**衛生防護中心**  
Centre for Health Protection

**Infection Control Branch**

**Health Advice on Prevention of Coronavirus disease (COVID-19)  
for  
Religious Assembly  
(Interim)**

**I. Disease information**

Please visit the following website for disease information, affected areas and updated information related to COVID-19:

<https://www.coronavirus.gov.hk/eng/index.html>

2. The Department of Health advises faith-based communities should take the following precautionary measures to minimize the risk of contracting and spreading COVID-19.

**II. Preventive measures**

**A. Maintain Good Personal Hygiene and Immunity**

(a) Avoid touching eyes, mouth and nose.

(b) **Maintain hand hygiene**

- i. Perform hand hygiene frequently, especially before touching mouth, nose or eyes; after using the toilet; after touching public installations such as handrails or door knobs; or when hands are contaminated by respiratory secretion after coughing or sneezing.

衛生防護中心乃衛生署  
轄下執行疾病預防  
及控制的專業架構  
The Centre for Health  
Protection is a  
professional arm of the  
Department of Health for  
disease prevention  
and control

- ii. Wash hands with liquid soap and water, and rub for at least 20 seconds, then dry with a disposable paper towel. When the hands are cleaned, do not touch the water tap directly again (for example, using a paper towel to wrap the faucet before turning it off). If hand washing facilities are not available, or when hands are not visibly soiled, hand hygiene with 70-80% alcohol-based handrub is an effective alternative.
- (c) Check body **temperature** regularly. Those with fever, respiratory symptoms or sudden loss of taste/smell should refrain from attending the assembly, wear a surgical mask, avoid going to crowded places, and seek medical advice promptly.
- (d) Cover your mouth and nose with tissue paper when sneezing or coughing. Dispose the soiled tissues into a lidded rubbish bin, then wash hands thoroughly.
- (e) All must wear **mask** at all times . For safety reasons, mask-wearing is not recommended for
  - i. children below age of 2 without supervision
  - ii. people with difficulty breathing
  - iii. people need assistance to remove the mask.
- (f) Staff are advised to stagger their meal time and adopt **social distancing** when having meals. If meal is offered to staff, have pre-packaged boxes or bags for each staff member whenever possible, instead of a buffet or family-style meal. Avoid meal sharing.
- (g) Complete the vaccination course. The Government is implementing a territory-wide COVID-19 Vaccination Programme for all Hong Kong residents. Please visit <https://www.covidvaccine.gov.hk/en/> and <https://booking.covidvaccine.gov.hk/forms/index.jsp>
- (h) Build up good body immunity by having a balanced diet, regular exercise and adequate rest, do not smoke and avoid alcohol consumption.
- (i) Use the “LeaveHomeSafe” mobile app to record your whereabouts and check whether you have visited any venue as with a COVID-19 patient at about the same time.

## B. Worshippers

- (a) Worshippers are encouraged to **bring their own items** (e.g. prayer rugs, prayer books) to attend religious assemblies if needed.
- (b) Worshippers should check their **temperature** before visiting. Those with fever or respiratory symptoms should cancel their visit, wear surgical mask and seek medical attention promptly.
- (c) Worshippers must wear **masks** all the times when attending the religious gathering. At the same time, worshippers should perform **hand hygiene** before entering premises; keep vigilant and maintain good personal hygiene, for example, perform hand hygiene again after attending religious assemblies.
- (d) **Avoid physical contact** between worshippers, touching or kissing of sacred and symbolic objects during worship services and prayer.
- (e) Maintain appropriate social distance with other people of **at least 1 metre**.
- (f) Take a shower or bath and wash your hair when you return home, and wash your clothes properly.

## C. Premises Setting

- (a) Avoid large group gatherings. Please take note of the Government's announcement on the latest public health control measures in relation to group gathering, and to follow legal requirement in accordance with relevant regulation(s) under the Prevention and Control Disease Ordinance (Cap. 599).
- (b) Conduct rituals and faith-related activities through live-streaming or other online media channels whenever possible.
- (c) If on-line /virtual gatherings are not feasible, keep the duration of the gathering to a minimum and limit the number of worshippers in order to limit contact among participants.
- (d) Small group sessions of religious gatherings can be considered so as to ensure keeping adequate social distancing between worshippers.
- (e) Arrange **temperature** check at the entrance. Staff must wear a surgical mask and check temperature for worshippers upon entry to the premises and deny entry of those with fever.
- (f) Provide adequate **hand hygiene** facilities, such as 70 to 80% alcohol-based handrub at the entrance and inside the premises. Provide masks to worshippers if needed.

