

Avian Influenza Report

Avian Influenza Report is a weekly report produced by the Surveillance Division of the Communicable Disease Branch of the Centre for Health Protection. This report highlights global avian influenza activity in humans and birds.

VOLUME 18, NUMBER 12

Reporting period: March 13, 2022 – March 19, 2022 (Week 12)

(Published on March 22, 2022)

Summary

1. Since the previous issue of Avian Influenza Report (AIR), there were no new human cases of avian influenza A(H7N9). Since March 2013 (as of March 19, 2022), there were a total of 1568 human cases of avian influenza A(H7N9) reported globally (all were reported in the seven waves between 2013 and September 2019). The latest case was reported on April 5, 2019.
2. Since the previous issue of AIR, there were no new human cases of avian influenza A(H5N6). Since 2014 (as of March 19, 2022), there were 75 human cases of avian influenza A(H5N6) reported globally and 74 of them occurred in Mainland China. The latest case was reported on March 15, 2022.
3. Since the previous issue of AIR, there were no new human cases of avian influenza A(H5N1). From 2012 to 2021, 0 to 145 confirmed human cases of avian influenza A(H5N1) were reported to WHO annually (according to onset date).* The latest case was reported on January 21, 2022.

* Since November 21, 2012, WHO only publishes information on human cases with avian influenza A(H5N1) infection in “[Influenza at human – animal interface: Monthly Risk Assessment Summary](#)”. Only cases of human infection with H5N1 involved in events that are unusual or associated with potential increased risks will be reported in Disease Outbreak News. The latest [report](#) was published in March, 2022.

This week's highlights

[Carcass of a black-faced spoonbill found in the Hong Kong Wetland Park in Tin Shui Wai reported on December 20, 2021 \(H5N1\)](#)
[Carcass of a Eurasian Curlew found in the Mai Po Nature Reserve reported on January 26, 2022 \(H5N1\)](#)
- # [A sample of faecal droppings of live poultry taken from a poultry stall in Yan Oi Market in Tuen Mun reported on June 5, 2016 \(H7N9\)](#)

Table 9. Outside Hong Kong: Confirmed avian influenza A(H5) or other highly pathogenic avian influenza in poultry / wild birds / environmental samples reported in this week – number of reports for various subtypes of virus

Subtype of virus	No. of reports
H5	2
H5N1	40
H5N8	2

Table 10. Outside Hong Kong: Confirmed avian influenza A(H5) or other highly pathogenic avian influenza in poultry / wild birds / environmental samples reported in this week – details of reports

Places of occurrence	Details	OIE Report Date
Germany	Samples from poultry in Bayern were tested positive for highly pathogenic avian influenza A(H5N1).	March 15, 2022
Ireland	Samples from birds in Offaly, Kerry, Longford, Monaghan, Wexford, Roscommon, Galway, Sligo, Donegal, Kildare, Dublin, Tipperary, Cork and Waterford were tested positive for highly pathogenic avian influenza A(H5N1).	March 15, 2022
Latvia	Samples from birds in Rgas were tested positive for highly pathogenic avian influenza A(H5N1).	March 15, 2022
Netherlands	Samples from poultry and birds in Groningen, Overijssel, Gelderland, Friesland, Utrecht, Noord-Holland, Flevoland, Noord-Brabant and Limburg were tested positive for highly pathogenic avian influenza A(H5N1).	March 15, 2022 March 21, 2022
	Samples from birds in Zuid-Holland, Zeeland, IJsselmeer and Dutch Exclusive Economic Zone were tested positive for highly pathogenic avian influenza A(H5N1).	March 21, 2022
Spain	Samples from poultry in Andalucía and Castilla y León were tested positive for highly pathogenic avian influenza A(H5N1).	March 15, 2022
Austria	Samples from birds in Wien, Steiermark, Niederösterreich, Kärnten and Oberösterreich were tested positive for highly pathogenic avian influenza A(H5N1).	March 16, 2022
Belgium	Samples from birds in Vlaanderen, Belgian and Wallonie were tested positive for highly pathogenic avian influenza A(H5N1).	March 16, 2022

