

Avian Influenza Report

Avian Influenza Report is a weekly report produced by the Surveillance Division of the Communicable Disease Branch of the Centre for Health Protection. This report highlights global avian influenza activity in humans and birds.

VOLUME 19, NUMBER 19

Reporting period: May 7, 2023 – May 13, 2023 (Week 19)

(Published on May 16, 2023)

Summary

1. Since the previous issue of Avian Influenza Report (AIR), there were no new human cases of avian influenza A(H7N9). Since March 2013 (as of May 13, 2023), there were a total of 1568 human cases of avian influenza A(H7N9) reported globally (all were reported in the seven waves between 2013 and September 2019). The latest case was reported on April 5, 2019.
2. Since the previous issue of AIR, there were no new human cases of avian influenza A(H5N6). Since 2014 (as of May 13 2023), there were 84 human cases of avian influenza A(H5N6) reported globally and 83 of them occurred in Mainland China. The latest case was reported on February 28, 2023.
3. Since the previous issue of AIR, there were no new human cases of avian influenza A(H5N1). From 2013 to 2022, 0 to 145 confirmed human cases of avian influenza A(H5N1) were reported to the World Health Organization (WHO) annually (according to onset date).* The latest case was reported on April 6, 2023.

* Since November 21, 2012, WHO only publishes information on human cases with avian influenza A(H5N1) infection in “[Influenza at human – animal interface: Monthly Risk Assessment Summary](#)”. Only cases of human infection with H5N1 involved in events that are unusual or associated with potential increased risks will be reported in Disease Outbreak News. The latest [report](#) was published in April, 2023.

This week's highlights

- [Carcass of a black-faced spoonbill found in Mai Po Nature Reserve reported on November 30, 2022 \(H5N1\)](#)
- [Black-faced spoonbill carcass found in Hong Kong Wetland Park reported on December 12, 2022 \(H5N1\)](#)
- # [A sample of faecal droppings of live poultry taken from a poultry stall in Yan Oi Market in Tuen Mun reported on June 5, 2016 \(H7N9\)](#)

Table 9. Outside Hong Kong: Confirmed avian influenza A(H5) or other highly pathogenic avian influenza in poultry / wild birds / environmental samples reported in this week – number of reports for various subtypes of virus

Subtype of virus	No. of reports
H5	2
H5N1	42

Table 10. Outside Hong Kong: Confirmed avian influenza A(H5) or other highly pathogenic avian influenza in poultry / wild birds / environmental samples reported in this week – details of reports¹

Places of Occurrence	Details	OIE Report Date
Hungary	Samples from poultry and birds in Bács-Kiskun, Békés and Hajdú-Bihar were tested positive for highly pathogenic avian influenza A(H5N1).	May 9, 2023 May 11 2023 May 12, 2023
	Samples from poultry in Csongrád-Csanád and Nógrád were tested positive for highly pathogenic avian influenza A(H5N1).	May 9, 2023
	Samples from birds in Fejér, Veszprém, Győr-Moson-Sopron, Pest, Budapest, Jász-Nagykun-Szolnok, Szabolcs-Szatmár-Bereg, Borsod-Abaúj-Zemplén, Somogy, Tolna, Csongrád, Komárom-Esztergom, Vas and Baranya were tested	May 11 2023 May 12 2023

Places of Occurrence	Details	OIE Report Date
	positive for highly pathogenic avian influenza A(H5N1).	
India	Samples from poultry in Bihar were tested positive for highly pathogenic avian influenza A(H5N1).	May 9, 2023
Taiwan	Samples from poultry and birds in Changhua County and Yunlin County were tested positive for highly pathogenic avian influenza A(H5N1).	May 9, 2023
	Samples from poultry in Hsinchu City, Taipei City, Taichung City, Pingtung County, Chiayi County and Tainan City were tested positive for highly pathogenic avian influenza A(H5N1).	May 9, 2023
	Samples from birds in Chiayi County, Hualien County and Kaohsiung City were tested positive for highly pathogenic avian influenza A(H5N1).	May 9, 2023
Belgium	Samples from birds in Vlaanderen and Wallonie were tested positive for highly pathogenic avian influenza A(H5N1).	May 10, 2023
Italy	Samples from poultry and birds in Veneto, Emilia-Romagna and Lombardia were tested positive for highly pathogenic avian influenza A(H5N1).	May 10, 2023
	Samples from birds in Trento, Italian Exclusive Economic Zone and Friuli-Venezia Giulia were tested positive for highly pathogenic avian influenza A(H5N1).	May 10, 2023
Poland	Samples from poultry and birds in Warmińsko-Mazurskie, Pomorskie, Kujawsko-Pomorskie and Wielkopolskie were tested positive for highly pathogenic avian influenza A(H5N1).	May 10, 2023 May 12, 2023
	Samples from birds in Mazowieckie, Dolnośląskie, Świętokrzyskie, Lubelskie, Śląskie, Opolskie, Łódzkie, Małopolskie, Polish Exclusive Economic Zone and Podkarpackie were tested positive for highly pathogenic avian influenza A(H5N1).	May 10, 2023 May 12, 2023
United States of America	Samples from poultry and birds in California, Pennsylvania, South Dakota, Virginia, Mississippi, Nebraska, Washington, Illinois, New York, Alaska, Minnesota, North Dakota, Wisconsin, New Jersey, Indiana, Colorado, Florida, Tennessee, Kansas, Oregon, Missouri, Iowa, Michigan, Utah, Ohio, New Hampshire, North Carolina, Maryland, Arkansas, Idaho, Montana,	May 10, 2023 May 11, 2023