- (g) Regulate the number and flow of worshippers entering, attending and departing from premises to ensure **social distancing of at least 1 metre** if feasible.
- (h) Space out seating for worshippers who do not live in the same household to **at least 1 metre apart** when possible; or set up partition between worshippers, consider limiting seatings to alternate rows.
- (i) **Avoid sharing of items** such as prayer books among worshippers. Can consider to use projector to project the scripture excerpts or to distribute the excerpts to individual worshippers.
- (j) Encourage worshippers to support the overall safety of the event. Choir and other faith-related activities which can create aerosol (such as shouting, chanting and singing along) should be discouraged.
- (k) In case saying prayers are essential as part of the faith-related activities, consider limiting the number of members concerned and keep **at least 1 metre** between individuals as far as feasible. Mask must be worn all the times.
- (l) **Avoid physical contacts** as far as feasible, replace handshakes with a bow or peace sign while performing religious greetings.
- (m) Advise worshippers against dipping their fingers in fountains / containers of holy water. Avoid rituals involving body contact and substitute appropriate practices.
- (n) Consider using electronic payment or fixated collection box for collecting donations instead of using shared collection bags or baskets.
- (o) All instruments for rituals and faith-related activities need to be cleaned and disinfected properly after use.
- (p) Identify a room or area where a person could be isolated if he or she becomes ill or begins to develop symptoms and seek medical consultation immediately. Close off areas used by the sick until cleaning and disinfection done.
- (q) Consider keeping a list of worshippers (if feasible) and staff duty list
- (r) Post up health education materials on hand hygiene, cough etiquette and COVID-19 in conspicuous sites to alert the staff and worshippers. Relevant health education materials can be downloaded from the CHP website: <https://www.chp.gov.hk/en/resources/464/102466.html>.

## D. Food or Drink as Part of Religious Ritual

- (a) Refer to the latest government announcement under the Prevention and Control of Disease (Prohibition on Group Gathering) Regulation (Cap. 599G).
- (b) No food or drink may be served during the religious activity except as part of a religious ritual.
- (c) Venue of serving food or drinks as religious ritual should be well ventilated.
- (d) Worshippers should keep in a distance of at least 1.5 metres with each other (or with some form of effective partition in between) while serving food or drinks as religious ritual.
- (e) Perform **hand hygiene** before and after food or drink related religious rituals. Masks should be put on immediately afterwards.
- (f) Consider using individual pre-packaged boxes/servings of religious or ceremonial foods, rather than shared portions from communal containers.
- (g) Forbid activities that involves placing religious or ceremonial foods into the mouth of worshippers and worshippers drinking from the same cup.

## E. Maintain Environmental Hygiene

- (a) Maintain good ventilation.
  - i. Keep windows open as appropriate and where possible to increase fresh air supply;
  - ii. Use of fans (e.g. wall, circulating or exhaust fan) in indoor spaces should be accompanied by means to increase outdoor air changes (e.g. opening windows or maximizing fresh air intake of air conditioners) at the same time. Minimize air blowing directly from one person (or group of people) to another;
  - iii. Ensure the air-conditioning system is functioning well with sufficient fresh air supply, clean the air filter and ducting regularly.
- (b) Keep environment clean
- (c) Regularly clean and disinfect frequently touched surfaces such as furniture, commonly shared items and floor with 1 in 99 diluted household

bleach (mixing 1 part of household bleach containing 5.25% sodium hypochlorite with 99 parts of water), leave for 15 – 30 minutes, and then rinse with water and wipe dry. For metallic surface, disinfect with 70% alcohol.

