

Know More about Rubella

Special notes for travelling abroad

- People who intend to travel to areas with recent rubella outbreak are advised to **review their vaccination history and past medical history** before the trip
- For those with incomplete vaccination, unknown vaccination history or unknown immunity against rubella, they are advised to **consult their doctor for advice** before the trip
- It **takes about two weeks** after vaccination **for antibodies to develop**, travellers are advised to plan and get vaccinated ahead