Finland	Samples from birds in Etelä-Suomen aluehallintovirasto were tested positive for highly pathogenic avian influenza A(H5N1).	March 16, 2022
Hungary	Samples from poultry and birds in Szabolcs-Szatmár-Bereg, Hajdú-Bihar, Csongrád and Bács-Kiskun were tested positive for highly pathogenic avian influenza A(H5N1).	March 16, 2022 March 21, 2022
	Samples from birds in Győr-Ménfőcsanak, Komárom-Esztergom, Baranya, Fejér, Borsod-Abaúj-Zemplén, Pest, Budapest and Vas were tested positive for highly pathogenic avian influenza A(H5N1).	March 16, 2022
	Samples from poultry in Békés were tested positive for highly pathogenic avian influenza A(H5N1).	March 21, 2022
Portugal	Samples from birds in Santarém, Porto, Faro, Beja, Setúbal and Leiria were tested positive for highly pathogenic avian influenza A(H5N1).	March 16, 2022
Canada	Samples from poultry and birds in Nova Scotia were tested positive for highly pathogenic avian influenza A(H5N1).	March 17, 2022 March 21, 2022
	Samples from birds in Newfoundland and Labrador, British Columbia, New Brunswick and Prince Edward Island were tested positive for highly pathogenic avian influenza A(H5N1).	March 21, 2022
Denmark	Samples from birds in Sjælland, Midtjylland, Syddanmark, Hovedstaden, Nordjylland and Danish Exclusive Economic Zone were tested positive for highly pathogenic avian influenza A(H5N1).	March 17, 2022
United States of America	Samples from poultry and birds in Kentucky, Delaware, Maryland, Iowa and Missouri were tested positive for highly pathogenic avian influenza A(H5N1).	March 17, 2022 March 18, 2022
	Samples from birds in Illinois, Connecticut, North Carolina, Kansas, South Carolina, Maine, New Hampshire, Virginia, New York, Michigan, Nebraska, Massachusetts, New Jersey, Alabama and Florida were tested positive for highly pathogenic avian influenza A(H5N1).	March 17, 2022
	Samples from poultry in Indiana, South Dakota and Wisconsin were tested positive for highly pathogenic avian influenza A(H5N1).	March 18, 2022

Italy	Samples from poultry in Veneto, Lombardia, Emilia-Romagna, Lazio, Toscana, Friuli-Venezia Giulia and Piemonte were tested positive for highly pathogenic avian influenza A(H5N1).	March 18, 2022
Japan	Samples from birds in Hokkaido and Fukushima were tested positive for highly pathogenic avian influenza A(H5).	March 18, 2022
	Samples from poultry in Hiroshima, Kagoshima, Kumamoto, Ehime, Hygo, Saitama, Chiba, Aomori and Iwate were tested positive for highly pathogenic avian influenza A(H5N1).	March 18, 2022
Romania	Samples from birds in Galai, Clrai, Neam, Tulcea, Cluj, Ialomia, Brila and Constana were tested positive for highly pathogenic avian influenza A(H5N1).	March 18, 2022 March 21, 2022
	Samples from poultry in Giurgiu were tested positive for highly pathogenic avian influenza A(H5N1).	March 21, 2022
Switzerland	Samples from birds in Bern, Zürich and Schaffhausen were tested positive for highly pathogenic avian influenza A(H5N1).	March 18, 2022
Albania	Samples from poultry in Durrës were tested positive for highly pathogenic avian influenza A(H5N8).	March 21, 2022
France	Samples from poultry and birds in Nouvelle-Aquitaine, Pays de la Loire, Auvergne-Rhône-Alpes, Occitanie, Hauts-de-France, Centre-Val de Loire and Normandie were tested positive for highly pathogenic avian influenza A(H5N1).	March 21, 2022
	Samples from birds in Grand Est, Bretagne, Île-de-France and Bourgogne-Franche-Comté were tested positive for highly pathogenic avian influenza A(H5N1).	March 21, 2022
Greece	Samples from birds in Epirus and Western Macedonia, and Macedonia and Thrace were tested positive for highly pathogenic avian influenza A(H5N1).	March 21, 2022
Nepal	Samples from poultry and birds in Central were tested positive for highly pathogenic avian influenza A(H5N1).	March 21, 2022
	Samples from poultry in Bagmati, Narayani, East and West were tested positive for highly pathogenic avian influenza A(H5N1).	March 21, 2022
Poland	Samples from poultry in lskie, Podkarpackie, Maopolskie, Mazowieckie, ódzkie, Lubelskie, Warmisko-Mazurskie,	March 21, 2022

	Kujawsko-Pomorskie, Pomorskie, Wielkopolskie and Dolnolskie were tested positive for highly pathogenic avian influenza A(H5N1).	
Russia	Samples from birds in Astrakhan' were tested positive for highly pathogenic avian influenza A(H5).	March 21, 2022
United Kingdom	Samples from poultry and birds in England, Wales, Scotland and Northern Ireland were tested positive for highly pathogenic avian influenza A(H5N1).	March 21, 2022
	Samples from birds in Isle of Man and Jersey were tested positive for highly pathogenic avian influenza A(H5N1).	March 21, 2022
	Samples from birds in England were tested positive for highly pathogenic avian influenza A(H5N8).	March 21, 2022

For cumulative reports of avian influenza A(H5) or other highly pathogenic avian influenza in poultry / wild birds, please refer to the [OIE](#) website.
