

Avian Influenza Report

Avian Influenza Report is a weekly report produced by the Surveillance Division of the Communicable Disease Branch of the Centre for Health Protection. This report highlights global avian influenza activity in humans and birds.

VOLUME 18, NUMBER 38

Reporting period: Sep 11, 2022 – Sep 17, 2022 (Week 38)

(Published on September 20, 2022)

Summary

1. Since the previous issue of Avian Influenza Report (AIR), there were no new human cases of avian influenza A(H7N9). Since March 2013 (as of September 17, 2022), there were a total of 1568 human cases of avian influenza A(H7N9) reported globally (all were reported in the seven waves between 2013 and September 2019). The latest case was reported on April 5, 2019.
2. Since the previous issue of AIR, one confirmed human case of avian influenza A(H5N6) from Guangxi Zhuang Autonomous Region was reported by the National Health Commission (NHC). Since 2014 (as of September 17, 2022), there were 81 human cases of avian influenza A(H5N6) reported globally and 80 of them occurred in Mainland China. The latest case was reported on September 14, 2022.
3. Since the previous issue of AIR, there were no new human cases of avian influenza A(H5N1). From 2012 to 2022, 0 to 145 confirmed human cases of avian influenza A(H5N1) were reported to WHO annually (according to onset date).* The latest case was reported on May 6, 2022.

* Since November 21, 2012, WHO only publishes information on human cases with avian influenza A(H5N1) infection in “[Influenza at human – animal interface: Monthly Risk Assessment Summary](#)”. Only cases of human infection with H5N1 involved in events that are unusual or associated with potential increased risks will be reported in Disease Outbreak News. The latest [report](#) was published in September, 2022.

This week's highlights

[A dead oriental magpie robin found in Tseung Kwan O on December 21, 2017 \(H5N6\)](#)
[A dead black-faced spoonbill found in the Hong Kong Wetland Park in Tin Shui Wai on December 21, 2017 \(H5N6\)](#)
[An environmental swab of a chopping board and skin swabs of a chilled duck sample taken from a fresh provision shop in Wan Chai on 2 January & 9 January, 2018 \(H5N6\)](#)
[An oropharyngeal swab from a batch of chilled chicken taken at a fresh provision shop in Mong Kok, reported on 23 January, 2018 \(H5N6\)](#)
[A black-headed gull carcass found in Ngau Hom Tsuen, Lau Fau Shan on February 8, 2018 \(H5N6\)](#)
[A dead crested myna found at Kun Lung Wai, Fanling reported on April 9, 2018 \(H5N6\)](#)
[A swab sample taken from a bird cage housing a hill myna at a pet bird shop in Yuen Po Street Bird Garden in Mong Kok on 7 April, 2018 \(H5N6\)](#)
[Samples of faecal droppings collected at Mai Po Nature Reserve reported on January 14, 2021 \(H5N8\)](#)
[Carcass of a peregrine falcon found in Wu Kai Sha reported on February 1, 2021 \(H5N8\)](#)
[Carcass of a black-faced spoonbill found in the Hong Kong Wetland Park in Tin Shui Wai reported on December 20, 2021 \(H5N1\)](#)
[Carcass of a Eurasian Curlew found in the Mai Po Nature Reserve reported on January 26, 2022 \(H5N1\)](#)
- # [A sample of faecal droppings of live poultry taken from a poultry stall in Yan Oi Market in Tuen Mun reported on June 5, 2016 \(H7N9\)](#)

Table 9. Outside Hong Kong: Confirmed avian influenza A(H5) or other highly pathogenic avian influenza in poultry / wild birds / environmental samples reported in this week – number of reports for various subtypes of virus

Subtype of virus	No. of reports
H5N1	27
H5N8	1

Table 10. Outside Hong Kong: Confirmed avian influenza A(H5) or other highly pathogenic avian influenza in poultry / wild birds / environmental samples reported in this week – details of reports

Places of Occurrence	Details	OIE Report Date
Canada	Samples from poultry and birds in Ontario, British Columbia, Saskatchewan, Alberta, New Brunswick, Québec, Nova Scotia and Manitoba were tested positive for highly pathogenic avian influenza A(H5N1).	September 13, 2022 September 16, 2022
	Samples from birds in Newfoundland and Labrador, Nunavut, Prince Edward Island and Yukon were tested positive for highly pathogenic avian influenza A(H5N1).	September 13, 2022
Germany	Samples from poultry and birds in Niedersachsen were tested positive for highly pathogenic avian influenza A(H5N1).	September 13, 2022 September 16, 2022 September 19, 2022
	Samples from birds in Schleswig-Holstein were tested	September 16, 2022

