

Avian Influenza Report

Avian Influenza Report is a weekly report produced by the Surveillance Division of the Communicable Disease Branch of the Centre for Health Protection. This report highlights global avian influenza activity in humans and birds.

VOLUME 18, NUMBER 48

Reporting period: Nov 20, 2022 – Nov 26, 2022 (Week 48) (Published on November 29, 2022)

Summary

- 1. Since the previous issue of Avian Influenza Report (AIR), there were no new human cases of avian influenza A(H7N9). Since March 2013 (as of November 26, 2022), there were a total of 1568 human cases of avian influenza A(H7N9) reported globally (all were reported in the seven waves between 2013 and September 2019). The latest case was reported on April 5, 2019.
- 2. Since the previous issue of AIR, there were no new human cases of avian influenza A(H5N6). Since 2014 (as of November 26, 2022), there were 82 human cases of avian influenza A(H5N6) reported globally and 81 of them occurred in Mainland China. The latest case was reported on October 21, 2022.
- 3. Since the previous issue of AIR, there were no new human cases of avian influenza A(H5N1). From 2012 to 2022, 0 to 145 confirmed human cases of avian influenza A(H5N1) were reported to WHO annually (according to onset date).* The latest case was reported on November 3, 2022.

^{*} Since November 21, 2012, WHO only publishes information on human cases with avian influenza A(H5N1) infection in "<u>Influenza at human – animal interface: Monthly Risk Assessment Summary</u>". Only cases of human infection with H5N1 involved in events that are unusual or associated with potential increased risks will be reported in Disease Outbreak News. The latest report was published in October, 2022.

This week's highlights

^{*} All cases imported from Mainland China

Table 7. Confirmed human cases of avian influenza A infections other than avian influenza A(H5N1 / H5N6 / H7N9) reported in the past 6 months (as of November 29, 2022)

| | Place of occurrence | No. of cases (No. of deaths) | Details |
|--|---------------------|------------------------------------|--|
| In this reporting period | Mainland China | 1(0) | Avian influenza A(H9N2): ◆ Gansu Province: □ A 3-year-old boy with onset on September 20, 2022. |
| Previously reported cases (onset/ reported in the past 6 months) | Mainland China | 4(0) | Avian influenza A(H3N8): ◆ Hunan Province: □ A 5-year-old boy with onset on May 9, 2022. Avian influenza A(H9N2): ◆ Guizhou Province: □ A 2-year-old boy with onset on May 8, 2022. ◆ Guangdong Province: □ A 1-year-old boy with onset on August 1, 2022. Avian influenza A(H10N3): ◆ Zhejiang Province: □ A 33-year-old man with onset on June 11, 2022. |

Table 8. Hong Kong: Confirmed reports of avian influenza A(H5) or avian influenza A(H7N9) in poultry / wild birds / environmental samples since 2015

| | No. of reports of H5 in poultry / wild birds / environmental samples | No. of reports of H7N9 in poultry / wild birds / environmental samples | Details |
|--------------------------|--|--|--|
| In this reporting period | 1* | 0 | A carcass of a black-faced spoonbill found in Mai Po Nature Reserve was suspected to be positive for |

^{*}The latest case imported from Mainland China

| | No. of reports of H5 in poultry / wild birds / environmental samples | No. of reports of H7N9 in poultry / wild birds / environmental samples | Details |
|---|--|--|--|
| | | | avian influenza A(H5) virus based on preliminary testing. Further confirmatory tests are being conducted. |
| Previously reported cases since 2015 (before this reporting period) | 21* | 1# | - |

^{*} Carcass of a peregrine falcon found in Yuen Long on April 9, 2015 (H5N6)

Carcass of a great egret found in Wong Tai Sin on December 31, 2015 (H5N6).

Chicken carcass found in Tuen Mun on February 14, 2016 (H5N6)

Chicken carcass found in Tai O on February 18, 2016 (H5N6)

Samples of faecal droppings collected at Mai Po Nature Reserve on November 25, 2016 (H5N6)

A sample of faecal droppings collected at Mai Po Nature Reserve on November 30, 2016 (H5N6)

A dead red-whiskered bulbul collected at Kowloon City on April 7, 2017 (H5N6)

A dead oriental magpie robin found in Tseung Kwan O on December 21, 2017 (H5N6)

A dead black-faced spoonbill found in the Hong Kong Wetland Park in Tin Shui Wai on December 21, 2017 (H5N6)

An environmental swab of a chopping board and skin swabs of a chilled duck sample taken from a fresh provision shop in Wan Chai on 2 January & 9 January, 2018 (H5N6)

An oropharyngeal swab from a batch of chilled chicken taken at a fresh provision shop in Mong Kok, reported on 23 January, 2018 (H5N6)

A black-headed gull carcass found in Ngau Hom Tsuen, Lau Fau Shan on February 8, 2018 (H5N6)

A dead crested myna found at Kun Lung Wai, Fanling reported on April 9, 2018 (H5N6)

A swab sample taken from a bird cage housing a hill myna at a pet bird shop in Yuen Po Street Bird Garden in Mong Kok on 7 April, 2018 (H5N6)

Samples of faecal droppings collected at Mai Po Nature Reserve reported on January 14, 2021 (H5N8)

Carcass of a peregrine falcon found in Wu Kai Sha reported on February 1, 2021 (H5N8)

Carcass of a black-faced spoonbill found in the Hong Kong Wetland Park in Tin Shui Wai reported on December 20, 2021 (H5N1)

Carcass of a Eurasian Curlew found in the Mai Po Nature Reserve reported on January 26, 2022 (H5N1)

Environmental sample collected from Mai Po Nature Reserve on November 9, 2022 (H5N1)

