Avian Influenza Report

Avian Influenza Report *is a weekly report produced by the Surveillance Division of the Communicable Disease Branch of the Centre for Health Protection. This report highlights global avian influenza activity in humans and birds.*

VOLUME 22, NUMBER 46
Reporting period: November 8, 2026 – November 14, 2026 (Week 46)
(Published on November 17, 2026)

Summary

1. Since the previous issue of Avian Influenza Report (AIR), there were no new human cases of avian influenza A(H5N1). From 2016 to 2025, 0 to 81 confirmed human cases of avian influenza A(H5N1) were reported to the World Health Organization (WHO) annually (according to onset date).* The latest case was reported on November 1, 2026.

2. Since the previous issue of AIR, there were no new human cases of avian influenza A(H5N6). Since 2014 (as of November 14, 2026), there were 94 human cases of avian influenza A(H5N6) reported globally and 93 of them occurred in the Chinese Mainland. The latest case was reported on May 8, 2026.

3. Since the previous issue of AIR, there were no new human cases of avian influenza A(H7N9). Since March 2013 (as of November 14, 2026), there were a total of 1568 human cases of avian influenza A(H7N9) reported globally (all were reported in the seven waves between 2013 and September 2019). The latest case was reported on April 5, 2019.

* Since November 21, 2012, WHO only publishes information on human cases with avian influenza A(H5N1) infection in "Influenza at human – animal interface: Monthly Risk Assessment Summary". Only cases of human infection with H5N1 involved in events that are unusual or associated with potential increased risks will be reported in Disease Outbreak News. The latest report was published in October 2026.

This week's highlights

Table 7. **Confirmed human cases of avian influenza A infections other than avian influenza A(H5N1 / H5N6 / H7N9) reported in the past 6 months (as of November 16, 2026)**

	Place of occurrence	No. of cases (No. of deaths)	Details
In this reporting period	-	0(0)	-
Previously reported cases (onset/ reported in the past 6 months)	**Chinese Mainland**	23(0)	**Avian influenza A(H9N2):** ▪ **Anhui Province:** ▫ A three-year-old boy with onset on August 3, 2026. ▪ **Beijing:** ▫ A six-year-old girl with onset on August 15, 2026. ▪ **Gansu Province:** ▫ A three-year-old girl with onset on July 11, 2026. ▪ **Guangdong Province:** ▫ A one-year-old girl with onset on June 12, 2026. ▫ A 44-year-old man with onset on June 26, 2026. ▫ A one-year-old girl with onset on September 7, 2026.

	Place of occurrence	No. of cases (No. of deaths)	Details
			▪ **Guangxi Zhuang Autonomous Region:** ▫ A 64-year-old woman with onset on May 4, 2026. ▫ A two-year-old girl with onset on May 31, 2026. ▫ A four-year-old boy with onset on June 26, 2026. ▫ A two-year-old boy with onset on August 23, 2026. ▫ A nine-year-old girl with onset on October 13, 2026. ▪ **Guizhou Province:** ▫ A four-year-old boy with onset on September 20, 2026. ▪ **Henan Province:** ▫ A one-year-old girl with onset on August 30, 2026. ▫ A 68-year-old man with onset on September 17, 2026. ▪ **Hubei Province:** ▫ A two-year-old boy with onset on September 22, 2026. ▪ **Jiangsu Province:** ▫ A four-year-old boy with onset on June 22, 2026. ▫ A 12-year-old boy with onset on July 6, 2026. ▪ **Jiangxi Province:** ▫ A 72-year-old woman with onset on July 5, 2026. ▫ A 77-year-old woman with onset on September 16, 2026. ▪ **Liaoning Province:** ▫ A seven-year-old boy with onset on September 20, 2026. ▪ **Yunnan Province:** ▫ A four-year-old boy with onset on May 17, 2026. ▫ A 58-year-old woman with onset on July

	Place of occurrence	No. of cases (No. of deaths)	Details
			13, 2026. ▫ A two-year-old girl with onset on July 28, 2026.
	Hong Kong, China	1(0)	**Avian influenza A(H9N2):** ▪ The case involved a two-year-old boy with onset on June 9, 2026**.** ▪ The patient was admitted for treatment on June 10, 2026, and has now recovered. ▪ Epidemiological investigations revealed the case likely had indirect exposure to contaminated environment at a fresh provision shop selling live poultry in a wet market. ▪ One sample collected from a metal tray placed at the bottom of a live chicken cage inside the shop for collecting chicken droppings tested positive for the H9 avian influenza virus. The remaining 16 environmental samples tested negative. ▪ Whole genome sequencing and analysis of the patient's clinical specimens confirmed that all of the virus genes were avian in origin and no significant genetic variations were detected. ▪ All identified contacts remained asymptomatic.

