza A(H7N9). Since March 2013 (as of June 19, 2021), there were a total of 1568 human cases of avian influenza A(H7N9) reported globally (all were reported in the past seven waves between 2013 and September 2019). The latest case was reported on April 5, 2019.
2. Since the previous issue of AIR, there were no new human cases of avian influenza A(H5N6). Since 2014 (as of June 19, 2021), there were 32 human cases of avian influenza A(H5N6) reported globally and 31 of them occurred in Mainland China. The latest case was reported on June 8, 2021.
3. Since the previous issue of AIR, there were no new human cases of avian influenza A(H5N1). From 2011 to 2020, 0 to 145 confirmed human cases of avian influenza A(H5N1) were reported to WHO annually (according to onset date).\* The latest case was reported on November 6, 2020.

\* Since November 21, 2012, WHO only publishes information on human cases with avian influenza A(H5N1) infection in “[Influenza at human - animal interface: Monthly Risk Assessment Summary](#)”. Only cases of human infection with H5N1 involved in events that are unusual or associated with potential increased risks will be reported in Disease Outbreak News. The latest [report](#) was published in May, 2021.

**Table 10. Outside Hong Kong: Confirmed avian influenza A(H5) or other highly pathogenic avian influenza in poultry / wild birds / environmental samples reported in this week – details of reports**

Places of occurrence	Details	OIE Report Date
Albania	Samples from poultry in Kukës, Tiranë and Durrës were tested positive for highly pathogenic avian influenza A(H5N8).	June 15, 2021
Mainland China	Samples from birds in Shaanxi were tested positive for highly pathogenic avian influenza A(H5N8).	June 15, 2021
Italy	Samples from birds in Veneto were tested positive for highly pathogenic avian influenza A(H5N1) and A(H5N8).	June 15, 2021
	Samples from birds in Friuli-Venezia Giulia were tested positive for highly pathogenic avian influenza A(H5N1).	June 15, 2021
	Samples from birds in Italian Exclusive Economic Zone were tested positive for highly pathogenic avian influenza A(H5N8).	June 15, 2021
Lithuania	Samples from birds in Vilniaus, Kauno, Klaipėdos, Panevėžio, Alytaus, Šiauliai, Tauragės, Marijampolės and Utenos were tested positive for highly pathogenic avian influenza A(H5N8).	June 15, 2021

Czech Republic	Samples from birds in Ústecký, Plzeňský, Liberecký, Jihočeský, Olomoucký, Středočeský, Prague, Zlínský and Moravskoslezský were tested positive for highly pathogenic avian influenza A(H5N8).	June 16, 2021
	Samples from poultry in Kraj Vysočina, Plzeňský, Středočeský, Královéhradecký, Moravskoslezský, Jihočeský, Pardubický, Ústecký and Zlínský were tested positive for highly pathogenic avian influenza A(H5N8).	June 18, 2021
Finland	Samples from birds in Eastern Finland and Southern Finland were tested positive for highly pathogenic avian influenza A(H5N1) and A(H5N8).	June 16, 2021
	Samples from birds in Finnish Exclusive Economic Zone and Western Finland were tested positive for highly pathogenic avian influenza A(H5N8).	June 16, 2021
France	Samples from birds in Normandie were tested positive for highly pathogenic avian influenza A(H5N1), A(H5N3) and A(H5N8).	June 16, 2021
	Samples from birds in Grand Est, Bretagne, Pays de la Loire, Auvergne-Rhône-Alpes, Provence-Alpes-Côte d'Azur, Nouvelle-Aquitaine and Corse were tested positive for highly pathogenic avian influenza A(H5N8).	June 16, 2021
	Samples from poultry in Nouvelle-Aquitaine, Occitanie, Pays de la Loire, Grand Est, Corse and Île-de-France were tested positive for highly pathogenic avian influenza A(H5N8).	June 16, 2021
	Samples from poultry in Occitanie and Nouvelle-Aquitaine were tested positive for low pathogenic avian influenza A(H5N3).	June 16, 2021
Lesotho	Samples from poultry in Maseru and Leribe were tested positive for highly pathogenic avian influenza A(H5).	June 16, 2021
Netherlands	Samples from birds in Utrecht, Noord-Brabant, Zeeland, and Dutch Exclusive Economic Zone were tested positive for highly pathogenic avian influenza A(H5N8).	June 16, 2021 June 18, 2021
	Samples from birds in Groningen were tested positive for highly pathogenic avian influenza A(H5N1), A(H5N3) and A(H5N8).	June 16, 2021 June 17, 2021 June 18, 2021

	Samples from birds in Friesland and Noord-Holland were tested positive for highly pathogenic avian influenza A(H5N1), A(H5N4) and A(H5N8).	June 16, 2021 June 17, 2021 June 18, 2021
	Samples from birds in Gelderland, IJsselmeer and Zuid-Holland were tested positive for highly pathogenic avian influenza A(H5N1) and A(H5N8).	June 16, 2021 June 17, 2021 June 18, 2021
South Africa	Samples from poultry and birds in Western Cape were tested positive for highly pathogenic avian influenza A(H5N1).	June 16, 2021
	Samples from poultry in Free State, North West, Mpumalanga, Gauteng and KwaZulu-Natal were tested positive for highly pathogenic avian influenza A(H5N1).	June 16, 2021
Iraq	Samples from poultry in Al-Basrah, Sala ad-Din and Wasit were tested positive for highly pathogenic avian influenza A(H5N8).	June 17, 2021
Serbia	Samples from birds in Zapadno-Baki were tested positive for highly pathogenic avian influenza A(H5N8).	June 18, 2021
United Kingdom	Samples from poultry and birds in England and Scotland tested positive for highly pathogenic avian influenza A(H5N1).	June 18, 2021
	Samples from birds in Northern Ireland tested positive for highly pathogenic avian influenza A(H5N3).	June 18, 2021
	Samples from birds in Wales tested positive for highly pathogenic avian influenza A(H5N5).	June 18, 2021
	Samples from poultry and birds in England, Scotland, Wales and Northern Ireland were tested positive for highly pathogenic avian influenza A(H5N8).	June 18, 2021
	Samples from poultry in England were tested positive for low pathogenic avian influenza A(H5N2) and A(H5N3).	June 18, 2021
Iran	Samples from poultry in Kordestan, Qazvin, Alborz, South Khorasan, Semnan, Qom, West Azarbaijan, Gilan, Mazandaran, Kermanshah, Khuzestan, East Azarbaijan, Razavi Khorasan and Tehran were tested positive for highly pathogenic avian influenza A(H5N8).	June 21, 2021
Latvia	Samples from birds in Rojas were tested positive for highly pathogenic avian influenza A(H5N1).	June 21, 2021

	Samples from birds in Jūrmala, Engures, Ventpils City, Pāvilostas, Latvian Exclusive Economic Zone, Rīga, Mērsraga, Liepāja, and Saldus were tested positive for highly pathogenic avian influenza A(H5N8).	June 21, 2021
Taiwan	Samples from poultry in Tainan City, Changhua County, Taipei City, Yunlin County, Kaohsiung City, Pingtung County, New Taipei City and Chiayi City were tested positive for highly pathogenic avian influenza A(H5N5).	June 21, 2021

For cumulative reports of avian influenza A(H5) or other highly pathogenic avian influenza in poultry / wild birds, please refer to the [OIE](#) website.
