

# *Avian Influenza Report*

*Avian Influenza Report* is a weekly report produced by the Surveillance Division of the Communicable Disease Branch of the Centre for Health Protection. This report highlights global avian influenza activity in humans and birds.

**VOLUME 18, NUMBER 40**

Reporting period: Sep 25, 2022 – Oct 1, 2022 (Week 40)

(Published on October 5, 2022)

## Summary

1. Since the previous issue of Avian Influenza Report (AIR), there were no new human cases of avian influenza A(H7N9). Since March 2013 (as of October 1, 2022), there were a total of 1568 human cases of avian influenza A(H7N9) reported globally (all were reported in the seven waves between 2013 and September 2019). The latest case was reported on April 5, 2019.
2. Since the previous issue of AIR, there were no new human cases of avian influenza A(H5N6). Since 2014 (as of October 1, 2022), there were 81 human cases of avian influenza A(H5N6) reported globally and 80 of them occurred in Mainland China. The latest case was reported on September 14, 2022.
3. Since the previous issue of AIR, there were no new human cases of avian influenza A(H5N1). From 2012 to 2022, 0 to 145 confirmed human cases of avian influenza A(H5N1) were reported to WHO annually (according to onset date).\* The latest case was reported on May 6, 2022.

\* Since November 21, 2012, WHO only publishes information on human cases with avian influenza A(H5N1) infection in “[Influenza at human – animal interface: Monthly Risk Assessment Summary](#)”. Only cases of human infection with H5N1 involved in events that are unusual or associated with potential increased risks will be reported in Disease Outbreak News. The latest [report](#) was published in September, 2022.

## This week's highlights

**Table 9. Outside Hong Kong: Confirmed avian influenza A(H5) or other highly pathogenic avian influenza in poultry / wild birds / environmental samples reported in this week – number of reports for various subtypes of virus**

Subtype of virus	No. of reports
H5N1	38
H5N5	2
H5N8	1

**Table 10. Outside Hong Kong: Confirmed avian influenza A(H5) or other highly pathogenic avian influenza in poultry / wild birds / environmental samples reported in this week – details of reports**

Places of Occurrence	Details	OIE Report Date
Canada	Samples from poultry and birds in Alberta, Manitoba, British Columbia, Saskatchewan, Ontario, Québec and Nova Scotia were tested positive for highly pathogenic avian influenza A(H5N1).	September 20, 2022 September 21, 2022 September 29, 2022
	Samples from birds in Northwest Territories,	September 21, 2022

Places of Occurrence	Details	OIE Report Date
	Newfoundland and Labrador, Yukon, New Brunswick, Prince Edward Island and Nunavut were tested positive for highly pathogenic avian influenza A(H5N1).	
Belgium	Samples from poultry and birds in Vlaanderen were tested positive for highly pathogenic avian influenza A(H5N1).	September 23, 2022 September 28, 2022 September 30, 2022 October 3, 2022
	Samples from birds in Wallonie and Belgian Exclusive Economic Zone were tested positive for highly pathogenic avian influenza A(H5N1).	September 23, 2022 September 28, 2022 October 3, 2022
France	Samples from poultry in Pays de la Loire, Centre-Val de Loire, Normandie, Nouvelle-Aquitaine, Hauts-de-France, Bretagne, Grand Est, Auvergne-Rhône-Alpes and Occitanie were tested positive for highly pathogenic avian influenza A(H5N1).	September 23, 2022
United States of America	Samples from poultry and birds in Minnesota, South Dakota, New Hampshire, North Dakota, Colorado, Utah, Idaho, Montana, Michigan, California, Ohio, New York and Indiana were tested positive for highly pathogenic avian influenza A(H5N1).	September 24, 2022 September 30, 2022 October 1, 2022
	Samples from birds in Nebraska, Washington, Massachusetts, Mississippi, Connecticut, Wyoming, Illinois, Maine, Alaska, Virginia, Oregon, Kansas, Georgia, Missouri, Florida, Nevada, Iowa, Rhode Island, Maryland, Delaware, Texas and Vermont were tested positive for highly pathogenic avian influenza A(H5N1).	September 24, 2022 October 1, 2022
	Samples from poultry in Tennessee, Pennsylvania and Wisconsin were tested positive for highly pathogenic avian influenza A(H5N1).	September 30, 2022
Hungary	Samples from birds in Somogy, Tolna, Bács-Kiskun, Csongrád, Komárom-Esztergom, Fejér, Győr-Moson-Sopron, Szabolcs-Szatmár-Bereg, Hajdú-Bihar, Pest, Borsod-Abaúj-Zemplén, Budapest, Vas and Baranya were tested positive for highly pathogenic avian influenza A(H5N1).	September 27, 2022 October 4, 2022
Latvia	Samples from birds in Rīgas were tested positive for highly pathogenic avian influenza A(H5N1).	September 27, 2022 October 4, 2022
Spain	Samples from birds in Cantabria, Galicia, La Rioja, Cataluña, Comunidad Foral de Navarra, Andalucía, País Vasco, Comunidad de Madrid, Extremadura, Castilla – La Mancha, Castilla y León and Aragón were tested positive	September 27, 2022