Table 8. **Hong Kong: Confirmed reports of avian influenza A(H5) or avian influenza A(H7N9) in poultry / wild birds / environmental samples since 2015**

	No. of reports of H5 in poultry / wild birds / environmental samples	No. of reports of H7N9 in poultry / wild birds / environmental samples	Details
In this reporting period	1*	0	▪ Two environmental samples taken from the Mai Po Nature Reserve tested positive for avian influenza A(H5) virus.
Previously reported cases since 2015 (before this reporting period)	30*	1#	-

* Carcass of a peregrine falcon found in Yuen Long on April 9, 2015 (H5N6)

Carcass of an oriental magpie robin found in Sai Kung on April 29, 2015 (H5N6)
Carcass of an oriental magpie robin found in Kwai Chung on November 17, 2015 (H5N6)
Carcass of a great egret found in Wong Tai Sin on December 31, 2015 (H5N6).
Chicken carcass found in Tuen Mun on February 14, 2016 (H5N6)
Chicken carcass found in Tai O on February 18, 2016 (H5N6)
Samples of faecal droppings collected at Mai Po Nature Reserve on November 25, 2016 (H5N6)
A sample of faecal droppings collected at Mai Po Nature Reserve on November 30, 2016 (H5N6)
A dead red-whiskered bulbul collected at Kowloon City on April 7, 2017 (H5N6)
A dead oriental magpie robin found in Tseung Kwan O on December 21, 2017 (H5N6)
A dead black-faced spoonbill found in the Hong Kong Wetland Park in Tin Shui Wai on December 21, 2017 (H5N6)
An environmental swab of a chopping board and skin swabs of a chilled duck sample taken from a fresh provision shop in Wan Chai on January 2 & January 9, 2018 (H5N6)
An oropharyngeal swab from a batch of chilled chicken taken at a fresh provision shop in Mong Kok, reported on January 23, 2018 (H5N6)
A black-headed gull carcass found in Ngau Hom Tsuen, Lau Fau Shan, reported on February 9, 2018 (H5N6)
A dead crested myna found at Kun Lung Wai, Fanling reported on April 9, 2018 (H5N6)
A swab sample taken from a bird cage housing a hill myna at a pet bird shop in Yuen Po Street Bird Garden in Mong Kok on April 7, 2018 (H5N6)
Samples of faecal droppings collected at Mai Po Nature Reserve reported on January 14, 2021 (H5N8)
Carcass of a peregrine falcon found in Wu Kai Sha reported on February 1, 2021 (H5N8)
Carcass of a black-faced spoonbill found in the Hong Kong Wetland Park in Tin Shui Wai reported on December 20, 2021 (H5N1)
Carcass of a Eurasian Curlew found in the Mai Po Nature Reserve reported on January 26, 2022 (H5N1)
Environmental sample collected from Mai Po Nature Reserve reported on November 16, 2022 (H5N1)
Carcass of a black-faced spoonbill found in Mai Po Nature Reserve reported on November 30, 2022 (H5N1)
Black-faced spoonbill carcass found in Hong Kong Wetland Park reported on December 12, 2022 (H5N1)
Environmental sample from Mai Po Nature Reserve reported on December 8, 2023 (H5N1)
Eurasian teal carcass found in the Mai Po Nature Reserve reported on December 21, 2023 (H5N1)
Pin-tailed snipe and Eurasian teal carcasses found in the Hong Kong Wetland Park reported on December 28, 2023 (H5N1)
Eurasian wigeon carcass found in the Hong Kong Wetland Park, reported on January 5, 2024 (H5N1)
Eurasian wigeon sample collected from the Hong Kong Wetland Park, reported on January 5, 2024 (H5N1)
Environmental sample collected from Mai Po Nature Reserve reported on November 8, 2024 (H5N1)
Eurasian wigeon sample and environmental sample collected from Mai Po Nature Reserve reported on November 14, 2024 (H5N1)
Environmental samples collected from Mai Po Nature Reserve reported on November 13, 2026 (H5)
A sample of faecal droppings of live poultry taken from a poultry stall in Yan Oi Market in Tuen Mun reported on June 5, 2016 (H7N9)

Table 9. **Outside Hong Kong: Confirmed avian influenza A(H5) or other highly pathogenic avian influenza in poultry / wild birds / environmental samples reported in this week – number of reports for various subtypes of virus**

Subtype of virus	No. of reports
H5	3
H5N1	39
H5N5	1

Table 10. **Outside Hong Kong: Confirmed avian influenza A(H5) or other highly pathogenic avian influenza in poultry / wild birds / environmental samples reported in this week – details of reports**

Places of Occurrence	Details	WOAH Report Date
Netherlands	Samples from birds and poultry in Gelderland tested positive for highly pathogenic avian influenza A(H5N1).	November 9, 2026 November 10, 2026 November 13, 2026

