

Avian Influenza Report

Avian Influenza Report is a weekly report produced by the Surveillance Division of the Communicable Disease Branch of the Centre for Health Protection. This report highlights global avian influenza activity in humans and birds.

VOLUME 21, NUMBER 41

Reporting period: October 5, 2025 – October 11, 2025 (Week 41)

(Published on October 14, 2025)

Summary

1. Since the previous issue of Avian Influenza Report (AIR), there were no new human cases of avian influenza A(H5N1). From 2015 to 2024, 0 to 145 confirmed human cases of avian influenza A(H5N1) were reported to the World Health Organization (WHO) annually (according to onset date).* The latest case was reported on August 5, 2025.
2. Since the previous issue of AIR, there were no new human cases of avian influenza A(H5N6). Since 2014 (as of October 11, 2025), there were 93 human cases of avian influenza A(H5N6) reported globally and 92 of them occurred in the Chinese Mainland. The latest case was reported on July 24, 2024.
3. Since the previous issue of AIR, there were no new human cases of avian influenza A(H7N9). Since March 2013 (as of October 11, 2025), there were a total of 1568 human cases of avian influenza A(H7N9) reported globally (all were reported in the seven waves between 2013 and September 2019). The latest case was reported on April 5, 2019.

* Since November 21, 2012, WHO only publishes information on human cases with avian influenza A(H5N1) infection in “[Influenza at human – animal interface: Monthly Risk Assessment Summary](#)”. Only cases of human infection with H5N1 involved in events that are unusual or associated with potential increased risks will be reported in Disease Outbreak News. The latest [report](#) was published in September 2025.

This week's highlights

[A dead crested myna found at Kun Lung Wai, Fanling reported on April 9, 2018 \(H5N6\)](#)
[A swab sample taken from a bird cage housing a hill myna at a pet bird shop in Yuen Po Street Bird Garden in Mong Kok on April 7, 2018 \(H5N6\)](#)
[Samples of faecal droppings collected at Mai Po Nature Reserve reported on January 14, 2021 \(H5N8\)](#)
[Carcass of a peregrine falcon found in Wu Kai Sha reported on February 1, 2021 \(H5N8\)](#)
[Carcass of a black-faced spoonbill found in the Hong Kong Wetland Park in Tin Shui Wai reported on December 20, 2021 \(H5N1\)](#)
[Carcass of a Eurasian Curlew found in the Mai Po Nature Reserve reported on January 26, 2022 \(H5N1\)](#)
[Environmental sample collected from Mai Po Nature Reserve reported on November 16, 2022 \(H5N1\)](#)
[Carcass of a black-faced spoonbill found in Mai Po Nature Reserve reported on November 30, 2022 \(H5N1\)](#)
[Black-faced spoonbill carcass found in Hong Kong Wetland Park reported on December 12, 2022 \(H5N1\)](#)
[Environmental sample from Mai Po Nature Reserve reported on December 8, 2023 \(H5N1\)](#)
[Eurasian teal carcass found in the Mai Po Nature Reserve reported on December 21, 2023 \(H5N1\)](#)
[Pin-tailed snipe and Eurasian teal carcasses found in the Hong Kong Wetland Park reported on December 28, 2023 \(H5N1\)](#)
[Eurasian wigeon carcass found in the Hong Kong Wetland Park, reported on January 5, 2024 \(H5N1\)](#)
[Eurasian wigeon sample collected from the Hong Kong Wetland Park, reported on January 5, 2024 \(H5N1\)](#)
[Environmental sample collected from Mai Po Nature Reserve reported on November 8, 2024 \(H5N1\)](#)
[Eurasian wigeon sample and environmental sample collected from Mai Po Nature Reserve reported on November 14, 2024 \(H5N1\)](#)
- # [A sample of faecal droppings of live poultry taken from a poultry stall in Yan Oi Market in Tuen Mun reported on June 5, 2016 \(H7N9\)](#)

Table 9. Outside Hong Kong: Confirmed avian influenza A(H5) or other highly pathogenic avian influenza in poultry / wild birds / environmental samples reported in this week – number of reports for various subtypes of virus

Subtype of virus	No. of reports
H5	4
H5N1	33
H5N5	1

Table 10. Outside Hong Kong: Confirmed avian influenza A(H5) or other highly pathogenic avian influenza in poultry / wild birds / environmental samples reported in this week – details of reports

