

Avian Influenza Report

Avian Influenza Report is a weekly report produced by the Surveillance Division of the Communicable Disease Branch of the Centre for Health Protection. This report highlights global avian influenza activity in humans and birds.

VOLUME 20, NUMBER 40

Reporting period: Sep 29, 2024 – Oct 5, 2024 (Week 40)

(Published on October 8, 2024)

Summary

1. Since the previous issue of Avian Influenza Report (AIR), there were no new human cases of avian influenza A(H7N9). Since March 2013 (as of October 5, 2024), there were a total of 1568 human cases of avian influenza A(H7N9) reported globally (all were reported in the seven waves between 2013 and September 2019). The latest case was reported on April 5, 2019.
2. Since the previous issue of AIR, there were no new human cases of avian influenza A(H5N6). Since 2014 (as of October 5, 2024), there were 93 human cases of avian influenza A(H5N6) reported globally and 92 of them occurred in Mainland China. The latest case was reported on July 24, 2024.
3. Since the previous issue of AIR, there were no new human cases of avian influenza A(H5N1). From 2014 to 2023, 0 to 145 confirmed human cases of avian influenza A(H5N1) were reported to the World Health Organization (WHO) annually (according to onset date).* The latest case was reported on September 13, 2024.

* Since November 21, 2012, WHO only publishes information on human cases with avian influenza A(H5N1) infection in “[Influenza at human – animal interface: Monthly Risk Assessment Summary](#)”. Only cases of human infection with H5N1 involved in events that are unusual or associated with potential increased risks will be reported in Disease Outbreak News. The latest [report](#) was published in August, 2024.

This week's highlights

Table 9. Outside Hong Kong: Confirmed avian influenza A(H5) or other highly pathogenic avian influenza in poultry / wild birds / environmental samples reported in this week – number of reports for various subtypes of virus

Subtype of virus	No. of reports
H5	2
H5N1	16
H5N5	3
H7N6	1

Table 10. Outside Hong Kong: Confirmed avian influenza A(H5) or other highly pathogenic avian influenza in poultry / wild birds / environmental samples reported in this week – details of reports

Places of Occurrence	Details	OIE Report Date
Faroe Islands	Samples from birds in Streymoyar were tested positive for highly pathogenic avian influenza A(H5N5).	September 27, 2024
France	Samples from birds in Hauts-de-France were tested positive for highly pathogenic avian influenza A(H5N1).	September 27, 2024
	Samples from poultry in Bretagne were tested positive for highly pathogenic avian influenza A(H5).	September 30, 2024

Places of Occurrence	Details	OIE Report Date
Germany	Samples from poultry in Sachsen were tested positive for highly pathogenic avian influenza A(H5N1).	September 27, 2024
Serbia	Samples from birds in Južno-Bački were tested positive for highly pathogenic avian influenza A(H5N1).	September 27, 2024
United Kingdom	Samples from birds in Scotland and England were tested positive for highly pathogenic avian influenza A(H5N5).	September 27, 2024 October 4, 2024
Moldova	Samples from birds in Nisporeni and Edineț were tested positive for highly pathogenic avian influenza A(H5N1).	September 30, 2024 October 1, 2024 October 3, 2024 October 7, 2024
South Africa	Samples from poultry in Gauteng and Eastern Cape were tested positive for highly pathogenic avian influenza A(H7N6).	September 30, 2024
Hungary	Samples from birds in Fejér, Hajdú-Bihar, Veszprém, Borsod-Abaúj-Zemplén and Komárom-Esztergom were tested positive for highly pathogenic avian influenza A(H5N1).	October 1, 2024 October 4, 2024
	Samples from poultry in Békés and Jász-Nagykun-Szolnok were tested positive for highly pathogenic avian influenza A(H5N1).	October 2, 2024 October 4, 2024
Spain	Samples from birds in Galicia were tested positive for highly pathogenic avian influenza A(H5N1).	October 1, 2024 October 7, 2024
Italy	Samples from poultry in Veneto were tested positive for highly pathogenic avian influenza A(H5N1).	October 2, 2024
United States of America	Samples from poultry in Idaho were tested positive for highly pathogenic avian influenza A(H5N1).	October 3, 2024
Japan	Samples from birds in Hokkaido were tested positive for highly pathogenic avian influenza A(H5).	October 4, 2024
Poland	Samples from poultry in Dolnośląskie were tested positive for highly pathogenic avian influenza A(H5N1).	October 7, 2024

For cumulative reports of avian influenza A(H5) or other highly pathogenic avian influenza in poultry / wild birds, please refer to the [WOAH](#) website.