Places of Occurrence	Details	OIE Report Date
	positive for highly pathogenic avian influenza A(H5N1).	
Latvia	Samples from birds in Rgas were tested positive for highly pathogenic avian influenza A(H5N1).	September 13, 2022 September 19, 2022
Spain	Samples from poultry and birds in Extremadura, Andalucía and Castilla - La Mancha were tested positive for highly pathogenic avian influenza A(H5N1).	September 13, 2022 September 19, 2022
	Samples from birds in Galicia, País Vasco, Cataluña, Castilla y León, Aragón, Comunidad de Madrid, Comunidad Foral de Navarra, La Rioja and Cantabria were tested positive for highly pathogenic avian influenza A(H5N1).	September 13, 2022 September 19, 2022
Finland	Samples from birds in Ahvenanmaan valtionvirasto, Etelä-Suomen aluehallintovirasto, Lounais-Suomen aluehallintovirasto, Pohjois-Suomen aluehallintovirasto and Länsi- ja Sisä-Suomen aluehallintovirasto were tested positive for highly pathogenic avian influenza A(H5N1).	September 14, 2022
Hungary	Samples from birds in Szabolcs-Szatmár-Bereg, Győr-Ménfőcsanak, Komárom-Esztergom, Tolna, Baranya, Hajdú-Bihar, Csongrád, Fejér, Somogy, Borsod-Abaúj-Zemplén, Bács-Kiskun, Pest, Budapest and Vas were tested positive for highly pathogenic avian influenza A(H5N1).	September 14, 2022
Philippines	Samples from poultry in Benguet, Nueva Ecija, Quezon, Laguna, Rizal, Camarines Sur, Pangasinan, Tarlac, Isabela, Pampanga, Bataan and Bulacan were tested positive for highly pathogenic avian influenza A(H5N1).	September 15, 2022
Belgium	Samples from birds in Vlaanderen, Belgian Exclusive Economic Zone and Wallonie were tested positive for highly pathogenic avian influenza A(H5N1).	September 16, 2022
France	Samples from poultry and birds in Pays de la Loire, Nouvelle-Aquitaine, Occitanie, Bretagne, Auvergne-Rhône-Alpes and Hauts-de-France were tested positive for highly pathogenic avian influenza A(H5N1).	September 16, 2022 September 19, 2022
	Samples from birds in Normandie, Grand Est, French Exclusive Economic Zone, Centre-Val de Loire and Bourgogne-Franche-Comté were tested positive for highly pathogenic avian influenza A(H5N1).	September 19, 2022
Russia	Samples from birds in Samara and Saratov were tested	September 16, 2022

Places of Occurrence	Details	OIE Report Date
	positive for highly pathogenic avian influenza A(H5N1).	
South Africa	Samples from poultry and birds in Western Cape, Gauteng, KwaZulu-Natal, Mpumalanga, North West, Free State and Eastern Cape were tested positive for highly pathogenic avian influenza A(H5N1).	September 16, 2022
	Samples from birds in Limpopo were tested positive for highly pathogenic avian influenza A(H5N1).	September 16, 2022
United States of America	Samples from poultry and birds in Minnesota, Colorado, Utah, Oregon, Idaho, Kentucky, Indiana, Washington, South Dakota, Iowa, Maryland, North Dakota, Missouri, Montana, Pennsylvania, Kansas, North Carolina, California, Wisconsin, New York, Nebraska, Michigan, Ohio, Delaware and Maine were tested positive for highly pathogenic avian influenza A(H5N1).	September 16, 2022
	Samples from poultry in Texas, New Jersey and Oklahoma were tested positive for highly pathogenic avian influenza A(H5N1).	September 16, 2022
	Samples from birds in Florida, Nantucket, Wyoming, Massachusetts, Arizona, District of Columbia, Illinois, Vermont, Alaska, New Hampshire, Virginia, Tennessee, Connecticut, Georgia, Rhode Island, Nevada, New Jersey, Alabama and South Carolina were tested positive for highly pathogenic avian influenza A(H5N1)	September 16, 2022
United Kingdom	Samples from poultry and birds in England, Scotland, Northern Ireland and Wales were tested positive for highly pathogenic avian influenza A(H5N1).	September 19, 2022
	Samples from birds in United Kingdom Exclusive Economic Zone, Guernsey, Isle of Man and Jersey were tested positive for highly pathogenic avian influenza A(H5N1).	September 19, 2022
	Samples from birds in England were tested positive for highly pathogenic avian influenza A(H5N8).	September 19, 2022

For cumulative reports of avian influenza A(H5) or other highly pathogenic avian influenza in poultry / wild birds, please refer to the [OIE](#) website.
