

本署檔號 Our Ref. : (59) in DH CDB/9/12/6/4 Pt.1

1 June 2020

Dear Doctor,

**A new cluster of local cases of COVID-19 and appeal to collect specimens  
for COVID-19 testing for early case detection**

We write to inform you about a new cluster of locally-acquired cases of COVID-19, and urge you to offer COVID-19 testing for all patients with acute symptoms in order not to miss the opportunity to identify infected persons in the community as early as possible.

The new cluster involved five cases confirmed on 31 May and 1 June 2020. The first case affected a 34-year-old woman who lives in Lek Yuen Estate in Shatin. She had onset of cough and back pain on 22 May. She had consulted a private medical practitioner (PMP) three times without being tested for COVID-19. She developed confusion on 30 May and was admitted to a public hospital on the same day in critical condition requiring mechanical ventilation support. Her tracheal aspirate was tested positive for SARS-CoV-2. She did not travel outside Hong Kong during the incubation period.

Epidemiological investigation by the Centre for Health Protection (CHP) of the Department of Health (DH) revealed that her husband also had mild respiratory symptoms on 26 May and consulted a PMP on 30 May with no testing for COVID-19 offered. Her husband was arranged to be admitted to hospital and tested positive for SARS-CoV-2. The CHP's investigation at the workplace of the first case has identified two symptomatic co-workers who had onset of symptoms in late April. They had consulted PMPs with no testing for COVID-19 offered. They were arranged to be admitted to hospital and tested positive for SARS-CoV-2. The fifth case involved the ambulance man who had transferred the first case to the hospital from her home. He remained asymptomatic and tested positive for SARS-CoV-2 on 1 June. The

CHP's investigation and contact tracing is ongoing.

This cluster, together with the earlier cluster involving three cases detected in mid-May, signifies that there are silent/subclinical local transmissions going on in the community and the risk of major community outbreaks exists. Testing of COVID-19 at an earlier stage may enable earlier case detection, isolation and treatment, and hence reduce community spread. The spectrum of clinical manifestations of COVID-19 is wide. Some infected persons may present with mild or non-specific symptoms only, especially during the early stage of disease. This poses challenges in relying on common clinical presentation to guide the need for testing.

To break any transmission chain for disease containment, I strongly urge doctors to remain vigilant and *arrange COVID-19 test for all patients presenting with any symptoms, irrespective of their travel history and clinical severity*. Travel history is NOT a prerequisite for offering COVID-19 testing. All the eight cases of locally-acquired infection of the two clusters did not have travel history outside Hong Kong within the incubation period.

Free testing for COVID-19 is provided to all private clinics by the CHP's Public Health Laboratory Services Branch (PHLSB). Arranging testing with private laboratory is not a requirement. When ordering the test, please fill in the laboratory form (available from: [https://www.chp.gov.hk/files/pdf/test\\_request\\_form\\_public\\_health\\_laboratory\\_centre\\_dh2546.pdf](https://www.chp.gov.hk/files/pdf/test_request_form_public_health_laboratory_centre_dh2546.pdf)) and give it to the patient together with a specimen bottle and two plastic bags for them to save a deep throat saliva (DTS) specimen (preferably early morning specimen but non-early morning specimen is also acceptable). Also, you may consider to collect stool specimen for paediatric patients if collection of DTS is not possible, using the same collection bottles as for DTS.

The patients can send the specimen together with a completed laboratory form to one of the 13 collection clinics of DH or one of the selected GOPCs of HA (currently 18 GOPCs) by themselves or their friends/family members/relatives **on the same day of specimen collection (Annex)**. Please refer to the following website for the updated list of collection clinics (Chinese - [https://www.chp.gov.hk/files/pdf/list\\_of\\_collection\\_points\\_tc.pdf](https://www.chp.gov.hk/files/pdf/list_of_collection_points_tc.pdf); English - [https://www.chp.gov.hk/files/pdf/list\\_of\\_collection\\_points\\_en.pdf](https://www.chp.gov.hk/files/pdf/list_of_collection_points_en.pdf)). The patients can continue to use door-to-door specimen collection service provided by GoGo Tech Limited ("GOGO VAN") and HK PICK-UP LIMITED ("Pickupp") at a cost to be paid by the patients. They can refer to

the information below for service subscriptions and enquiries:

	GOGO VAN	Pickupp
Service Subscription	<a href="http://www.gogovan.com.hk/covid-19-testing-en/">www.gogovan.com.hk/covid-19-testing-en/</a>	<a href="http://hk.pickupp.io/en/blog/COVID-19-sample">hk.pickupp.io/en/blog/COVID-19-sample</a>
General Enquiry	5681 4989 (hotline)	hk@pickupp.io

Furthermore, the DH will provide specimen bottles for PMPs upon request. You may wish to fill in the request form (available from: [https://www.coronavirus.gov.hk/pdf/specimen\\_bottles\\_request\\_form.pdf](https://www.coronavirus.gov.hk/pdf/specimen_bottles_request_form.pdf)) and fax it to one of the 13 DH clinics where you would like to collect specimen bottles. The concerned DH clinic will then fax the reply slip back to the PMP advising the time slot for specimen bottle collection. After receiving the reply slip, your clinic staff needs to bring it along to collect the bottles at the specified DH clinic as scheduled. **For doctors who encounter difficulty in getting specimens bottles from DH's clinics, please call the hotline of PHLSB (Tel: 2319 8360) for assistance.**

Laboratory reports will normally be available on the next working day upon receipt of specimens by PHLSB and will be sent out by fax to the requesting PMP. If the patient deteriorates, it is necessary to make sure that COVID-19 testing has been done and repeated testing may be considered. For cases tested positive for COVID-19, the CHP will contact the doctors and the patients for investigation. In general, staff in the clinic would not be considered as close contact if both the patients and staff wear surgical masks, the duration of consultation is short (less than 15 minutes) and there is no aerosol generating procedure performed in the clinic. It is important to adhere to infection control measures all the times. You may wish to refer to the guidelines published by the CHP for details (<https://www.chp.gov.hk/en/resources/346/index.html>).

The CHP has produced infographics for publicity of COVID-19 testing for patients. You may refer to the following hyperlink for the infographics:

- Chinese - [https://www.chp.gov.hk/files/pdf/early\\_testing\\_and\\_detection\\_tc.pdf](https://www.chp.gov.hk/files/pdf/early_testing_and_detection_tc.pdf)
- English - [https://www.chp.gov.hk/files/pdf/early\\_testing\\_and\\_detection\\_en.pdf](https://www.chp.gov.hk/files/pdf/early_testing_and_detection_en.pdf)

Thank you again for your unfailing support and concerted efforts in the prevention and control of communicable diseases.

Yours faithfully,

A handwritten signature in red ink, appearing to read 'SK CHUANG', is written in a cursive style.

(Dr. SK CHUANG)

**Notes**

- 配合第五階段「加強化驗室監察計劃」，上述的普通科門診診所會設置樣本收集點供私家醫生送交樣本作2019冠狀病毒檢測。Under the 5<sup>th</sup> tier Enhanced Laboratory Surveillance Programme, the above listed General Out-patient Clinics (GOPCs) will provide specimen collection points for submission of specimen by patients of private medical practitioners for testing of COVID-19.
- 附有指示牌的樣本收集箱會設於上述診所的門口位置 (分流站附近)。  
Specimen collection box with signage will be placed in the entrance (near to the triage station) of each of the listed GOPCs.