Places of Occurrence	Details	OIE Report Date
	for highly pathogenic avian influenza A(H5N1).	
Denmark	Samples from birds in Veterinary Inspection Unit East, Midtjylland, Sjælland, Syddanmark, Nordjylland and Hovedstaden were tested positive for highly pathogenic avian influenza A(H5N1).	September 28, 2022
Finland	Samples from birds in Etelä-Suomen aluehallintovirasto, Lounais-Suomen aluehallintovirasto, Ahvenanmaan valtionvirasto and Länsi- ja Sisä-Suomen aluehallintovirasto were tested positive for highly pathogenic avian influenza A(H5N1).	September 28, 2022
	Samples from birds in Pohjois-Suomen aluehallintovirasto were tested positive for highly pathogenic avian influenza A(H5N1) and A(H5N5).	September 28, 2022 September 30, 2022
Netherlands	Samples from poultry and birds in Groningen, Overijssel, Friesland, Gelderland, Zeeland, Flevoland, Utrecht and Noord-Brabant were tested positive for highly pathogenic avian influenza A(H5N1).	September 28, 2022
	Samples from birds in Noord-Holland, Zuid-Holland, IJsselmeer, Drenthe and Limburg were tested positive for highly pathogenic avian influenza A(H5N1).	September 28, 2022
Norway	Samples from birds in Troms Og Finnmark, Svalbard and Jan Mayen, Trøndelag, Møre Og Romsdal and Nordland were tested positive for highly pathogenic avian influenza A(H5N5).	September 28, 2022
Russia	Samples from birds in Samara and Saratov were tested positive for highly pathogenic avian influenza A(H5N1).	September 28, 2022
Germany	Samples from poultry and birds in Niedersachsen and Nordrhein-Westfalen were tested positive for highly pathogenic avian influenza A(H5N1).	September 29, 2022 September 30, 2022 October 4, 2022
	Samples from poultry in Schleswig-Holstein were tested positive for highly pathogenic avian influenza A(H5N1).	September 29, 2022
Japan	Samples from birds in Kanagawa were tested positive for highly pathogenic avian influenza A(H5N1).	September 30, 2022
Ireland	Samples from birds in Cork, Waterford, Meath, Dublin, Kerry, Louth, Donegal and Mayo were tested positive for highly pathogenic avian influenza A(H5N1).	October 1, 2022

<b>Places of Occurrence</b>	<b>Details</b>	<b>OIE Report Date</b>
Portugal	Samples from poultry in Lisboa, Santarém and Évora were tested positive for highly pathogenic avian influenza A(H5N1).	October 1, 2022
United Kingdom	Samples from poultry and birds in England, Scotland and Wales were tested positive for highly pathogenic avian influenza A(H5N1).	October 1, 2022 October 4, 2022
	Samples from birds in United Kingdom Exclusive Economic Zone, Isle of Man and Jersey were tested positive for highly pathogenic avian influenza A(H5N1).	October 1, 2022
	Samples from birds in England were tested positive for highly pathogenic avian influenza A(H5N8).	October 1, 2022
	Samples from poultry in Northern Ireland were tested positive for highly pathogenic avian influenza A(H5N1).	October 4, 2022
Nigeria	Samples from poultry in Delta, Kano, Plateau, Rivers, Yobe, Lagos, Ogun, Bayelsa, Edo, Gombe, Kaduna, Kogi, Bauchi, Federal Capital Territory, Niger and Katsina were tested positive for highly pathogenic avian influenza A(H5N1).	October 3, 2022

For cumulative reports of avian influenza A(H5) or other highly pathogenic avian influenza in poultry / wild birds, please refer to the [OIE](#) website.
