Guidelines on Prevention of Severe Respiratory Disease associated with a Novel Infectious Agent for Participants of Public Functions

When attending a public function, the Department of Health advises members of the public to take the following precautionary measures to minimise the risk of contracting and spreading Severe Respiratory Disease associated with a Novel Infectious Agent.

Disease Information
https://www.chp.gov.hk/en/healthtopics/content/24/102466.html

Before the function
- If you do not feel well, especially when you have a fever and/or respiratory symptoms such as coughing, sneezing, sore throat or muscle pain, do not attend the function. Wear a surgical mask and seek medical advice promptly.
- Bring tissue paper and 70 to 80% alcohol-based handrub with you.
- Take heed of government announcements with respect to the risk of spread of infections and take appropriate precautionary measures.

During the function
- Maintain good personal hygiene.
- Avoid touching eyes, nose and mouth.
- Keep hands clean at all times. Perform hand hygiene frequently, especially before touching your eyes, mouth or nose, before handling food or eating, after going to toilet, after touching public installations such as escalator handrails, elevator control panels or door knobs, or when hands are contaminated by respiratory secretion after coughing or sneezing.
- Wash hands with liquid soap and water, and rub for at least 20 seconds. Then rinse with water and dry with a disposable paper towel.
- If hand washing facilities are not available, or when hands are not visibly soiled, performing hand hygiene with 70 to 80% alcohol-based handrub is an effective alternative.
- Cover your nose and mouth with tissue paper when sneezing or coughing. Do not spit or litter. Use tissue paper to hold your spit. Dispose of the soiled tissues into a lidded rubbish bin, and then wash hands thoroughly. Spitting or littering in public is an offence and the offender is liable to a fixed penalty.

After the function
- Take a shower or bath and wash your hair when you return home to remove any dirt and germs that you might have come across.
- Wash your clothes properly.

At all times
• Maintain good personal hygiene.
• Maintain good environmental hygiene and indoor ventilation.
• Build up good body resistance and maintain healthy lifestyle. This can be achieved through balanced diet, regular exercise and adequate rest.
• Do not smoke and avoid alcohol consumption.
