

Avian Influenza Report

Avian Influenza Report is a weekly report produced by the Surveillance Division of the Communicable Disease Branch of the Centre for Health Protection. This report highlights global avian influenza activity in humans and birds.

VOLUME 18, NUMBER 41

Reporting period: Oct 2, 2022 – Oct 8, 2022 (Week 41)

(Published on October 11, 2022)

Summary

1. Since the previous issue of Avian Influenza Report (AIR), there were no new human cases of avian influenza A(H7N9). Since March 2013 (as of October 8, 2022), there were a total of 1568 human cases of avian influenza A(H7N9) reported globally (all were reported in the seven waves between 2013 and September 2019). The latest case was reported on April 5, 2019.
2. Since the previous issue of AIR, there were no new human cases of avian influenza A(H5N6). Since 2014 (as of October 8, 2022), there were 81 human cases of avian influenza A(H5N6) reported globally and 80 of them occurred in Mainland China. The latest case was reported on September 14, 2022.
3. Since the previous issue of AIR, there were no new human cases of avian influenza A(H5N1). From 2012 to 2022, 0 to 145 confirmed human cases of avian influenza A(H5N1) were reported to WHO annually (according to onset date).* The latest case was reported on May 6, 2022.

* Since November 21, 2012, WHO only publishes information on human cases with avian influenza A(H5N1) infection in “[Influenza at human – animal interface: Monthly Risk Assessment Summary](#)”. Only cases of human infection with H5N1 involved in events that are unusual or associated with potential increased risks will be reported in Disease Outbreak News. The latest [report](#) was published in September, 2022.

This week's highlights

[A dead oriental magpie robin found in Tseung Kwan O on December 21, 2017 \(H5N6\)](#)
[A dead black-faced spoonbill found in the Hong Kong Wetland Park in Tin Shui Wai on December 21, 2017 \(H5N6\)](#)
[An environmental swab of a chopping board and skin swabs of a chilled duck sample taken from a fresh provision shop in Wan Chai on 2 January & 9 January, 2018 \(H5N6\)](#)
[An oropharyngeal swab from a batch of chilled chicken taken at a fresh provision shop in Mong Kok, reported on 23 January, 2018 \(H5N6\)](#)
[A black-headed gull carcass found in Ngau Hom Tsuen, Lau Fau Shan on February 8, 2018 \(H5N6\)](#)
[A dead crested myna found at Kun Lung Wai, Fanling reported on April 9, 2018 \(H5N6\)](#)
[A swab sample taken from a bird cage housing a hill myna at a pet bird shop in Yuen Po Street Bird Garden in Mong Kok on 7 April, 2018 \(H5N6\)](#)
[Samples of faecal droppings collected at Mai Po Nature Reserve reported on January 14, 2021 \(H5N8\)](#)
[Carcass of a peregrine falcon found in Wu Kai Sha reported on February 1, 2021 \(H5N8\)](#)
[Carcass of a black-faced spoonbill found in the Hong Kong Wetland Park in Tin Shui Wai reported on December 20, 2021 \(H5N1\)](#)
[Carcass of a Eurasian Curlew found in the Mai Po Nature Reserve reported on January 26, 2022 \(H5N1\)](#)
- # [A sample of faecal droppings of live poultry taken from a poultry stall in Yan Oi Market in Tuen Mun reported on June 5, 2016 \(H7N9\)](#)

Table 9. Outside Hong Kong: Confirmed avian influenza A(H5) or other highly pathogenic avian influenza in poultry / wild birds / environmental samples reported in this week – number of reports for various subtypes of virus

Subtype of virus	No. of reports
H5N1	16
H5N2	1
H5N5	1
H5N8	1

Table 10. Outside Hong Kong: Confirmed avian influenza A(H5) or other highly pathogenic avian influenza in poultry / wild birds / environmental samples reported in this week – details of reports