Places of Occurrence	Details	OIE Report Date
	Nevada, Oklahoma and Texas were tested positive for highly pathogenic avian influenza A(H5N1).	
	Samples from birds in Vermont, Alabama, West Virginia, South Carolina, Arizona, Wyoming, New Mexico, Louisiana and District of Columbia were tested positive for highly pathogenic avian influenza A(H5N1).	May 11, 2023
Canada	Samples from poultry and birds in Québec, Ontario, Saskatchewan, Alberta, British Columbia, Nova Scotia, Manitoba and New Brunswick were tested positive for highly pathogenic avian influenza A(H5N1).	May 11, 2023
	Samples from birds in Newfoundland and Labrador, Prince Edward Island were tested positive for highly pathogenic avian influenza A(H5N1).	May 11, 2023
Germany	Samples from birds in Baden-Württemberg, Mecklenburg-Vorpommern, Niedersachsen, Nordrhein-Westfalen, Sachsen, Sachsen-Anhalt, Schleswig-Holstein and Thüringen were tested positive for highly pathogenic avian influenza A(H5N1).	May 11, 2023
Latvia	Samples from birds in Latgales were tested positive for highly pathogenic avian influenza A(H5N1).	May 11, 2023
Argentina	Samples from poultry and birds in Buenos Aires, Neuquén, Chubut, Río Negro, Córdoba and Santa Fe were tested positive for highly pathogenic avian influenza A(H5).	May 12, 2023
	Samples from birds in Formosa, Chaco, La Pampa, Corrientes, Mendoza, Santa Cruz, San Luis and Santiago del Estero were tested positive for highly pathogenic avian influenza A(H5).	May 12, 2023
France	Samples from poultry and birds in Occitanie, Pays de la Loire, Centre-Val de Loire, Auvergne-Rhône-Alpes, Île-de-France, Grand Est, Normandie, Hauts-de-France, Bretagne and Nouvelle-Aquitaine were tested positive for highly pathogenic avian influenza A(H5N1).	May 12, 2023
Indonesia	Samples from poultry in Kalimantan Selatan were tested positive for highly pathogenic avian influenza A(H5N1).	May 12, 2023
Lithuania	Samples from birds in Klaipėdos, Vilniaus, Panevezio, Marijampolės, Šiauliai and Alytaus were tested positive for highly pathogenic avian influenza A(H5N1).	May 12, 2023

Places of Occurrence	Details	OIE Report Date
Russia	Samples from birds in Amur, Udmurt, Kirov, Mariy-El, Kaluga and Smolensk were tested positive for highly pathogenic avian influenza A(H5N1).	May 12, 2023 May 15, 2023
Turkey	Samples from poultry in Denizli and Afyon were tested positive for highly pathogenic avian influenza A(H5N1).	May 12, 2023
United Kingdom	Samples from poultry and birds in England, Wales and Scotland were tested positive for highly pathogenic avian influenza A(H5N1).	May 12, 2023
Czech Republic	Samples from poultry and birds in Moravskoslezský were tested positive for highly pathogenic avian influenza A(H5N1).	May 15, 2023
	Samples from birds in Plzeňský, Ústecký, Jihomoravský, Pardubický, Královéhradecký, Středočeský, Jihočeský, Kraj Vysočina, Prague and Zlínský were tested positive for highly pathogenic avian influenza A(H5N1).	May 15, 2023

For cumulative reports of avian influenza A(H5) or other highly pathogenic avian influenza in poultry / wild birds, please refer to the [OIE](#) website.
