

Can I Have COVID-19 Vaccination?

The vast majority of us are suitable for COVID-19 vaccination

Get COVID-19 vaccination, protect yourself and others,
and reduce the chance of virus mutation

If you have chronic disease(s) under **stable control**, you **should get vaccinated** for protection
as you are **at increased risk for severe illness from COVID-19**.

If you are not sure about the control or the condition, you should discuss with your doctor first and
decide the **best timing** for vaccination.

Do not get vaccinated if you have the following **contraindication(s)**

Comirnaty Vaccine	✗ Allergy to the previous dose of Comirnaty or its vaccine component (unless advised by specialists in Immunology and Allergy)
CoronaVac Vaccine	✗ Allergic history to CoronaVac or other inactivated vaccines ✗ Previous severe allergic reaction to vaccine ✗ Severe neurological conditions ✗ Any adverse reaction of nervous system after CoronaVac vaccination ✗ Uncontrolled severe chronic diseases

Individuals receiving vaccination shall **continue their medication**

Examples	Hypertension	Diabetes	<p>If stable Should get vaccinated</p> <p>Those in remission should get vaccinated Those in active treatment should discuss with doctor on the timing</p> <p>Should get vaccinated Discuss with doctor for the best timing</p> <p>Should get vaccinated Except for those who have just received the transplantation or on high dose immunosuppression</p> <p>Can get vaccinated Apply prolonged direct pressure for at least 5 minutes to the injection site</p> <p>Wait 2 to 4 weeks for vaccination After the condition has been stabilised</p> <p>Wait 1 month for vaccination After the condition has been stabilised</p>
	Cardiovascular diseases	Asthma	
	Chronic obstructive airway diseases	Chronic liver diseases	
	Autoimmune rheumatic diseases		
	Cancers		
	Immunocompromised patients		
	Organ transplant recipients