Places of Occurrence	Details	OIE Report Date
Taiwan	Samples from poultry in Yunlin County, Taichung, Nantou, Changhua, Taipei, Chiayi County, New Taipei, Tainan, Pingtung and Taoyuan were tested positive for	September 29, 2022

Places of Occurrence	Details	OIE Report Date
	highly pathogenic avian influenza A(H5N2).	
Belgium	Samples from poultry and birds in Vlaanderen were tested positive for highly pathogenic avian influenza A(H5N1).	October 4, 2022 October 6, 2022 October 7, 2022 October 10, 2022
	Samples from birds in Wallonie and Belgian Exclusive Economic Zone were tested positive for highly pathogenic avian influenza A(H5N1).	October 4, 2022 October 6, 2022 October 7, 2022
Spain	Samples from birds in País Vasco, Galicia, Principado de Asturias, Cantabria, Andalucía, Castilla - La Mancha, La Rioja, Comunidad Foral de Navarra, Comunidad de Madrid, Extremadura, Castilla y León, Cataluña and Aragón were tested positive for highly pathogenic avian influenza A(H5N1).	October 4, 2022
Finland	Samples from birds in Etelä-Suomen aluehallintovirasto, Lounais-Suomen aluehallintovirasto, Ahvenanmaan valtionvirasto and Länsi- ja Sisä-Suomen aluehallintovirasto were tested positive for highly pathogenic avian influenza A(H5N1).	October 5, 2022
	Samples from birds in Pohjois-Suomen aluehallintovirasto were tested positive for highly pathogenic avian influenza A(H5N1) and A(H5N5).	October 5, 2022
Italy	Samples from birds in Emilia-Romagna were tested positive for highly pathogenic avian influenza A(H5N1).	October 6, 2022
Algeria	Samples from poultry in Médéa were tested positive for highly pathogenic avian influenza A(H5N1).	October 7, 2022
Canada	Samples from poultry in British Columbia, Ontario, Manitoba, Alberta, Saskatchewan, Québec and Nova Scotia were tested positive for highly pathogenic avian influenza A(H5N1).	October 7, 2022
Norway	Samples from birds in Troms Og Finnmark, Trøndelag, Nordland, Vestland, Viken, Svalbard and Jan Mayen, Rogaland, Oslo, Norwegian Exclusive Economic Zone, Møre Og Romsdal and Agder were tested positive for highly pathogenic avian influenza A(H5N1).	October 7, 2022
United Kingdom	Samples from birds in Isle of Man and Jersey were tested positive for highly pathogenic avian influenza A(H5N1).	October 8, 2022
	Samples from birds in England were tested positive for	October 8, 2022

Places of Occurrence	Details	OIE Report Date
	highly pathogenic avian influenza A(H5N8).	
United States of America	Samples from poultry and birds in Pennsylvania, North Dakota, Wisconsin, Utah, Michigan, California, Alaska, Nebraska, New York, Montana, Missouri, Minnesota, Colorado, Idaho, South Dakota, New Hampshire, Ohio, Indiana, Maryland and Washington were tested positive for highly pathogenic avian influenza A(H5N1).	October 8, 2022
	Samples from poultry in North Carolina and Tennessee were tested positive for highly pathogenic avian influenza A(H5N1).	October 8, 2022
	Samples from birds in Oregon, Connecticut, New Mexico, Delaware, Texas, Iowa, Georgia, Massachusetts, Mississippi, Wyoming, Illinois, Maine, Virginia, Kansas, Nevada and Florida were tested positive for highly pathogenic avian influenza A(H5N1).	October 8, 2022
Germany	Samples from poultry in Niedersachsen and Schleswig-Holstein were tested positive for highly pathogenic avian influenza A(H5N1).	October 8, 2022

For cumulative reports of avian influenza A(H5) or other highly pathogenic avian influenza in poultry / wild birds, please refer to the [OIE](#) website.
