

# *Avian Influenza Report*

*Avian Influenza Report* is a weekly report produced by the Surveillance Division of the Communicable Disease Branch of the Centre for Health Protection. This report highlights global avian influenza activity in humans and birds.

**VOLUME 18, NUMBER 45**

Reporting period: Oct 30, 2022 – Nov 5, 2022 (Week 45)

(Published on November 8, 2022)

## **Summary**

1. Since the previous issue of Avian Influenza Report (AIR), there were no new human cases of avian influenza A(H7N9). Since March 2013 (as of November 5, 2022), there were a total of 1568 human cases of avian influenza A(H7N9) reported globally (all were reported in the seven waves between 2013 and September 2019). The latest case was reported on April 5, 2019.
2. Since the previous issue of AIR, there were no new human cases of avian influenza A(H5N6). Since 2014 (as of November 5, 2022), there were 82 human cases of avian influenza A(H5N6) reported globally and 81 of them occurred in Mainland China. The latest case was reported on October 21, 2022.
3. Since the previous issue of AIR, there was one new human case of avian influenza A(H5N1) from Spain reported by the World Health Organization (WHO). From 2012 to 2022, 0 to 145 confirmed human cases of avian influenza A(H5N1) were reported to WHO annually (according to onset date).\* The latest case was reported on November 3, 2022.

\* Since November 21, 2012, WHO only publishes information on human cases with avian influenza A(H5N1) infection in “[Influenza at human – animal interface: Monthly Risk Assessment Summary](#)”. Only cases of human infection with H5N1 involved in events that are unusual or associated with potential increased risks will be reported in Disease Outbreak News. The latest [report](#) was published in October, 2022.

## This week's highlights

Places of Occurrence	Details	OIE Report Date
Colombia	Samples from birds in Chocó were tested positive for highly pathogenic avian influenza A(H5N1).	October 31, 2022
Ireland	Samples from birds in Cavan, Wicklow, Dublin, Cork, Waterford, Meath, Kerry, Louth, Donegal and Mayo were tested positive for highly pathogenic avian influenza	November 1, 2022

Places of Occurrence	Details	OIE Report Date
	A(H5N1).	
Japan	Samples from poultry in Kagawa, Hokkaido and Okayama were tested positive for highly pathogenic avian influenza A(H5N1)	November 1, 2022 November 4, 2022
Latvia	Samples from birds in Rīgas were tested positive for highly pathogenic avian influenza A(H5N1).	November 1, 2022
Netherlands	Samples from poultry in Noord-Brabant, Gelderland, Limburg, Friesland, Overijssel, Zuid-Holland, Groningen, Drenthe, Zeeland, Flevoland and Utrecht were tested positive for highly pathogenic avian influenza A(H5N1).	November 1, 2022 November 4, 2022
Russia	Samples from poultry in Khabarovsk were tested positive for highly pathogenic avian influenza A(H5N1).	November 1, 2022
Finland	Samples from birds in Etelä-Suomen aluehallintovirasto, Lounais-Suomen aluehallintovirasto, Ahvenanmaan valtionvirasto, Länsi- ja Sisä-Suomen aluehallintovirasto and Pohjois-Suomen aluehallintovirasto were tested positive for highly pathogenic avian influenza A(H5N1).	November 2, 2022
Italy	Samples from poultry and birds in Veneto, Emilia-Romagna and Lombardia were tested positive for highly pathogenic avian influenza A(H5N1).	November 2, 2022
Mexico	Samples from birds in Aguascalientes, Baja California, Chiapas, Nuevo León and Jalisco were tested positive for highly pathogenic avian influenza A(H5N1).	November 2, 2022
Belgium	Samples from birds in Vlaanderen and Wallonie were tested positive for highly pathogenic avian influenza A(H5N1).	November 3, 2022 November 7, 2022
United States of America	Samples from poultry and birds in Minnesota, Utah, Florida, New York, Pennsylvania, Wisconsin, South Dakota, Washington, Idaho, California, Oregon, Colorado, New Jersey, Alaska, Michigan and North Dakota were tested positive for highly pathogenic avian influenza A(H5N1).	November 3, 2022 November 4, 2022 November 5, 2022
	Samples from poultry in Delaware, Ohio, Nevada, Kentucky, Kansas and Arkansas were tested positive for highly pathogenic avian influenza A(H5N1).	November 3, 2022
	Samples from birds in Tennessee, Louisiana, Illinois, North Carolina, Iowa, Virginia, Missouri, Montana,	November 4, 2022 November 5, 2022

Places of Occurrence	Details	OIE Report Date
	Oklahoma, Rhode Island, Connecticut, Wyoming, Indiana, Texas, New Mexico, Montana and Maine were tested positive for highly pathogenic avian influenza A(H5N1).	
Canada	Samples from poultry and birds in Saskatchewan, Manitoba, Québec, Alberta, Ontario, British Columbia and Nova Scotia were tested positive for highly pathogenic avian influenza A(H5N1).	November 4, 2022
	Samples from birds in Newfoundland and Labrador, Prince Edward Island, Nunavut, Yukon, Northwest Territories and New Brunswick were tested positive for highly pathogenic avian influenza A(H5N1).	November 4, 2022
France	Samples from poultry and birds in Occitanie, Île-de-France, Centre-Val de Loire, Nouvelle-Aquitaine, Hauts-de-France, Pays de la Loire, Normandie, Auvergne-Rhône-Alpes, Grand Est and Bretagne were tested positive for highly pathogenic avian influenza A(H5N1).	November 4, 2022
Germany	Samples from poultry in Niedersachsen, Nordrhein-Westfalen and Schleswig-Holstein were tested positive for highly pathogenic avian influenza A(H5N1).	November 4, 2022
Hungary	Samples from poultry in Bács-Kiskun were tested positive for highly pathogenic avian influenza A(H5N1).	November 4, 2022
Serbia	Samples from poultry and birds in Južno-Bački were tested positive for highly pathogenic avian influenza A(H5N1).	November 4, 2022 November 7, 2022
	Samples from birds in Srednje-Banatski and Severno-Bački were tested positive for highly pathogenic avian influenza A(H5N1).	November 4, 2022
Slovenia	Samples from birds in Pomurska were tested positive for highly pathogenic avian influenza A(H5N1).	November 4, 2022
United Kingdom	Samples from poultry and birds in England, Wales and Scotland were tested positive for highly pathogenic avian influenza A(H5N1).	November 5, 2022
	Samples from birds in Northern Ireland, Isle of Man, Jersey, Guernsey and Guernsey Exclusive Economic Zone were tested positive for highly pathogenic avian influenza A(H5N1).	November 5, 2022

For cumulative reports of avian influenza A(H5) or other highly pathogenic avian influenza in poultry / wild birds, please refer to the [OIE](#) website.
