

Avian Influenza Report

Avian Influenza Report is a weekly report produced by the Surveillance Division of the Communicable Disease Branch of the Centre for Health Protection. This report highlights global avian influenza activity in humans and birds.

VOLUME 18, NUMBER 10

Reporting period: February 27, 2022 – March 5, 2022 (Week 10)
(Published on March 8, 2022)

Summary

1. Since the previous issue of Avian Influenza Report (AIR), there were no new human cases of avian influenza A(H7N9). Since March 2013 (as of March 5, 2022), there were a total of 1568 human cases of avian influenza A(H7N9) reported globally (all were reported in the seven waves between 2013 and September 2019). The latest case was reported on April 5, 2019.
2. Since the previous issue of AIR, two confirmed human cases of avian influenza A(H5N6) from Guangxi Zhuang Autonomous Region were reported by the National Health Commission (NHC). Since 2014 (as of March 8, 2022), there were 74 human cases of avian influenza A(H5N6) reported globally and 73 of them occurred in Mainland China. The latest case was reported on March 8, 2022.
3. Since the previous issue of AIR, there were no new human cases of avian influenza A(H5N1). From 2012 to 2021, 0 to 145 confirmed human cases of avian influenza A(H5N1) were reported to WHO annually (according to onset date).* The latest case was reported on January 21, 2022.

* Since November 21, 2012, WHO only publishes information on human cases with avian influenza A(H5N1) infection in “[Influenza at human – animal interface: Monthly Risk Assessment Summary](#)”. Only cases of human infection with H5N1 involved in events that are unusual or associated with potential increased risks will be reported in Disease Outbreak News. The latest [report](#) was published in February, 2022.

This week's highlights

H5N2	2

Table 10. Outside Hong Kong: Confirmed avian influenza A(H5) or other highly pathogenic avian influenza in poultry / wild birds / environmental samples reported in this week – details of reports

Places of occurrence	Details	OIE Report Date
Belgium	Samples from birds in Vlaanderen, Belgian and Wallonie were tested positive for highly pathogenic avian influenza A(H5N1).	March 1, 2022
Finland	Samples from birds in Etelä-Suomen aluehallintovirasto were tested positive for highly pathogenic avian influenza A(H5N1).	March 1, 2022
Germany	Samples from birds in Bayern, Berlin, Niedersachsen, Sachsen-Anhalt, Nordrhein-Westfalen, Hessen, Mecklenburg-Vorpommern, Schleswig Holstein and German Exclusive Economic Zone were tested positive for highly pathogenic avian influenza A(H5N1).	March 1, 2022 March 2, 2022 March 4, 2022
India	Samples from poultry in Maharashtra were tested positive for highly pathogenic avian influenza A(H5N1).	March 1, 2022
Latvia	Samples from birds in Rgas were tested positive for highly pathogenic avian influenza A(H5N1).	March 1, 2022
United States of America	Samples from poultry and birds in Kentucky and Delaware were tested positive for highly pathogenic avian influenza A(H5N1).	March 1, 2022 March 2, 2022
	Samples from birds in New York, Connecticut, North Carolina, South Carolina, Maine, Michigan, Maryland, Virginia, New Jersey, Alabama and Florida were tested positive for highly pathogenic avian influenza A(H5N1).	March 1, 2022
	Samples from poultry in Indiana were tested positive for	March 2, 2022

	highly pathogenic avian influenza A(H5N1).	
Vietnam	Samples from poultry in Bình Phc, Tây Ninh, Qung Nam, Qung Tr, Ninh Binh, Qung Binh, Ngh An and Hà Ni were tested positive for highly pathogenic avian influenza A(H5N1).	March 1, 2022
Canada	Samples from birds in Newfoundland and Labrador, British Columbia, Nova Scotia and Prince Edward Island were tested positive for highly pathogenic avian influenza A(H5N1).	March 2, 2022
Hungary	Samples from birds in Hungary were tested positive for highly pathogenic avian influenza A(H5N1).	March 2, 2022
Sweden	Samples from birds in Sweden were tested positive for highly pathogenic avian influenza A(H5N1).	March 3, 2022
Taiwan	Samples from poultry in Yunlin, Changhua, Pingtung, Taoyuan and Nantou were tested positive for highly pathogenic avian influenza A(H5N2).	March 3, 2022
Italy	Samples from poultry and birds in Veneto, Emilia Romagna, Lombardia, Friuli Venezia Giulia, Lazio and Piemonte were tested positive for highly pathogenic avian influenza A(H5N1).	March 4, 2022
	Samples from poultry in Toscana were tested positive for highly pathogenic avian influenza A(H5N1).	March 4, 2022
	Samples from birds in Campania and Apulia were tested positive for highly pathogenic avian influenza A(H5N1).	March 4, 2022
Japan	Samples from birds in Hokkaido were tested positive for highly pathogenic avian influenza A(H5) and A(H5N1).	March 4, 2022 March 7, 2022
	Samples from birds in Iwate and Kyoto were tested positive for highly pathogenic avian influenza A(H5N1).	March 4, 2022
Philippines	Samples from poultry in Camarines Sur, Pampanga, Laguna and Bulacan were tested positive for highly pathogenic avian influenza A(H5N1).	March 4, 2022
Poland	Samples from poultry in Opolskie were tested positive for highly pathogenic avian influenza A(H5N2).	March 4, 2022
	Samples from poultry and birds in Mazowieckie, Pomorskie, ódzkie, Kujawsko Pomorskie, lskie, Wielkopolskie and Dolnolskie were tested positive for highly pathogenic avian influenza A(H5N1).	March 7, 2022

