

## **Latest situation of COVID-19 (as of 30 June 2022)**

The Centre for Health Protection (CHP) of the Department of Health (DH) today (30 June) announced the latest epidemic situation of COVID-19. As of 0.00am, 30 June 2022, the CHP was investigating 2196 additional locally acquired cases tested positive for the SARS-CoV-2 virus, including 823 cases tested positive by nucleic acid tests and verified 1373 cases tested positive by rapid antigen tests (RATs) in the past 24 hours<sup>Note 1</sup>. Separately, 162 additional imported cases were reported, including 123 cases tested positive by nucleic acid tests and 39 cases tested positive by RATs. So far, Hong Kong has recorded a total of 776182 and 469615 cases tested positive by nucleic acid tests and RATs respectively for the SARS-CoV-2 virus.

Since the 5th wave (31 December 2021), 763551 cases and 469615 cases were tested positive by nucleic acid tests and rapid antigen tests respectively.

In the recent 7-day period from 24 to 30 June 2022, an average of 778.9 cases by nucleic acid tests were reported per day, as compared with 560.7 cases per day reported in the previous 7-day period from 17 to 23 June 2022 (Figure 1(i)).

**Note 1:**

Starting from 7 June 2022, only cases reported via the "Declaration System for individuals tested positive for COVID-19 using Rapid Antigen Test" which had been verified with positive nucleic acid test results will be announced. These include RAT positive cases reported in the past few days.

**Note 2:**

- Re-positive cases are excluded in Figure 1(i).
- As announced by the Government on 15 February 2022 ([https://www.news.gov.hk/eng/2022/02/20220215/20220215\\_172336\\_940.html?type=category&name=covid19&tl=1](https://www.news.gov.hk/eng/2022/02/20220215/20220215_172336_940.html?type=category&name=covid19&tl=1)) and 25 February 2022 (<https://www.info.gov.hk/gia/general/202202/25/P2022022500816.htm>), positive cases detected by the Hospital Authority and testing contractors are now directly deemed as confirmed cases.
