

Avian Influenza Report

Avian Influenza Report is a weekly report produced by the Surveillance Division of the Communicable Disease Branch of the Centre for Health Protection. This report highlights global avian influenza activity in humans and birds.

VOLUME 22, NUMBER 7

Reporting period: February 8, 2026 – February 14, 2026 (Week 7)

(Published on February 16, 2026)

Summary

1. Since the previous issue of Avian Influenza Report (AIR), there was one new human case of avian influenza A(H5N1) from Cambodia reported by its Ministry of Health on February 14, 2026. From 2016 to 2025, 0 to 81 confirmed human cases of avian influenza A(H5N1) were reported to the World Health Organization (WHO) annually (according to onset date).*
2. Since the previous issue of AIR, there were no new human cases of avian influenza A(H5N6). Since 2014 (as of February 14, 2026), there were 93 human cases of avian influenza A(H5N6) reported globally and 92 of them occurred in the Chinese Mainland. The latest case was reported on July 24, 2024.
3. Since the previous issue of AIR, there were no new human cases of avian influenza A(H7N9). Since March 2013 (as of February 14, 2026), there were a total of 1568 human cases of avian influenza A(H7N9) reported globally (all were reported in the seven waves between 2013 and September 2019). The latest case was reported on April 5, 2019.

* Since November 21, 2012, WHO only publishes information on human cases with avian influenza A(H5N1) infection in “[Influenza at human – animal interface: Monthly Risk Assessment Summary](#)”. Only cases of human infection with H5N1 involved in events that are unusual or associated with potential increased risks will be reported in Disease Outbreak News. The latest [report](#) was published in February 2026.

This week's highlights

Places of Occurrence	Details	WOAH Report Date
Germany	Samples from birds and poultry in Nordrhein-Westfalen were tested positive for highly pathogenic avian influenza A(H5N1).	February 9, 2026 February 10, 2026
Czech Republic	Samples from birds in Jihomoravský, Moravskoslezský, Prague, Středočeský and Ústecký were tested positive for highly pathogenic avian influenza A(H5N1).	February 10, 2026 February 12, 2026 February 13, 2026
	Samples from birds and poultry in Královéhradecký were tested positive for highly pathogenic avian influenza A(H5N1).	February 12, 2026
Denmark	Samples from poultry in Veterinary Inspection Unit East were tested positive for highly pathogenic avian influenza A(H5N1).	February 10, 2026
Hungary	Samples from birds in Fejér, Hajdú-Bihar, Pest, Somogy, Szabolcs-Szatmár-Bereg, Veszprém and Zala were tested positive for highly pathogenic avian influenza A(H5N1).	February 10, 2026 February 11, 2026 February 12, 2026 February 13, 2026
Japan	Samples from birds in Ehime, Hokkaido, Kagoshima and Kumamoto were tested positive for highly pathogenic avian influenza A(H5N1).	February 10, 2026
Poland	Samples from birds and poultry in Dolnośląskie, Kujawsko-Pomorskie, Lubuskie, Śląskie and Wielkopolskie were tested positive for highly pathogenic avian influenza A(H5N1).	February 10, 2026 February 11, 2026 February 12, 2026 February 13, 2026
	Samples from birds in Łódzkie, Lubelskie, Małopolskie, Mazowieckie, Opolskie, Pomorskie, Warmińsko-Mazurskie and Zachodniopomorskie were tested positive for highly pathogenic avian influenza A(H5N1).	February 10, 2026 February 11, 2026 February 12, 2026 February 13, 2026
Slovakia	Samples from birds and poultry in Nitriansky and Prešovský were tested positive for highly pathogenic avian influenza A(H5N1).	February 10, 2026 February 13, 2026

Places of Occurrence	Details	WOAH Report Date
	Samples from birds in Trnavský were tested positive for highly pathogenic avian influenza A(H5N1).	February 13, 2026
Sweden	Samples from birds in Gotland were tested positive for highly pathogenic avian influenza A(H5N1).	February 10, 2026
Austria	Samples from birds in Burgenland and Kärnten were tested positive for highly pathogenic avian influenza A(H5N1).	February 11, 2026 February 12, 2026 February 13, 2026
Canada	Samples from poultry in British Columbia and Ontario were tested positive for highly pathogenic avian influenza A(H5N1).	February 11, 2026
	Samples from birds in Nova Scotia were tested positive for highly pathogenic avian influenza A(H5N1).	February 11, 2026
Israel	Samples from birds in HaZafon and Jerusalem were tested positive for highly pathogenic avian influenza A(H5N1).	February 11, 2026
Belgium	Samples from birds and poultry in Vlaanderen were tested positive for highly pathogenic avian influenza A(H5N1).	February 12, 2026
Estonia	Samples from birds in Harju and Võru were tested positive for highly pathogenic avian influenza A(H5N1).	February 12, 2026
Netherlands	Samples from birds in Drenthe, Gelderland, Groningen, Noord-Brabant, Noord-Holland, Utrecht and Zuid-Holland were tested positive for highly pathogenic avian influenza A(H5N1).	February 12, 2026
Romania	Samples from birds in Ilfov and Tulcea were tested positive for highly pathogenic avian influenza A(H5N1).	February 12, 2026
United States of America	Samples from birds and poultry in Arkansas, Idaho and Nebraska were tested positive for highly pathogenic avian influenza A(H5N1).	February 12, 2026
	Samples from birds in California, Michigan, Montana, New York, North Dakota and Wisconsin were tested positive for highly pathogenic avian influenza A(H5N1).	February 12, 2026
	Samples from poultry in Colorado, Indiana, Iowa, Kansas, Maryland, Minnesota, North Carolina, Pennsylvania and South Dakota were tested positive for highly pathogenic avian influenza A(H5N1).	February 12, 2026

Places of Occurrence	Details	WOAH Report Date
Italy	Samples from birds in Friuli-Venezia Giulia were tested positive for highly pathogenic avian influenza A(H5N1).	February 13, 2026
	Samples from birds in Lombardia were tested positive for highly pathogenic avian influenza A(H5) and A(H5N1).	February 13, 2026
	Samples from poultry in Lombardia and Veneto were tested positive for highly pathogenic avian influenza A(H5N1).	February 13, 2026
Norway	Samples from birds in Oslo, Rogaland and Vestland were tested positive for highly pathogenic avian influenza A(H5N1).	February 13, 2026
United Kingdom	Samples from birds and poultry in England were tested positive for highly pathogenic avian influenza A(H5N1).	February 13, 2026
	Samples from birds in Scotland and Wales were tested positive for highly pathogenic avian influenza A(H5N1).	February 13, 2026

For cumulative reports of avian influenza A(H5) or other highly pathogenic avian influenza in poultry / wild birds, please refer to the [WOAH](#) website.