Carcass of a black-faced spoonbill found in Mai Po Nature Reserve reported on November 24, 2022 (H5)

A sample of faecal droppings of live poultry taken from a poultry stall in Yan Oi Market in Tuen Mun reported on June 5, 2016 (H7N9)

Table 9. Outside Hong Kong: Confirmed avian influenza A(H5) or other highly pathogenic avian influenza in poultry / wild birds / environmental samples reported in this week – number of reports for various subtypes of virus

| Subtype of virus | No. of reports |
|------------------|----------------|
| H5 | 1 |
| H5N1 | 51 |

Carcass of an oriental magpie robin found in Sai Kung on April 29, 2015 (H5N6)

Carcass of an oriental magpie robin found in Kwai Chung on November 17, 2015 (H5N6)

Table 10. Outside Hong Kong: Confirmed avian influenza A(H5) or other highly pathogenic avian influenza in poultry / wild birds / environmental samples reported in this week – details of reports

| Places of Occurrence | Details | OIE Report Date |
|-------------------------|---|---|
| France | Samples from poultry and birds in Centre-Val de Loire, Auvergne-Rhône-Alpes, Normandie, Pays de la Loire, Bretagne, Grand Est, Occitanie, Île-de-France, Nouvelle-Aquitaine and Hauts-de-France were tested positive for highly pathogenic avian influenza A(H5N1). | November 18, 2022 November 25, 2022 November 26, 2022 |
| | Samples from birds in Provence-Alpes-Côte d'Azur were tested positive for highly pathogenic avian influenza A(H5N1). | November 26, 2022 |
| | Samples from poultry in Monaghan were tested positive for highly pathogenic avian influenza A(H5N1). | November 18, 2022 November 23, 2022 |
| Ireland | Samples from birds in Offaly, Cork and Laoighis were tested positive for highly pathogenic avian influenza A(H5N1). | November 18, 2022 November 22, 2022 November 25, 2022 |
| Canada | Samples from poultry and birds in Saskatchewan, Ontario, Manitoba, British Columbia, Alberta and Québec were tested positive for highly pathogenic avian influenza A(H5N1). | November 19, 2022 November 24, 2022 |
| | Samples from birds in Newfoundland and Labrador, New Brunswick, Nova Scotia, Prince Edward Island, Nunavut, Yukon and Northwest Territories were tested positive for highly pathogenic avian influenza A(H5N1). | November 24, 2022 |
| Colombia | Samples from birds in Sucre, Bolívar and Chocó were tested positive for highly pathogenic avian influenza A(H5N1). | November 19, 2022 |
| Mexico | Samples from birds in México, Puebla, Jalisco, Baja California and Aguascalientes were tested positive for highly pathogenic avian influenza A(H5N1). | |
| United Kingdom | Samples from poultry and birds in England, Wales and Scotland were tested positive for highly pathogenic avian influenza A(H5N1). | November 19, 2022 November 26, 2022 |
| | Samples from birds in United Kingdom Exclusive Economic Zone were tested positive for highly pathogenic avian influenza A(H5N1). | November 19, 2022 |
| | Samples from poultry in Northern Ireland were tested | November 26, 2022 |

| Places of Occurrence | Details | OIE Report Date | |
|-------------------------|--|--|--|
| | positive for highly pathogenic avian influenza A(H5N1). | | |
| Belgium | Samples from birds in Vlaanderen, Wallonie and Belgian Exclusive Economic Zone were tested positive for highly pathogenic avian influenza A(H5N1). | November 21, 2022 November 24, 2022 November 25, 2022 November 28, 2022 | |
| Germany | Samples from poultry in Niedersachsen and Nordrhein-Westfalen were tested positive for highly pathogenic avian influenza A(H5N1). | November 22, 2022 November 28, 2022 | |
| | Samples from poultry and birds in Bács-Kiskun were tested positive for highly pathogenic avian influenza A(H5N1). | November 22, 2022 November 23, 2022 | |
| Hungary | Samples from poultry in Csongrád-Csanád were tested positive for highly pathogenic avian influenza A(H5N1). | November 22, 2022 | |
| Hungary | Samples from birds in Somogy, Tolna, Csongrád, Komárom-Esztergom, Fejér, Gyor-Moson-Sopron, Szabolcs-Szatmár-Bereg, Hajdú-Bihar, Pest, Borsod-Abaúj-Zemplén, Budapest, Vas and Baranya were tested positive for highly pathogenic avian influenza A(H5N1). | November 22, 2022 | |
| Latvia | Samples from birds in Rīgas were tested positive for highly pathogenic avian influenza A(H5N1). | November 22, 2022 | |
| South Africa | Samples from poultry in Gauteng, Western Cape, KwaZulu-Natal, Free State and Eastern Cape were tested positive for highly pathogenic avian influenza A(H5N1). | November 22, 2022 | |
| Israel | Samples from poultry in HaMerkaz and HaZafon were tested positive for highly pathogenic avian influenza A(H5N1). | November 23, 2022 November 27, 2022 | |
| | Samples from poultry and birds in Lombardia, Veneto and Emilia-Romagna were tested positive for highly pathogenic avian influenza A(H5N1). | November 23, 2022 | |
| Italy | Samples from poultry in Friuli-Venezia Giulia were tested positive for highly pathogenic avian influenza A(H5N1). | November 23, 2022 | |
| | Samples from birds in Italian Exclusive Economic Zone and Sardegna were tested positive for highly pathogenic avian influenza A(H5N1). | November 23, 2022 | |
| Portugal | Samples from birds in Leiria were tested positive for | November 23, 2022 | |

| Places of Occurrence | Details | OIE Report Date |
