

Avian Influenza Report

Avian Influenza Report is a weekly report produced by the Surveillance Division of the Communicable Disease Branch of the Centre for Health Protection. This report highlights global avian influenza activity in humans and birds.

VOLUME 19, NUMBER 51

Reporting period: Dec 17, 2023 – Dec 23, 2023 (Week 51)

(Published on Dec 27, 2023)

Summary

1. Since the previous issue of Avian Influenza Report (AIR), there were no new human cases of avian influenza A(H7N9). Since March 2013 (as of Dec 23, 2023), there were a total of 1568 human cases of avian influenza A(H7N9) reported globally (all were reported in the seven waves between 2013 and September 2019). The latest case was reported on April 5, 2019.
2. Since the previous issue of AIR, one confirmed human case of avian influenza A(H5N6) in Sichuan Province was reported by the National Health Commission (NHC). Since 2014 (as of Dec 23, 2023), there were 89 human cases of avian influenza A(H5N6) reported globally and 88 of them occurred in Mainland China. The latest case was reported on December 22, 2023.
3. Since the previous issue of AIR, there were no new human cases of avian influenza A(H5N1). From 2013 to 2022, 0 to 145 confirmed human cases of avian influenza A(H5N1) were reported to the World Health Organization (WHO) annually (according to onset date).* The latest case was reported on November 25, 2023.

* Since November 21, 2012, WHO only publishes information on human cases with avian influenza A(H5N1) infection in “[Influenza at human – animal interface: Monthly Risk Assessment Summary](#)”. Only cases of human infection with H5N1 involved in events that are unusual or associated with potential increased risks will be reported in Disease Outbreak News. The latest [report](#) was published in December, 2023.

Places of Occurrence	Details	OIE Report Date
Brazil	Samples from birds in São Paulo were tested positive for highly pathogenic avian influenza A(H5N1).	December 15, 2023
	Samples from poultry in Santa Catarina and Brazilian Exclusive Economic Zone were tested positive for highly pathogenic avian influenza A(H5N1).	December 22, 2023
Ecuador	Samples from poultry in Tungurahua, Cotopaxi, Pichincha and Guayas were tested positive for highly pathogenic avian influenza A(H5N1).	December 16, 2023 December 26, 2023
Romania	Samples from birds in Tulcea and Ilfov were tested positive for highly pathogenic avian influenza A(H5N1).	December 18, 2023 December 22, 2023
	Samples from poultry in Olt were tested positive for highly pathogenic avian influenza A(H5N1).	December 26, 2023
Belgium	Samples from birds in Vlaanderen were tested positive for highly pathogenic avian influenza A(H5N1).	December 19, 2023
France	Samples from birds in Occitanie, Normandie, Bourgogne-Franche-Comté, Provence-Alpes-Côte d'Azur, Bretagne and Grand Est were tested positive for	December 19, 2023

Places of Occurrence	Details	OIE Report Date
	highly pathogenic avian influenza A(H5N1).	
	Samples from poultry in Hauts-de-France and Bretagne were tested positive for highly pathogenic avian influenza A(H5).	December 22, 2023
Germany	Samples from poultry and birds in Niedersachsen were tested positive for highly pathogenic avian influenza A(H5N1).	December 19, 2023 December 21, 2023 December 22, 2023
	Samples from poultry in Nordrhein-Westfalen, Sachsen-Anhalt, Schleswig-Holstein and Mecklenburg-Vorpommern were tested positive for highly pathogenic avian influenza A(H5N1).	December 19, 2023 December 21, 2023 December 22, 2023
Moldova	Samples from birds in Drochia, Ungheni, Chişinău, Dubăsari, Rezina, Rîşcani, Sîngerei, Anenii Noi, Criuleni and Făleşti were tested positive for highly pathogenic avian influenza A(H5N1).	December 19, 2023 December 20, 2023 December 22, 2023 December 26, 2023
Hungary	Samples from poultry and birds in Komárom-Esztergom were tested positive for highly pathogenic avian influenza A(H5N1).	December 20, 2023
	Samples from poultry in Békés, Győr-Moson-Sopron and Szabolcs-Szatmár-Bereg were tested positive for highly pathogenic avian influenza A(H5N1).	December 20, 2023 December 22, 2023
	Samples from birds in Hajdú-Bihar, Borsod-Abaúj-Zemplén, Csongrád-Csanád and Fejér were tested positive for highly pathogenic avian influenza A(H5N1).	December 20, 2023
Italy	Samples from poultry in Apulia were tested positive for highly pathogenic avian influenza A(H5N1).	December 20, 2023
	Samples from birds in Emilia-Romagna and Veneto were tested positive for highly pathogenic avian influenza A(H5N1).	December 20, 2023
Poland	Samples from poultry and birds in Kujawsko-Pomorskie were tested positive for highly pathogenic avian influenza A(H5N1).	December 20, 2023 December 22, 2023
	Samples from poultry in Mazowieckie were tested positive for highly pathogenic avian influenza A(H5N1).	December 20, 2023

Places of Occurrence	Details	OIE Report Date
Canada	Samples from poultry and birds in British Columbia were tested positive for highly pathogenic avian influenza A(H5N1).	December 21, 2023
	Samples from poultry in Alberta, Saskatchewan and Québec were tested positive for highly pathogenic avian influenza A(H5N1).	December 21, 2023
Colombia	Samples from birds in Bolívar were tested positive for highly pathogenic avian influenza A(H5).	December 21, 2023
Iceland	Samples from birds in Suðurland were tested positive for highly pathogenic avian influenza A(H5N5).	December 21, 2023
Spain	Samples from birds in Castilla y León, Cantabria, Aragón, Galicia, Cataluña, Comunitat Valenciana, País Vasco and Castilla - La Mancha were tested positive for highly pathogenic avian influenza A(H5N1).	December 21, 2023
		December 26, 2023
Sweden	Samples from birds in Malmö and Lomma were tested positive for highly pathogenic avian influenza A(H5N1).	December 21, 2023
United States of America	Samples from poultry and birds in Kansas, California, Alabama and Minnesota were tested positive for highly pathogenic avian influenza A(H5N1).	December 21, 2023
	Samples from poultry in Michigan, South Dakota, Idaho, Ohio, Iowa, North Dakota and New York were tested positive for highly pathogenic avian influenza A(H5N1).	December 21, 2023
	Samples from birds in Oregon, Arkansas, Colorado and Missouri were tested positive for highly pathogenic avian influenza A(H5N1).	December 21, 2023
Russia	Samples from birds in Kaliningrad were tested positive for highly pathogenic avian influenza A(H5N1).	December 22, 2023
United Kingdom	Samples from birds in England were tested positive for highly pathogenic avian influenza A(H5N1).	December 22, 2023
Ukraine	Samples from birds in Chernivtsi were tested positive for highly pathogenic avian influenza A(H5).	December 24, 2023
Japan	Samples from birds in Saga were tested positive for highly pathogenic avian influenza A(H5N6).	December 26, 2023

Places of Occurrence	Details	OIE Report Date
Korea	Samples from poultry in Jeollanam-do were tested positive for highly pathogenic avian influenza A(H5N1).	December 26, 2023
