

CLINICAL MANAGEMENT OF EXPOSURE TO METALS FROM DRINKING WATER

The Department of Health and the Hospital Authority will share experience from the 2015 lead-in-water and promote adoption of a simple clinical framework for managing persons with exposure to metals from drinking water. **CME points will be arranged.**

Main Speakers:

Dr Raymond WONG

Consultant,
Prince of Wales Hospital Poison Treatment Centre,
Hospital Authority

Dr Florence LEE

Consultant Paediatrician,
Department of Health

Topics highlight:

1. Overview of clinical management framework for lead and other 5 metals (antimony, cadmium, chromium, copper and nickel)
2. Clinical management and counseling for exposure to lead and other 5 metals from drinking water
3. Guide to assessment and management of development, behavioural, and/or academic problems