Places of Occurrence	Details	WOAH Report Date
	Samples from birds in Drenthe, Dutch Exclusive Economic Zone, Friesland, Groningen, Ijsselmeer, Noord-Holland, Utrecht, Zeeland and Zuid-Holland tested positive for highly pathogenic avian influenza A(H5N1).	November 10, 2026 November 13, 2026
Peru	Samples from birds in Amazonas, Cajamarca, Junín, Lambayeque, Pasco and Piura tested positive for highly pathogenic avian influenza A(H5N1).	November 9, 2026
	Samples from poultry in Lima tested positive for highly pathogenic avian influenza A(H5N1).	November 11, 2026 November 13, 2026
Finland	Samples from birds in Länsi- ja Sisä-Suomen aluehallintovirasto, Lounais-Suomen aluehallintovirasto and Pohjois-Suomen aluehallintovirasto tested positive for highly pathogenic avian influenza A(H5N1).	November 10, 2026 November 12, 2026
Germany	Samples from poultry in Brandenburg tested positive for highly pathogenic avian influenza A(H5N1).	November 10, 2026 November 12, 2026
	Samples from birds in Bayern, Hamburg, Niedersachsen and Schleswig-Holstein tested positive for highly pathogenic avian influenza A(H5N1).	November 11, 2026 November 12, 2026
Iceland	Samples from birds in Suðurland tested positive for highly pathogenic avian influenza A(H5).	November 10, 2026
	Samples from birds in Höfuðborgarsvæði tested positive for highly pathogenic avian influenza A(H5N5).	November 10, 2026
Japan	Samples from birds in Akita and Hokkaido tested positive for highly pathogenic avian influenza A(H5N1).	November 10, 2026
Colombia	Samples from birds in Magdalena tested positive for highly pathogenic avian influenza A(H5N1).	November 11, 2026

Places of Occurrence	Details	WOAH Report Date
Estonia	Samples from birds in Tartu tested positive for highly pathogenic avian influenza A(H5N1).	November 11, 2026
Sweden	Samples from birds in Kävlinge, Malmö, Norrköping and Nynäshamn tested positive for highly pathogenic avian influenza A(H5N1).	November 11, 2026
Canada	Samples from birds in Ontario tested positive for highly pathogenic avian influenza A(H5N1).	November 12, 2026
	Samples from poultry in Alberta and Manitoba tested positive for highly pathogenic avian influenza A(H5N1).	November 12, 2026
Denmark	Samples from poultry in Veterinary Inspection Unit East tested positive for highly pathogenic avian influenza A(H5N1).	November 12, 2026
India	Samples from poultry in Andhra Pradesh tested positive for highly pathogenic avian influenza A(H5N1).	November 12, 2026
	Samples from birds and poultry in Tamil Nadu tested positive for highly pathogenic avian influenza A(H5N1).	November 12, 2026
Norway	Samples from birds in Buskerud tested positive for highly pathogenic avian influenza A(H5N1).	November 12, 2026
	Samples from birds and poultry in Rogaland tested positive for highly pathogenic avian influenza A(H5N1).	November 12, 2026 November 16, 2026
	Samples from poultry in Agder and Akershus tested positive for highly pathogenic avian influenza A(H5N1).	November 13, 2026 November 16, 2026
Austria	Samples from birds in Niederösterreich tested positive for highly pathogenic avian influenza A(H5N1).	November 13 2026

Places of Occurrence	Details	WOAH Report Date
Belgium	Samples from birds in Belgian Exclusive Economic Zone and Vlaanderen tested positive for highly pathogenic avian influenza A(H5N1).	November 13, 2026
France	Samples from birds in Gironde, Landes and Seine-Maritime tested positive for highly pathogenic avian influenza A(H5N1).	November 13, 2026
Hong Kong, China	Samples from birds in Yuen Long tested positive for highly pathogenic avian influenza A(H5).	November 13, 2026
Italy	Samples from birds in Emilia-Romagna and Lombardia tested positive for highly pathogenic avian influenza A(H5N1).	November 13, 2026
	Samples from birds and poultry in Veneto tested positive for highly pathogenic avian influenza A(H5N1).	November 13, 2026
Latvia	Samples from birds in Bauskas tested positive for highly pathogenic avian influenza A(H5).	November 13, 2026
	Samples from birds in Limbažu tested positive for highly pathogenic avian influenza A(H5N1).	November 13, 2026
Spain	Samples from birds in País Vasco tested positive for highly pathogenic avian influenza A(H5N1).	November 13, 2026
United Kingdom	Samples from poultry in England tested positive for highly pathogenic avian influenza A(H5N1).	November 13, 2026
United States of America	Samples from birds in Arkansas, Florida, Oregon, Washington and Wyoming tested positive for highly pathogenic avian influenza A(H5N1).	November 13, 2026
	Samples from poultry in Iowa, Minnesota and North Dakota tested positive for highly pathogenic avian influenza A(H5N1).	November 13, 2026

Places of Occurrence	Details	WOAH Report Date
	Samples from birds and poultry in California tested positive for highly pathogenic avian influenza A(H5N1).	November 13, 2026

For cumulative reports of avian influenza A(H5) or other highly pathogenic avian influenza in poultry / wild birds, please refer to the WOAH website.

Table 11. **Countries / areas with documented infections with highly pathogenic avian influenza (including infections in humans/birds and relevant environmental samples) in the past 6 months (as of November 16, 2026)**