Places of Occurrence	Details	OIE Report Date
Denmark	Samples from birds in Veterinary Inspection Unit East were tested positive for highly pathogenic avian influenza A(H5N1).	October 6, 2025
	Samples from poultry in Veterinary Inspection Unit South were tested positive for highly pathogenic avian influenza A(H5N1).	October 8, 2025
France	Samples from birds in Bretagne, French Exclusive Economic Zone, Hauts-de-France, Nouvelle-Aquitaine and Pays de la Loire were tested positive for highly pathogenic avian influenza A(H5N1).	October 6, 2025
Germany	Samples from poultry in Schleswig-Holstein and Thüringen were tested positive for highly pathogenic avian influenza A(H5N1).	October 6, 2025 October 7, 2025 October 9, 2025
	Samples from poultry and birds in Bayern were tested positive for highly pathogenic avian influenza A(H5N1).	October 10, 2025
	Samples from birds in Rheinland-Pfalz were tested positive for highly pathogenic avian influenza A(H5N1).	October 10, 2025
Norway	Samples from birds in Svalbard and Jan Mayen were tested positive for highly pathogenic avian influenza A(H5N5).	October 6, 2025
	Samples from birds in Rogaland were tested positive for highly pathogenic avian influenza A(H5N1).	October 8, 2025
Spain	Samples from poultry in Castilla y León were tested positive for highly pathogenic avian influenza A(H5N1).	October 6, 2025
Iran	Samples from poultry in Ardebil were tested positive for highly pathogenic avian influenza A(H5N1).	October 7, 2025
Netherlands	Samples from poultry in Drenthe were preliminarily tested positive for highly pathogenic avian influenza A(H5) and subsequently confirmed positive for A(H5N1).	October 7, 2025 October 8, 2025
Poland	Samples from poultry in Warmińsko-Mazurskie and Wielkopolskie were tested positive for highly pathogenic avian influenza A(H5N1).	October 7, 2025 October 8, 2025 October 13, 2025

Places of Occurrence	Details	OIE Report Date
	Samples from birds in Dolnośląskie were tested positive for highly pathogenic avian influenza A(H5N1).	October 8, 2025
Portugal	Samples from birds in Aveiro were tested positive for highly pathogenic avian influenza A(H5N1).	October 7, 2025
Sweden	Samples from birds in Malmö were tested positive for highly pathogenic avian influenza A(H5N1).	October 7, 2025
Argentina	Samples from birds in Buenos Aires were tested positive for highly pathogenic avian influenza A(H5).	October 8, 2025
Bulgaria	Samples from poultry in Haskovo were preliminarily tested positive for highly pathogenic avian influenza A(H5) and subsequently confirmed positive for A(H5N1).	October 8, 2025 October 9, 2025
India	Samples from poultry in Uttar Pradesh were tested positive for highly pathogenic avian influenza A(H5N1).	October 8, 2025
	Samples from birds in NCT of Delhi were tested positive for highly pathogenic avian influenza A(H5N1).	October 8, 2025
Italy	Samples from poultry in Veneto were tested positive for highly pathogenic avian influenza A(H5N1).	October 9, 2025
United States of America	Samples from poultry in Minnesota were tested positive for highly pathogenic avian influenza A(H5) and A(H5N1).	October 9, 2025
	Samples from poultry and birds in Montana were tested positive for highly pathogenic avian influenza A(H5N1).	October 9, 2025
	Samples from poultry in Arizona, North Dakota, South Dakota and Wisconsin were tested positive for highly pathogenic avian influenza A(H5N1).	October 9, 2025
	Samples from birds in Idaho, Maryland, Michigan and North Carolina were tested positive for highly pathogenic avian influenza A(H5N1).	October 9, 2025
Slovakia	Samples from birds in Trnavský were tested positive for highly pathogenic avian influenza A(H5N1).	October 10, 2025

Places of Occurrence	Details	OIE Report Date
United Kingdom	Samples from poultry and birds in England were tested positive for highly pathogenic avian influenza A(H5N1).	October 10, 2025
	Samples from poultry in Northern Ireland were tested positive for highly pathogenic avian influenza A(H5N1).	October 10, 2025
	Samples from birds in Wales were tested positive for highly pathogenic avian influenza A(H5N1).	October 10, 2025
Austria	Samples from birds in Kärnten were tested positive for highly pathogenic avian influenza A(H5N1).	October 13, 2025

For cumulative reports of avian influenza A(H5) or other highly pathogenic avian influenza in poultry / wild birds, please refer to the [WOAH](#) website.