	Samples from birds in Zachodniopomorskie, wiotkrzyskie and Opolskie were tested positive for highly pathogenic avian influenza A(H5N1).	March 7, 2022
	Samples from poultry in Podkarpackie, Maopolskie, Lubelskie and Warmisko Mazurskie were tested positive for highly pathogenic avian influenza A(H5N1).	March 7, 2022
United Kingdom	Samples from poultry and birds in England, Wales, Scotland and Northern Ireland were tested positive for highly pathogenic avian influenza A(H5N1).	March 4, 2022 March 7, 2022
	Samples from birds in Isle of Man and Jersey were tested positive for highly pathogenic avian influenza A(H5N1).	March 4, 2022 March 7, 2022
France	Samples from poultry and birds in Nouvelle Aquitaine, Hauts-de France, Occitanie, Pays de la Loire, Normandie and Centre-Val de Loire were tested positive for highly pathogenic avian influenza A(H5N1).	March 7, 2022
	Samples from birds in Grand Est, Auvergne Rhône-Alpe, Bretagne, Île-de-France and Bourgogne Franche-Comté were tested positive for highly pathogenic avian influenza A(H5N1).	March 7, 2022
Ireland	Samples from birds in Offaly, Kerry, Longford, Monaghan, Wexford, Roscommon, Galway, Donegal, Kildare, Dublin, Tipperary, Cork, Waterford and Sligo were tested positive for highly pathogenic avian influenza A(H5N1).	March 7, 2022
Israel	Samples from birds in HaZafon, HaDarom, Haifa, Jerusalem and HaMerkaz were tested positive for highly pathogenic avian influenza A(H5N1).	March 7, 2022
Korea	Samples from poultry and birds in Jeollanam-do, Chungcheongnam-do, Chungcheongbuk-do, Jeollabuk-do and Gyeonggi-do were tested positive for highly pathogenic avian influenza A(H5N1).	March 7, 2022
	Samples from birds in Busan, Gyeongsangbuk-do, Gangwon-do, Jeju and Gyeongsangnam-do were tested positive for highly pathogenic avian influenza A(H5N1).	March 7, 2022
	Samples from poultry in Sejong were tested positive for highly pathogenic avian influenza A(H5N1).	March 7, 2022
Nepal	Samples from poultry and birds in Central were tested positive for highly pathogenic avian influenza A(H5N1).	March 7, 2022
	Samples from poultry in East and West were tested positive	March 7, 2022

	for highly pathogenic avian influenza A(H5N1).	
Netherlands	Samples from poultry in Groningen, Overijssel, Gelderland, Friesland, Utrecht, Noord Holland, Flevoland, Noord Brabant and Limburg were tested positive for highly pathogenic avian influenza A(H5N1).	March 7, 2022
Slovakia	Samples from birds in Trnavský, Banskobystrický and Nitriansky were tested positive for highly pathogenic avian influenza A(H5N1).	March 7, 2022
South Africa	Samples from poultry and birds in Western Cape, Gauteng, KwaZulu Natal, Free State and Eastern Cape were tested positive for highly pathogenic avian influenza A(H5N1).	March 7, 2022
	Samples from birds in Limpopo were tested positive for highly pathogenic avian influenza A(H5N1).	March 7, 2022
	Samples from poultry in North West and Mpumalanga were tested positive for highly pathogenic avian influenza A(H5N1).	March 7, 2022
Spain	Samples from poultry and birds in Castilla y León and Andalucía were tested positive for highly pathogenic avian influenza A(H5N1).	March 7, 2022
	Samples from birds in Cataluña, Extremadura and Comunidad de Madrid were tested positive for highly pathogenic avian influenza A(H5N1).	March 7, 2022

For cumulative reports of avian influenza A(H5) or other highly pathogenic avian influenza in poultry / wild birds, please refer to the [OIE](#) website.