- (d) If places are contaminated by respiratory secretions, vomitus or excreta, use absorbent disposable towels to wipe them away. Then disinfect the surface and neighbouring areas with 1 in 49 diluted household bleach (mixing 1 part of household bleach containing 5.25% sodium hypochlorite with 49 parts of water), leave for 15-30 minutes and then rinse with water and wipe dry. For metallic surface, disinfect with 70% alcohol.
- (e) Spraying disinfectants is not recommended as this practice could be harmful and would not reduce the risk of viral transmission.
- (f) Special attention to following areas
  - i. Areas with frequent access by members of the public (e.g. lifts, escalators, lobby entrance, waiting areas, corridors, Geng kiosk, information counter and lounges): Clean and wipe at least twice daily.
  - ii. Frequently-touched surfaces (e.g. buttons, handrails, handle, chairs and mailboxes): Clean and wipe at least twice daily and when visibly soiled.
  - iii. Garbage room: Properly clean up rubbish and waste stored in the garbage room every day. Clean and wipe related facilities at least twice daily.
  - iv. Clean the exhaust fan inside the lift regularly and keep it in good condition.

## **F. Maintain Toilet Hygiene**

- (a) Keep toilets clean and dry.
- (b) Increase frequency of cleaning and disinfection.
- (c) Provide liquid soap and disposable paper towels for hand washing.
- (d) Ensure the flushing system of the toilet, and hands drying machines are in

proper function at all times.

- (e) After using the toilet, put the toilet lid down before flushing to avoid spreading germs.
- (f) Ensure the water traps must be filled with water (including U-shaped water trap, bottled trap or anti-syphonage trap) to prevent foul odour and insects in the soil pipe from entering the premises. Pour about half a litre of water into each drain outlet once a week.
- (g) Do not alter the drain and pipes without prior authorization.

[https://www.chp.gov.hk/files/pdf/make\\_sure\\_the\\_trap\\_is\\_not\\_dry.pdf](https://www.chp.gov.hk/files/pdf/make_sure_the_trap_is_not_dry.pdf)

### **III. Cleaning and Disinfection of Environment when a Confirmed Case of COVID-19 is Encountered**

#### **A. Cleaning staff should wear appropriate Personal Protective Equipment (PPE) including:**

- (a) Surgical mask
- (b) Latex gloves
- (c) Disposable gown
- (d) Eye protection (goggles/face shield) and
- (e) Cap (optional)

#### **B. Staff training**

- (a) Ensure the frontline cleaning staff received training with environmental disinfection procedures and supervising staff should have read and familiar with the disinfection guidelines.

#### **C. Enhanced Environmental Disinfection:**

- (a) Disinfect all potentially contaminated surfaces or items by using 1 in 49 diluted household bleach (mixing 1 part of household bleach containing 5.25% sodium hypochlorite with 49 parts of water).

**D. If There is Blood, Secretions, Vomitus or Excreta Spillage, Take Enhanced Measures:**

- (a) Cleaning staff should wear appropriate personal protective equipment (PPE) including surgical mask, gloves, disposable gown, eye protection (goggles/face shield) and cap (optional).
- (b) Use forceps to hold the strong absorbent disposable towels to wipe away the blood, secretions, vomitus or excreta during a preliminary clean up.
- (c) Then put the forceps and used absorbent disposable towels in a garbage bag carefully without contaminating oneself/the environment.
- (d) Disinfect with 1 in 4 diluted household bleach (mixing 1 part of household bleach containing 5.25% sodium hypochlorite with 4 parts of water), wipe from the outside inward, leave for 10 minutes, rinse with water and wipe dry afterwards.
- (e) After the procedure, put all the wastes and cleaning tools (e.g. forceps, cloth, mop head) in the garbage bag.
- (f) Carefully remove PPE, put them in the garbage bag, and then perform hand hygiene.  
  
(When hands are not visibly soiled, use 70-80% alcohol-based handrub. Wash hands with soap and water when hands are visibly dirty or visible soiled with blood, body fluid.)
- (g) Wear a pair of new gloves, seal the waste bag tight and dispose it properly in covered rubbish bin. Then, label the rubbish bin and put it in a safe undisturbed place until collection.
- (h) Remove gloves carefully. Wash hands with liquid soap and water.

**IV. Guidelines and Educational Material for Reference by Faith-based Communities**
