

Latest situation of COVID-19 (as of 29 June 2022)

The Centre for Health Protection (CHP) of the Department of Health (DH) today (29 June) announced the latest epidemic situation of COVID-19. As of 0.00am, 29 June 2022, the CHP was investigating 1849 additional locally acquired cases tested positive for the SARS-CoV-2 virus, including 788 cases tested positive by nucleic acid tests and verified 1061 cases tested positive by rapid antigen tests (RATs) in the past 24 hours^{Note 1}. Separately, 155 additional imported cases were reported, including 116 cases tested positive by nucleic acid tests and 39 cases tested positive by RATs. So far, Hong Kong has recorded a total of 775236 and 468203 cases tested positive by nucleic acid tests and RATs respectively for the SARS-CoV-2 virus.

Since the 5th wave (31 December 2021), 762605 cases and 468203 cases were tested positive by nucleic acid tests and rapid antigen tests respectively.

In the recent 7-day period from 23 to 29 June 2022, an average of 736.9 cases by nucleic acid tests were reported per day, as compared with 537.0 cases per day reported in the previous 7-day period from 16 to 22 June 2022 (Figure 1(i)).

Figure 1(i): Daily number and 7-day moving average of cases tested positive for SARS-CoV-2 virus by nucleic acid tests in 2022^{Note 2}

Note 1:

Starting from 7 June 2022, only cases reported via the "Declaration System for individuals tested positive for COVID-19 using Rapid Antigen Test" which had been verified with positive nucleic acid test results will be announced. These include RAT positive cases reported in the past few days.

Note 2:

- Re-positive cases are excluded in Figure 1(i).
- As announced by the Government on 15 February 2022 (https://www.news.gov.hk/eng/2022/02/20220215/20220215_172336_940.html?type=category&name=covid19&tl=t) and 25 February 2022 (<https://www.info.gov.hk/gia/general/202202/25/P2022022500816.htm>), positive cases detected by the Hospital Authority and testing contractors are now directly deemed as confirmed cases.
