

Avian Influenza Report

Avian Influenza Report is a weekly report produced by the Surveillance Division of the Communicable Disease Branch of the Centre for Health Protection. This report highlights global avian influenza activity in humans and birds.

VOLUME 21, NUMBER 36

Reporting period: August 31, 2025 – September 6, 2025 (Week 36)

(Published on September 9, 2025)

Summary

1. Since the previous issue of Avian Influenza Report (AIR), there were no new human cases of avian influenza A(H5N1). From 2015 to 2024, 0 to 145 confirmed human cases of avian influenza A(H5N1) were reported to the World Health Organization (WHO) annually (according to onset date).* The latest case was reported on August 5, 2025.
2. Since the previous issue of AIR, there were no new human cases of avian influenza A(H5N6). Since 2014 (as of September 6, 2025), there were 93 human cases of avian influenza A(H5N6) reported globally and 92 of them occurred in Mainland China. The latest case was reported on July 24, 2024.
3. Since the previous issue of AIR, there were no new human cases of avian influenza A(H7N9). Since March 2013 (as of September 6, 2025), there were a total of 1568 human cases of avian influenza A(H7N9) reported globally (all were reported in the seven waves between 2013 and September 2019). The latest case was reported on April 5, 2019.

* Since November 21, 2012, WHO only publishes information on human cases with avian influenza A(H5N1) infection in “[Influenza at human – animal interface: Monthly Risk Assessment Summary](#)”. Only cases of human infection with H5N1 involved in events that are unusual or associated with potential increased risks will be reported in Disease Outbreak News. The latest [report](#) was published in July 2025.

This week's highlights

Table 9. Outside Hong Kong: Confirmed avian influenza A(H5) or other highly pathogenic avian influenza in poultry / wild birds / environmental samples reported in this week – number of reports for various subtypes of virus

Subtype of virus	No. of reports
H5	3
H5N1	21

Table 10. Outside Hong Kong: Confirmed avian influenza A(H5) or other highly pathogenic avian influenza in poultry / wild birds / environmental samples reported in this week – details of reports

Places of Occurrence	Details	OIE Report Date
Bolivia	Samples from birds in Santa Cruz were tested positive for highly pathogenic avian influenza A(H5).	September 1, 2025
Argentina	Samples from poultry in Buenos Aires were tested positive for highly pathogenic avian influenza A(H5N1).	September 2, 2025
	Samples from birds in Entre rios were tested positive for highly pathogenic avian influenza A(H5N1).	September 3, 2025
Norway	Samples from birds in Nordland were tested positive for highly pathogenic avian influenza A(H5) and A(H5N1) .	September 2, 2025 September 3, 2025 September 5, 2025
	Samples from birds in Troms Og Finnmark were tested positive for highly pathogenic avian influenza A(H5N1).	September 2, 2025
	Samples from poultry in Nordland were tested positive for highly pathogenic avian influenza A(H5N1).	September 5, 2025
South Africa	Samples from poultry and birds in Western Cape were tested positive for highly pathogenic avian influenza A(H5N1).	September 2, 2025 September 8, 2025
	Samples from poultry in Eastern Cape were tested positive for highly pathogenic avian influenza A(H5N1).	September 2, 2025
Brazil	Samples from birds in Rio de Janeiro were tested positive for highly pathogenic avian influenza A(H5N1).	September 3, 2025
Germany	Samples from poultry and birds in Schleswig-Holstein were tested positive for highly pathogenic avian influenza A(H5N1).	September 3, 2025 September 5, 2025
	Samples from birds in Bayern and Niedersachsen were tested positive for highly pathogenic avian influenza A(H5N1).	September 5, 2025
Netherlands	Samples from birds in Dutch Exclusive Economic Zone, Noord-Holland and Zeeland were tested positive for highly pathogenic avian influenza A(H5N1).	September 3, 2025
Portugal	Samples from poultry in Santarém were tested positive for highly pathogenic avian influenza A(H5N1).	September 3, 2025

Places of Occurrence	Details	OIE Report Date
Spain	Samples from poultry in Andalucía were tested positive for highly pathogenic avian influenza A(H5N1).	September 5, 2025
Taiwan	Samples from poultry in Changhua County were tested positive for highly pathogenic avian influenza A(H5N1).	September 5, 2025
United Kingdom	Samples from poultry and birds in England were tested positive for highly pathogenic avian influenza A(H5N1).	September 5, 2025
United States of America	Samples from poultry in North Dakota were tested positive for highly pathogenic avian influenza A(H5N1).	September 5, 2025
	Samples from birds in Maryland and Iowa were tested positive for highly pathogenic avian influenza A(H5N1).	September 5, 2025

For cumulative reports of avian influenza A(H5) or other highly pathogenic avian influenza in poultry / wild birds, please refer to the [WOAH](#) website.
